MGEC Board of Directors

2025 Annual Meeting Summary

Moreau-Grand Electric Cooperative held its 79th annual membership meeting on Wednesday, Oct. 8th, 2025, at the MGEC HQ building in Timber Lake. Pulled pork smoked by Operations Superintendent Josh Lemburg and Lineman Brent Spafford along with sides provided by Country Market and desserts provided by Red Earth Table were enjoyed by 109 registered members joined by 82 additional guests for a total of 191 meals.

JoJo Bridges had the closest guess for the candy jar, so he won a jar of Hershey's Kisses and \$25. Joey Kraft won the kids' grand prize drawing of a Razor Scooter. Board President Ryan Maher then called the meeting to order. Father Brian Lane gave the invocation for the meeting.

Vice-President McLellan explained the member material given out at registration which included a copy of the 2024 annual meeting minutes, 2024 Financial Report, and a 4-in-1 Screwdriver gift.

Secretary Hahne read the Notice of Annual Meeting and Proof of Mailing statements before going over the financial report. Board President Ryan Maher and General Manager Kent Larson gave

their joint report for the meeting, which included brief reports on new employees, Neil Hahne's retirement, and service awards. Since they are both stepping down, Directors Lawrence and Bartlett were both honored with star quilts at the meeting for their service on the board.

President Maher reported on highlights of the year, including issuing a \$50,000 loan to Dewey County for their vault addition to the courthouse, demolishing the old MGEC facility, U.S. Senator John Thune's visit to Moreau-Grand's headquarters, Director McLellan being elected to NRECA's board, and Boldt Power helping MGEC purchase used transmission insulators from another cooperative at a significant discount. He focused on Building for the Future, and emphasized how MGEC is building that future one decision, one partnership, and one investment at a time.

Manager Larson highlighted spring of 2025's scholarship winners McKensi Vomacka, Jessa Pederson, and Jordan Jones. He also honored the 2025 MGEC delegate on SDREA's DC Youth Tour, Art Waloke. Manager Larson went on to congratulate the MGEC employees for their stellar safety record, which boasts 308,904 accident-free man-hours, which is six years. He continued with a review of major projects and significant improvements the cooperative has completed in the last 12 months bolstering grid reliability, including pole-testing and adding GPS coordinates to the last bunch of poles in our system, upgrading the Ridgeview

Lois Bartlett's star quilt for 18 years of service

Paul Lawrence's star quilt for 25 years of service (he could not attend)

MOREAU-GRAND ELECTRIC COOPERATIVE CONNECTIONS is published monthly by Moreau-Grand Electric Cooperative, PO Box 8, 823 Main St, Timber Lake, SD 57656-0008, for the members of electric cooperatives across South Dakota. Families subscribe to Moreau-Grand Electric Cooperative Connections as part of their electric cooperative membership. Moreau-Grand Electric Cooperative Connections' purpose is to provide reliable, helpful information to electric cooperative members on matters pertaining to rural electrification and better rural living.

Subscription information: Electric cooperative members devote 50 cents from their monthly electric payments for a subscription.

Nonmember subscriptions are available for \$12 annually. Periodicals Postage Paid at Timber Lake, S.D., and at additional mailing offices.

POSTMASTER: Send address changes to: Moreau-Grand Electric Cooperative Connections, PO Box 8, Timber Lake, SD 57656; Phone (605) 865-3511; Fax (605) 865-3340; e-mail mge@mge.coop; Web site www.mge.coop. This institution is an equal opportunity provider, employer and lender.

Design assistance by SDREA

Annual Meeting Update Continued

transmission line, and installing new equipment on the Dupree GOAB switch, enabling us to isolate outages and restore power faster to the members. He also gave an update on Western Area Power Administration's addition to their substation west of Eagle Butte (where our power for the southern half of our service area comes in).

Manager Larson shared that the cooperative was informed by Basin Electric Power Cooperative and Western Area Power Administration (our power wholesalers) that we will see rate increases in 2026. Moreau-Grand Electric is dedicated to minimizing the amount of the rate increase that will be passed on to members and maintain clear communication with the membership regarding any rate increases. He thanked the membership for their continued support and trust.

Bob and Dorothy Schuh were honored with the 2025 Good Neighbor Award. Their loyalty, dedication, and work ethic are great examples of what makes our membership great.

Employee service awards were presented to Justin Thorstenson (25 years), Josh Lemburg (20 years), Ethan Aberle (5 years), and Kyrie Lemburg (5 years). Directors Lawrence and Keckler received service awards for 25 years each.

