COOPERATIVE UPDATE

When deciding what to write for my monthly column – I would be remiss if I didn't focus on the two winter storms that ravaged through our service area in December.

Melissa Maher
Manager

The first of the two took place the week of December 12th. Freezing rain in December puts us in a fragile position as the power lines get covered with ice – followed by heavy wet snow and severe northwest winds which blew for multiple days. While not recovered from this event – the second storm came a week later with much more snow, severe cold temperatures and wind speeds bringing wind chill numbers to a numbing -60 below zero

range. Roads blocked; drifts were high; and conditions were tough. There were members without power during these storms – some longer than others. Fortunately – the weather conditions didn't take any of our plant down – just compromised it.

As I attempt to try and explain each outage or situation – it occurs to me that the most important thing to talk about is the people. Your employees show up when the going gets tough – they rise to the occasion. Several out-of-town employees found places to stay – so they could report to work. Linemen weather the conditions and roads to do what they can to bring power back to our members. Kent Larson, Operations Superintendent – is stellar in emergency situations – he stays calm while directing the crews through plans of restoring power.

Our members also become heroes in these situations – moving snow for us to make repairs, moving snow to assist our crews in getting to and from work. Our members accept the conditions as they are – they formulate a plan to manage without electric – they patiently wait for us to get their electricity back on and graciously thank us for doing so.

I want to use this opportunity to give a shout out to

Brock Fischer who was promoted to Journeyman Lineman status this past November. This is quite an accomplishment to become a Journeyman Lineman. Brock received a degree from Power Lineman school at Mitchell Tech prior to coming to work here at Moreau-Grand. Once employed – Brock was then enrolled in the Northwest Lineman College where he completed tests over a four-year period with a final test taken at the end of each year's course. In addition – he had to document over 8,000 hours of service to complete the requirements. Help me congratulate Brock on becoming a Journeyman Lineman for Moreau-Grand Electric Cooperative. He continues to make us proud!

I'm again reminded why I love where I live – it's about the people and not the weather.

God Continue to Bless our Cooperative in 2023....

Jamie Jones, Accountant

MOREAU-GRAND ELECTRIC COOPERATIVE CONNECTIONS is published monthly by Moreau-Grand Electric Cooperative, PO Box 8, 405 Ninth St., Timber Lake, SD 57656-0008, for the members of electric cooperatives across South Dakota. Families subscribe to Moreau-Grand Electric Cooperative Connections as part of their electric cooperative membership. Moreau-Grand Electric Cooperative Connections' purpose is to provide reliable, helpful information to electric cooperative members on matters pertaining to rural electrification and better rural living.

Subscription information: Electric cooperative members devote 50 cents from their monthly electric payments for a subscription. Nonmember subscriptions are available for \$12 annually. Periodicals Postage Paid at Timber Lake, S.D., and at additional mailing offices.

POSTMASTER: Send address changes to: Moreau-Grand Electric Cooperative Connections, PO Box 8, Timber Lake, SD 57656; Phone (605) 865-3511; Fax (605) -865-3340; e-mail mge@mge.coop; Web site www.mge.coop. This institution is an equal opportunity provider, employer and lender.

Design assistance by SDREA

Dec. 20, 2022 Board meeting minutes and Oct. 2022 financial information

The December 20, 2022, board of directors' meeting was held at the Timber Lake office with the following directors present: Bartlett, Clark, Hieb, Keckler, Landis, Lawrence, Maher, McLellan, Walker and Wall, and others present: Manager Maher, Finance Officer Dahlgren, Accountant Lemburg (Delegated Recorder of Minutes) and Attorney Burke.

The Large Power Users monthly report was given by Stephanie Bartlett, which included topics on large power usage and payments.

The Member Services report was given by Roger Lawien, which included scholarships, stock show, SmartHub statistics, Timber Lake Office phone issues, assisting engineers with reporting, Rushmore Electric advertising meeting, computer repairs, SDREA Metering School video, Cooperative Connections article suggestions, winter storm outages, cybersecurity, SDREA Director of Communications Billy Gibson retiring and an ACRE video.

The Operations report was given by Kent Larson, which included winter storm outages and the importance of emergency personnel working together.

Manager Maher gave the Manager's report, which included Apprentice Lineman Brock Fischer becoming a Journeyman Lineman, Power System Engineering presentation on federal funding available, new headquarters facility estimated costs, FMG Engineering quote on concrete testing for the new headquarters facility, SDREA annual meeting will be held January 12-13, 2023, in Pierre, Basin Electric members only annual meeting will be held January 26, 2023, via Webex, inquiry from Next Grid Collaborative for crypto mining and thank you note.

Manager Maher presented the 2023 Budget and Work Plan to the Board.

The Board discussed and paid their 2023 ACRE membership dues.

The Board discussed and completed their Conflict-of-Interest Surveys that are required annually for IRS Form 990.

Director McLellan gave the SDREA Board meeting report, which included Manager Maher's presentation of MGEC to the SDREA Board, Whetstone Valley Electric Cooperative overview, Basin Electric report, membership dues paid to the SD Windy Energy Association, Steve Barnett is the new Manager, Director of Communications Billy Gibson retiring, pledge to Value-Added Agriculture Development Fund and policy changes.

The Directors who attended the BLC training courses gave a report, which included conducting effective meetings, it was the consensus of the Board that MGEC's meetings are conducted well and cybersecurity.

Director Lawrence gave the Rushmore Board meeting report, which included financial reports, Basin Electric capital credit retirement, Revenue Deferral for Basin Electric bill credit, renewed contract with attorney, Rushmore Electric representative on the SDREA board, load forecast and update on cooperatives within Rushmore Electric.

Board approved the following: the agenda, the minutes from the November meeting, new members, refunds, line extensions, financial statistics, disbursements, safety report, 2022 write-overs in the amount of \$7,843.61, 2023 Budget and Work Plan, CoBank Resolution of the Board of Directors and Incumbency Certificate, sending Director McLellan to the NRECA annual meeting March 5-8, 2023, in Nashville, TN, and Manager and inside employee wages for 2023. *14249

The next board meeting was set for Jan. 16, 2023, at 8:30 a.m