Fifteen attendee names were drawn for various prizes:

- Dremel Tool: Merretta Anderson
- Electric Kettle: Craig Lemburg
- \$50 Cash Prize: Nina Zorc
- \$50 Cash Prize: Tom Aberle
- \$50 Cash Prize: Mariah McLellan
- \$50 Cash Prize: Robert Kern
- \$50 Gift Card on behalf of RESCO: Faron Schweitzer
- \$50 Gift Card on behalf of RESCO: Dale McLellan
- Cooler Prize Pack on behalf of NISC: Dudley Reichert
- 40 Can Cooler on behalf of PSE: Patricia Keller
- \$75 Cash Prize: Val Schweitzer
- \$75 Cash Prize: Cindy Biegler
- \$100 Cash Prize: Gary Voller
- \$100 Cash Prize: Lance Willison
- Tabletop Gas Griddle on behalf of Stuart Irby Co.: Norman Hieb

Three member names were drawn for grand prizes:

- \$250 Cash Prize: Carson Grage
- 28-inch Blackstone Griddle: Patricia Kjellsen
- Milwaukee Impact and Drill Kit on behalf of Boldt Power: Jean Tehle

Future member Eleazar Reichert drew the prize-winning names and was presented with a backpack and candy for his help.

Royce Walker (District 1), Cody Jewett (District 2), Dee Ann Lawrence (District 4), and Troy Wall (District 5) all ran unopposed and filled the board vacancies.

Moreau-Grand Electric thanks all members for coming to the meeting and supporting their cooperative. Thanks to Red Earth Table and Country Market for helping to make the meal a success.

LOCATE YOUR ACCOUNT ADDRESS

If you locate your address on any of the inside pages of the Moreau-Grand Electric's *Cooperative Connections*, notify us and you will receive a \$25 bill credit. "Eligible addresses will not be on the front or back cover."

Bob Schuh accepted the Good Neighbor Award (his wife could not attend)

Stay Safe This Holiday Season: Tips for a Merry and Accident-Free Celebration

The holidays bring families together with twinkling lights, festive meals and cozy traditions. But they also bring seasonal risks that can turn celebrations into emergencies if precautions aren't taken. Local safety officials are reminding residents to keep safety in mind when cooking, decorating, and entertaining this year.

Extension Cords

With more lights and electronics plugged in during the holidays, extension cords are often stretched to their limits. Experts urge homeowners not to overload outlets and to replace any cords that are frayed or damaged. Only outdoor-rated cords should be used outside, especially in snowy or wet conditions.

Families should avoid running cords under rugs or across doorways where they can overheat or become tripping hazards.

Turkey Fryers

Thanksgiving and Christmas dinners have grown to include deep-fried turkeys, but safety must come first. Fryers should only be used outdoors, on a flat surface and far away from buildings, garages or wooden decks. Fire officials caution that a partially frozen or wet turkey can cause oil to boil over and ignite, leading to severe burns or home fires.

A fire extinguisher rated for grease fires should always be kept nearby, and fryers should never be left unattended while in use. One distracted moment can cause a disaster.

Ladders

From hanging lights to topping off the tree, ladders are part of the holiday routine. Falls are among the most common seasonal injuries, so ladders should be set on level ground and never leaned against unstable surfaces. Having another person hold the ladder is strongly advised.

Candles and Fireplaces

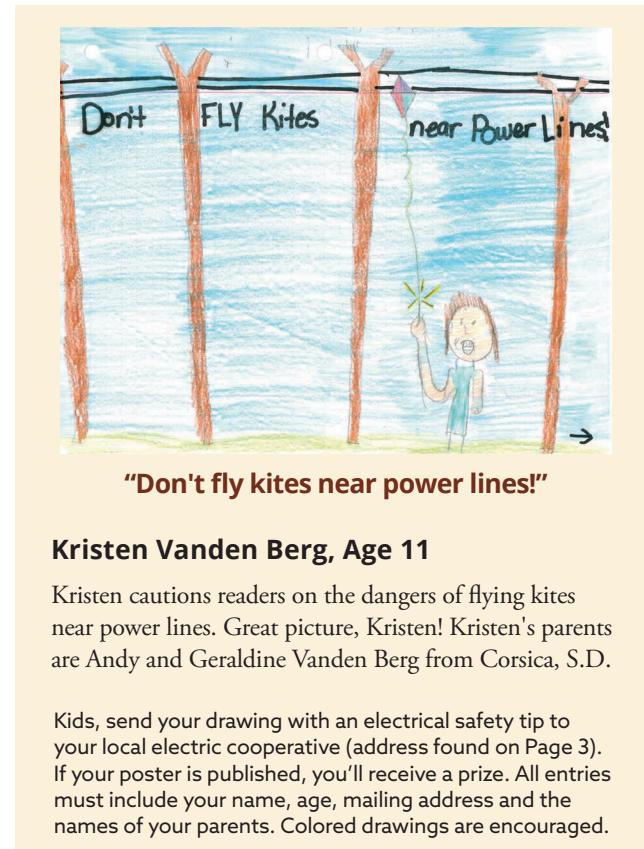

Candles and fireplaces are popular during the holiday season, but they also raise the risk of home fires, especially when combined with the extra decorations and greenery that fill many homes in December. According to the National Fire Protection Association, candles cause an average of

46% of fires in December each year. Never leaving a flame unattended and incorporating a few safety rules can prevent a devastating fire.

Lights and Decorations

Before hanging holiday lights, inspect strands for cracked socket, frayed wires or loose connections, and replace any damaged sets. Outdoor lights should always be weather-rated, and lights should be turned off before bedtime or when leaving the house. Timers and smart plugs can help make this easier.

Decorations should be securely fastened to prevent them from tipping or falling, especially in homes with children or pets. Heavy ornaments should be placed higher on the tree, out of reach of small hands and wagging tails. Fire officials also recommend choosing flame-resistant or non-combustible decor whenever possible and keeping all decorations away from heaters, fireplaces or open flames.

Kristen Vanden Berg, Age 11

Kristen cautions readers on the dangers of flying kites near power lines. Great picture, Kristen! Kristen's parents are Andy and Geraldine Vanden Berg from Corsica, S.D.

Kids, send your drawing with an electrical safety tip to your local electric cooperative (address found on Page 3). If your poster is published, you'll receive a prize. All entries must include your name, age, mailing address and the names of your parents. Colored drawings are encouraged.

Holiday SIDE DISHES

CORN CASSEROLE

Ingredients:

2 15 oz. cans whole kernel corn, drained
15 oz. can cream corn
1/2 cup butter, melted
1 box Jiffy cornbread mix
1/2 pt. whipped cream

Method

Combine whole kernel corn, cream corn, butter, Jiffy cornbread mix and whipping cream. Mix thoroughly. Pour into greased 8.5" x 11" pan and bake at 350° F for 40-45 minutes.

Sharon Houchin
Central Electric

BETTER THAN STUFFING

Ingredients:

1 box chicken/turkey stuffing mix
Chicken broth
Celery
Carrots
Onions
1 stick herbed butter (or make your own)
2 cups chicken/turkey gravy

Method

Prepare stuffing according to directions but substitute water with broth. Dice and sauté celery, carrots (total of two cups) and onions in herbed butter. Fold into stuffing. Put into baking pan and top with gravy. Poke gravy into stuffing – just a little bit. Don't completely mix. Bake at 350° F for 20 minutes and broil briefly at the end.

Valerie Marso
Oahe Electric

RAW VEGETABLE SALSA

Ingredients:

2-4 medium cucumbers, cubed
2-4 medium tomatoes, cubed
1 small onion or 1/2 of a white or yellow onion sliced
1 tsp. salt
1 tbsp. sugar
2 tbsps. apple cider vinegar
Additions: black pepper to taste, chopped basil, or chopped green bell pepper.

Method

Place cubed tomatoes and peeled cucumbers into a bowl. Add sliced onion.

Mix in remaining ingredients and stir. Marinate for several hours or overnight.

This salad keeps for 3-4 days refrigerated.

Raw Vegetable salads full of electrolytes, vitamine C and fiber.

Laurie Wernke
Southeastern Electric

Please send your favorite recipes to your local electric cooperative (address found on Page 3). Each recipe printed will be entered into a drawing for a prize in December 2025. All entries must include your name, mailing address, phone number and cooperative name.

Prep Now for Winter Savings

Miranda Boutelle
Efficiency Services
Group

Q: What can I do now to manage my winter energy bills?

A: You'll be thankful you prepared in the fall for colder weather when you receive your first winter bill. Just as you pull out your winter gear before you need it, prepping your home for the coming season is a great idea.

The following steps can be taken now to use less energy at home before the winter chill sets in. They also help lower strain on the electric grid during extreme winter weather when energy use is at its peak in your community.

First, let's consider your home's layers. Just like layering up those winter flannels, fleeces and down jackets with waterproof, wind-stopping shells, gloves and hats, your home needs layers, too. Air sealing and insulation protect your home from the elements while locking in the warm air to keep you cozy. The same applies to hot weather, making air sealing and insulation a year-round efficiency upgrade.

To offset the costs, federal tax credits for energy efficiency upgrades are available through Dec. 31, 2025. Homeowners can claim a total of 30% of the cost of installation, up to \$3,200. Tax credits are available for insulation, heat pumps, air conditioning systems and more. There's even a tax credit for electrical panel upgrades, which might be needed to accommodate new energy efficient equipment.

There's also a \$150 tax credit for an energy audit, which allows a pro to help determine what your home needs and how to prioritize potential projects. Visit [energystar.gov](https://www.energystar.gov) for more information.

When it comes to do-it-yourself projects, there are a few upgrades you

can take care of yourself. Lock in savings with window cleaning and maintenance. Make sure sash locks and window cranks are in good working order and cleaned of any dirt and leaves. Debris can keep them from closing snugly. I find the crevice tool attachment on my vacuum cleaner, combined with a small, dry scrub brush or an old toothbrush, works great. The locks should pull the top and bottom window sashes together tightly. For casement windows, the locks should pull the window tightly to the frame.

Although it might not seem like a significant difference, reducing airflow through and around windows can make your home more comfortable in the winter. Replacing broken or nonfunctional sash locks can be a reasonable DIY project, but it's best to avoid doing it when the winter winds are blowing. Also, use caulk to seal all gaps around the window trim. If you have operable storm windows, make sure they close.

If you have a forced-air heating or air conditioning system, replace the filter. First, turn the system off to check it. If your filter is dirty, leave it in place until you have a replacement. Running your system without a filter can send any dust or dirt in the ductwork directly into the components and damage your equipment. Make a note of the filter's size on your shopping list or take a picture of the filter with your phone so you can reference it when running errands.

Also, stocking up on filters can save you money. I bought a 12-pack of filters for \$72 – \$6 each. A similar filter sold separately was \$10. Don't see a bulk pack at your local hardware store? Ask at the customer service desk. They may be able to order them for you.

This fall, look for opportunities to protect your home from the elements and maintain your equipment before the cold of winter.

HUNTER'S SAFETY

Co-op employees get involved in HuntSAFE

Frank Turner

frank.turner@sdrea.coop

For more than 10 years, West Central Electric Cooperative Staff Engineer Kit Talich has volunteered with the HuntSAFE program in his hometown of Murdo. Run by South Dakota Game, Fish and Parks with help from local instructors, HuntSAFE teaches young people how to hunt both safely and ethically.

Just last month, Talich was in front of a class at Jones County Elementary School, holding a specially modified firearm designed only for demonstrations. The training guns have no firing pins, but the lessons carry real weight as Talich taught sixth-grade students how to cross a fence safely, keep a muzzle pointed in the right direction and always treat a firearm as if it is loaded.

"I went in for a year or two just to help out," Talich recalled. "Then I took the instructor exam and got certified in 2015, and I've been teaching ever since."

HuntSAFE is designed for youth hunters in South Dakota. In order to hunt under certain youth tags, students must first complete the program and earn their HuntSAFE card. The course covers everything from basic firearm mechanics to safe handling, outdoor ethics and wildlife conservation.

"It's about 10 to 12 hours of classroom in-

struction, plus a field day," Talich explained. "We go over the book material, but then the kids also have to handle firearms, cross fences, shoot clay pigeons and demonstrate that they understand the safety rules."

Talich said his co-op's culture of community commitment has always made volunteering possible.

"The co-op has always been very supportive," Talich said. "They've encouraged me to take time out of my day to help with the program. Everyone's on board with safe hunting and safe handling of firearms. It fits right in with the cooperative principle of concern for community."

While many of the students go on to hunt deer, pheasants or other game, Talich emphasizes that HuntSAFE is about more than just filling a tag.

"A lot of these kids may never go hunting, but living in rural South Dakota, chances are they'll be around firearms at some point," he said. "The most important thing is that they know how to safely handle a firearm or that they have the confidence to speak up if someone else isn't handling one safely."

In the safety course, Talich often highlights four core safety rules: always treat every gun as if it is loaded, always point the muzzle in a safe direction, keep your finger off the trigger until ready to shoot, and be sure of your target and what is beyond.

HuntSAFE volunteer instructors, from left, Kit Talich, Derek Wolf and Greg Miller, demonstrate proper gun safety during a HuntSAFE course.

Not pictured is instructor Mike McKernan.

Photo by Frank Turner.

"If you follow those four, the chances of anyone getting hurt are very, very low," he said. "It's rewarding to watch them learn and take it seriously. And it's rewarding to know they're taking those lessons home – sometimes even teaching their younger siblings or cousins what they've learned."

After nearly two decades at the cooperative, Talich is preparing to join Sioux Valley Energy — a career move that also means stepping away from his role in the HuntSAFE classroom. To ensure the program continues, another West Central Electric employee is ready to take his place. Derek Wolf, who has already been helping in the classroom alongside Talich, said he is thrilled to continue representing West Central Electric in the program.

"I just grew up around hunting and firearms, and I think it's a neat program for kids to be involved in," Wolf said. "Whether they end up hunting or just knowing gun safety, I think it's huge. Obviously, Kit's been doing it a lot of years, and he saw I was interested. With him stepping out, it just made sense to step in."

Looking back at 10 years of volunteering, Talich said he is glad to see another co-op face step forward to champion gun safety.

"It's important to me that the program keeps going strong," Talich said. "It's good to know there are people like Wolf who are willing to step up and carry it on."

CARING FOR CAREGIVERS

**Exploring Structured Family
Caregiving Services for
South Dakota's Caregivers**

Frank Turner

frank.turner@sdrea.coop

November is recognized nationally as Family Caregivers Month, a time to honor the essential role of caregivers and highlight the resources available to them and the loved ones they support.

Yet, families face a growing challenge: how to care for aging loved ones when services are often far from home. Nursing homes or assisted living centers may be located hours away, and even when they are nearby, the cost or availability of space can present real barriers.

One answer has been the Structured Family Caregiving program, launched by the South Dakota Department of Human Services (DHS) in 2019.

According to Heather Krzmarzick, Director of the Division of Long-Term Services and Supports within DHS, the program is one of many resources at DHS that are

available to help older adults and their caregivers. It provides training, coaching, ongoing support and even a modest stipend to those offering significant care for an older adult in the home.

“Structured Family Caregiving serves caregivers who live with their family member and provide substantial care for them, including personal care, supervision, medication management and other things, such as managing finances and transportation for necessary appointments and community activities,” Krzmarzick said.

In many ways, the program echoes the electric cooperative story. Just as co-ops once brought electricity to rural areas that were otherwise overlooked, the program helps families meet a need that might otherwise go unserved. In places where nursing homes or assisted living centers are many miles away, the program gives families a practical way to continue care at home, often the place where people feel most comfortable.

“Structured Family Caregiving is important because it

supports the vital work of family caregivers, strengthens families and improves outcomes, especially in underserved or isolated regions,” she said. “The program honors South Dakota’s values of strong families, independence and community.”

In addition to expanding community-based care options to rural areas, the program allows families to potentially prevent or delay the move to a nursing home and reduce the economic burden that often comes with that transition. Krzmarzick said DHS also offers other programs for those that may need a little extra assistance to remain safely in their homes but don’t require the intensive services of a nursing facility.

“Each caregiver has unique needs and preferences,” she said. “As such, the services and supports are designed to meet the varying needs of each caregiver and help care for a person at home as long as possible.”

To be eligible for the program, the care recipient must be 65 or older or

18 or older with a qualifying disability and meet both functional and financial criteria to qualify for the program.

Since its creation, the program has grown steadily, giving more families the tools to succeed. Krzmarzick said it has allowed many older adults and adults with disabilities to remain in their homes while supporting family caregivers with knowledge, training and a small amount of financial assistance.

Agency Director Steven Novotny with Homecare Services of South Dakota, Inc., one of many in-home care providers in the state, said that few other programs reach and serve those who need care quite like the program.

“Structured Family Caregiving has the unique ability to serve consumers in every community across our state, large or small. Under this program, individuals can receive care from a trusted family member or friend, which allows them to remain independent and living in their community,” he said. “Our caring staff at Homecare Services of South Dakota have seen

firsthand the positive impact on families when we are able to provide support and training to the caregivers that are stepping into what is often a challenging role caring for a loved one.”

Krzmarzick said the Structured Family Caregiving program is just one of many support options that DHS offers individuals and their caregivers in South Dakota. Resources are available online at dhs.sd.gov or through Dakota at Home, South Dakota’s Aging and Disability Resource Center, at 1-833-663-9673.

“All caregivers, not just those utilizing the Structured Family Caregiving Program, may access free training and resources to help improve confidence in their caregiving abilities, reduce stress and prevent burnout,” Krzmarzick said. “Caregivers may also be eligible for other programs that offer respite options. Our Dakota at Home specialists are dedicated to helping you find services and supports to meet your specific needs or the needs of a family member.”

Sept. 16, 2025 Board Meeting Minutes and July 2025 Financial Information

The September 16, 2025, board of directors' meeting was held at the Timber Lake office with the following directors present: Clark, Hahne, Keckler, Lawrence, Maher, McLellan, Schweitzer, Walker and Wall, director absent: Bartlett, and others present: Manager Larson and Finance Officer Lemburg (Delegated Recorder of Minutes).

The Large Power Users monthly report was given by Stephanie Bartlett, which included large power usage and payments.

The Member Services report was given by JJ Martin, which included new computer installations are complete, the 2025 annual meeting theme is "Building for the Future," presented annual meeting materials, annual meeting director work schedule, update on the interview with the Good Neighbor Award recipients, and annual meeting prizes.

The Operations report was given by Josh Lemburg, which included an update on the Ridgeview transmission line repairs, Highway 63 transmission line road move update, future Highway 63 north road move project, and contracted ANCO to complete bores and replace underground line.

Manager Larson provided an update on the WAPA substation upgrade and stated that breaker 1552 runs west of Eagle Butte and breaker 1752 runs east of Eagle Butte. Breaker 1552 is temporarily out of service. Therefore, the entire southern half of MGEC's service territory is on one breaker while WAPA continues its upgrades.

Manager Larson gave the Manager's report, which included the old headquarters facility is demolished and the area is cleaned up, some MGEC employees helped with the Freshman Impact program at the Timber Lake School, removed a switch from the WAPA substation and will try to sell it, all employee meeting, staff meeting, payroll as a percent of gross expenses, Power System Engineering is compiling information for the rate increase in 2026, financial update, compiling a preliminary 2026 budget, and Grand Electric will host a Legislative Forum in Faith later this year.

The Mid-West Electric annual meeting will be held December 9-11, 2025, in Denver. President Maher, Director Wall and Manager Larson expressed interest in attending.

President Maher and Director McLellan gave the SDREA Board Leadership Summit report, which included good roundtable discussions, and directors should provide resources to their manager and be confident in their decisions when they vote on a matter.

President Maher and Director McLellan gave a report on attending East River Electric's annual meeting, which included a good member turnout and Basin Electric personnel also attended.

Board approved the following: the agenda, the minutes from the August meeting, new members, refunds, line extensions, financial statistics, disbursements, and safety report.

The next board meeting was scheduled for October 21, 2025, at 8:30 a.m. in the Timber Lake office. PO Box 331 Dupree, SD 57623

"God Has His Hand in Everything, You Know."

If one had to say what Bob and Dorothy Schuh's generation has that younger generations don't, it would most likely be grit. Coming from a time when everyone on the farm pulled their weight from a young age, both Schuhs learned the value of hard work and have never forgotten it.

Dorothy Schuh grew up on a farm 18 miles south of Morristown. Being a young child when her family's farm was electrified, Dorothy remembers getting electricity, but not living without it. "When the power went out, we had kerosene lanterns that we used during a power outage, but I don't remember using them before we had electricity." As the eldest of four, Dorothy was incredibly busy working on the farm with her mother. "There was always work to do -- milking cows, feeding pigs, feeding calves...hauling water in, hauling water out. Hauling coal in, hauling clinkers out. I don't really remember playing much."

Bob Schuh grew up just north of his grandfather's homestead (where they live now) north of Isabel. As his wife said,

"Robert's been there his whole life."

Bob summarized the value of electricity with a memory, "It was time to take a bath in this little washtub, and you'd lean against the back of it that it would be so cold. I remember how nice it was to get electricity and get running water to the house and a water heater."

He recalls the winter of '96-'97, which lives in infamy in our region. Bob woke up at 2 in the morning and noticed that his house was cold. He started his tractor and hooked up his generator. The blizzard was so bad that he called Moreau-Grand in hopes that the linemen were working on the outage already. Turns out, they had been working on just getting out of Timber Lake for an hour by that point. Thinking it was going to be a long time without power, Bob was shocked when his lights came back on only a couple of hours later. "I remember how grateful I was that we had people like you, restoring our power and going out in those kinds of conditions. It was all I could do to go from the house to my shed..."

Bob went on describing what happened when power was being built out to his family farm when he was a child.

"When the power came through, they dug the hole for the yard pole. I was about five years old, and I was so infatuated with that hole that I ended up kind of filling it up with the dirt that was around it, so I could get in the hole and still get out. I'm sure the power guys didn't appreciate that. My mother was washing clothes in the basement with a little gasoline engine on the washing machine and looked out the window. She said, 'Oh, the power company is here, and they have post hole diggers that are digging out the dirt that you put in that hole.' I was pretty good for a while because I didn't want my mom to send me out there to apologize."

During the summer after Dorothy's sophomore year in Aberdeen and Bob's freshman year at Black Hills, they met at a dance at the Glad Valley country school. "There happened to be a dance there one night. Dorothy was there with some friends, and I went there with some friends. I saw this lady standing off to the side there with a pretty dress on, and I thought I'd ask her to dance. It was just kind of history after that," Bob explained.

After a couple of years, they started writing back and forth. Dorothy added, "He was teaching in Dupree, and I was teaching in Minnesota. We finally decided if we are going to make a life together, we better live a little closer together, so I got a job in Dupree and taught a year before we got married. God has his hand in everything, you know."

They both taught in Dupree for a couple more years before moving out to the farm full time. At first they raised pigs, but moved to dairy farming in 1977. After depending on an "incompetent generator" to cool the milk for a while, they were happy to pay for the electricity to do the job. "The milk check was bigger than the power check!"

The grit and hard work the Schuhs learned in their youth has served them well. Shining examples of what makes our membership great, Bob and Dorothy Schuh are the 2025 Moreau-Grand Electric Good Neighbors.

LINEMENS' TRAINING READIED CREW FOR CHAINSAW ACCIDENT

When a Routine Day of Trimming Trees Turned Critical, Cooperative Employees Were Prepared to Help

Jacob Boyko

jacob.boyko@sdrea.coop

Perched within the manlift on a bucket truck, Brandon Schmieg methodically sawed away large tree branches near overhead power lines, dropping them to the ground more than 50 feet below.

It's nothing out of the ordinary, explained the 19-year veteran lineman from Whetstone Valley Electric Cooperative in Milbank, South Dakota. After a while, you become accustomed to the work – and its hazards.

From the bucket he was standing in, Brandon reached with

his chainsaw for one of the last few cuts he'd need to make. But as he began the cut, the chainsaw kicked up and he lost control. Steadying himself and throwing the brake on the saw, Brandon looked down at his left arm. He'd been badly cut.

"I saw quite a bit of blood right away," Brandon said. "My first thought was that I needed to get down fast."

Gathering his strength and trying his best to stay calm, Brandon maneuvered his bucket down through the tree limbs back to the ground where linemen Brian Davis, Luke Koval and Tristan Hall noticed something wasn't right.

"I think we all sensed something happened," Brian explained. "The way he was coming down like that, and he'd just fueled up the saw, so we were wondering what had happened."

Luke ran to go shut off the woodchipper, which was drowning out Brandon's yelling. As the engine died, they finally heard Brandon yell, "Call for help!"

(From left) When Brandon Schmieg cut his forearm, fellow linemen Tristan Hall, Luke Koval and Brian Davis knew exactly how to respond. *Photo submitted by Whetstone Valley Electric Cooperative.*

Brian raced to the truck to radio back to the office in Milbank, calling in a "Mayday" along with the crew's location.

With a first-aid and tourniquet kit in hand, Brian sprinted toward Brandon, where Tristan and Luke had removed Brandon's safety harness and wrapped a towel over the wound on Brandon's forearm and applied pressure to slow the bleeding.

As the team secured a tourniquet tightly around Brandon's upper arm, the crew kept in touch with the office by cell phone. The office staff, having called 911 as soon as they heard 'Mayday,' worked together to relay the street address and details of the injury to emergency dispatchers.

Seeing the urgency of the situation, the team placed Brandon in the service pickup and Tristan began driving him to the hospital. As the linemen were driving back into town, the ambulance met them and took Brandon to the hospital in Milbank where they stabilized him and discovered he'd severed two arteries in his forearm. He was then transferred to

Sioux Falls and underwent surgery.

Luckily, Whetstone Valley Electric and the South Dakota Rural Electric Association had conducted first-aid training for linemen just several weeks before. The instruction included CPR, AEDs, tourniquets and wound care.

"Regular first-aid training and keeping first-aid supplies on hand is so important because our linemen are often out somewhere rural," explained Joe Denison, SDREA's loss control professional and certified paramedic for the Arlington and Lake Norden ambulances. "If we have to wait 30 minutes for an ambulance, that can be too late."

Whetstone Valley Electric General Manager Dave Page says despite the incident, he finds it encouraging that the employees followed procedure — maintaining clear communication with each other and with 911, administering first aid on site, and knowing exactly what to do each step of the way.

"It wasn't only the training that was provided, but it was the attention that

these guys gave to that training - where it stuck, and their response was automatic," Dave said. "In addition, the Mayday training that we do here at Whetstone went a long way to help us all stick to the plan and see a successful outcome."

Now back on the job, Brandon credits his safe outcome to the co-op's focus on regular safety training and having first aid supplies in the vehicles.

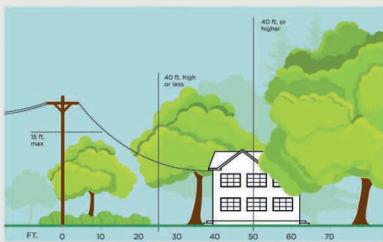

"I don't think the makeshift towel tourniquet would have stopped the bleeding," Brandon said, looking down at the scar on his forearm.

Brian added, "I don't want to think about the outcome if we didn't have a plan in place."

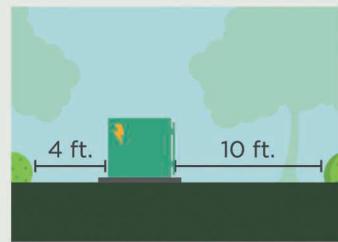

To help prevent those worst case scenarios, electric cooperatives continually scrutinize safety training and workplace incidents. Whetstone Valley Electric Cooperative is sharing this story with its members-owners and fellow cooperatives to promote preparedness for unexpected incidents like this one, and overall encourage a culture of safety awareness.

3 Ways to Help Limit Tree Trimming

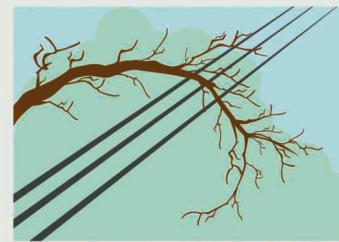

1. Plant trees in the right place. Trees that will be <40 ft. should be planted at least 25 ft. away from power lines (>40ft. should be at least 50 ft. away).

2. Don't block pad-mounted transformers. Plant shrubs at least 10 ft. away from transformer doors and 4 ft. from transformer sides.

3. Report dangerous branches. If you spot a tree or branch that is dangerously close to power lines, please let us know.

Trimming improves safety for all.

Let's work together to enjoy the beauty of trees and reliable electricity.

SUSTAINABLE SERVINGS

Frederick-Area Family Grows, Packages Specialty Oatmeal

Jacob Boyko

jacob.boyko@sdrea.coop

For Taylor and Cassandra Sumption, there's nothing better than waking up early and enjoying a bowl of their very own home-grown oatmeal.

Well, maybe nothing better except sharing that taste of small-town South Dakota with the world.

Living and working on their five-generation family farm in northeast South Dakota, the Northern Electric Cooperative member-family dreamed, developed and launched Anthem Oats, which they say is a farm-to-table alternative that oatmeal enjoys can feel good about.

But Anthem Oats isn't just a locally-sourced breakfast; it's a process rooted in sustainability.

The Sumpsons' small-business journey began in 2016 when Taylor decided to replace his usual wheat cover crop with oats in his corn and soybean rotation.

"I'm kind of a nerd when it comes to crop rotation," Taylor laughed. "I started working with the USDA research farm north of Brookings, and they do a lot of rotational studies ... What I saw was a tremendous increase in yield for crops following oats."

Those increased yields are a result of the oats recycling nutrients like nitrogen, potassium and phosphorus back into the soil. Oats also increase the amount of arbuscular mycorrhizal fungi in the soil, which the USDA says helps roots intake more nutrients and moisture, making oats an ideal

This field of oats on Taylor and Cassandra Sumpsons' farm near Frederick, S.D., will soon be milled and packaged for their oatmeal brand, Anthem Oats.

cover crop to boost the next season's returns.

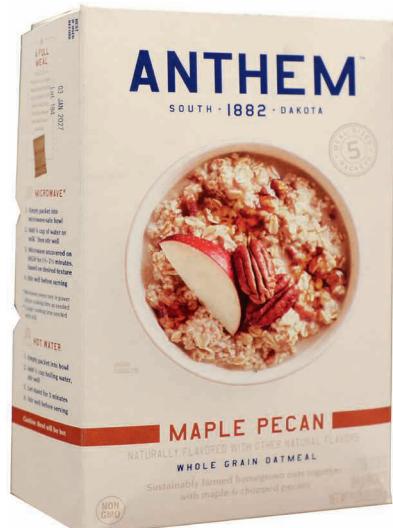

But an oat harvest doesn't bring in the same returns that corn and soybeans do – that had Taylor Sumption thinking about ways to add value to his product.

"It was Taylor's idea from the very beginning, from years and years ago, after many long hours in the tractor thinking about how to bring added value to our farm," Cassandra recalled. "And I loved his ideas. He would just kind of bounce things off me every now and then."

One day, it clicked in Taylor's head; he could add value to his oat harvest by producing a one-of-a-kind, high-quality breakfast product.

Taylor got in contact with the South Dakota Value-Added Agriculture Development Center (VAADC), whom he credits for helping navigate the first steps in starting the business.

Maple Pecan is one of Anthem Oats' top-selling flavors. Among other flavor options: pumpkin spice, vanilla chai, peach and cranberry, super fruit, and dark chocolate brownie.

Taylor and Cassandra Sumption sell their home-grown oatmeal in stores across the US.

Photo submitted by Cassandra Sumption

VAADC CEO Cheri Rath says Anthem Oats is one of the center's many success stories, and credits the Sumptions for coming up with a marketable idea and running a sustainable business.

"Anthem Oats takes a traditional commodity and adds value to it, helping their farm diversify and add profitability at a time when commodity prices are volatile," Rath said. "They've done an awesome job of branding themselves and getting out into the marketplace."

According to Taylor and Cassandra, feedback from customers has been overwhelmingly positive, with some customers noting that Anthem Oats' subtle differences have distinguished the brand from competition.

"When selecting our oat variety was we focused on nutrient density and nutritional value," Taylor explained. "Our oats mill a little tougher, but there's a little more flavor and a little more body. Consumers can tell when it's our oats."

Cassandra, now a full-time Anthem Oats employee, oversees the product from the harvest to the shelf, and everything in between. It's an around-the-clock job, and one she had to learn fast.

"I didn't have a clue – this was all so new to me," Cassandra laughed, thinking back to when she first jumped into the role. "I did manage a grocery store in Frederick here for a short time, so that kind of helped me with the logistics of shipping and freight and different things like that."

Today, after more than four years on the market and a continuously growing presence in grocery stores, the Sumption family has unofficially put Frederick on the map as the oatmeal capital of South Dakota.

Cassandra and Taylor also credit their five children, Trevor, Tristan, Preston, Miranda and Marissa for taking time out of their busy lives to help out when they're able, as the family works to build a brand that resonates with consumers in South Dakota and beyond.

"I get to answer all the emails, like all of the consumers' questions, and sometimes there's a complaint, but overall everybody is very kind and sweet in their messages," Cassandra said. "It helps make your day a little brighter, knowing that you're doing something that people actually really appreciate and love, and it just makes you feel good at the end of the day and keeps you going."

What Is the Value-Added Agriculture Development Center?

VAADC is a nonprofit that provides resources for the establishment and success of value-added agricultural businesses.

What Does Value-Added Mean?

When farmers add value to their product, it means they are taking a raw commodity and processing, marketing or otherwise enhancing so it can be sold at a higher price. The Sumption family adds value to their oat harvest by milling, packaging and distributing their product.

What Does VAADC Offer to Start-ups?

VAADC can assist start-ups with feasibility assessments, business plans, grant and funding opportunities, strategic planning and networking. VAADC has assisted more than 300 projects since its founding in 1999.

Who Is VAADC?

VAADC was started by agriculture industry supporters to support producers. VAADC is governed by a board of directors representing the South Dakota Rural Electric Association, East River Electric, Farm Credit Services of America, S.D. Association of Cooperatives, S.D. Bankers Association, S.D. Farmers Union, S.D. Soybean Research & Promotion Council, and the S.D. Wheat Commission.
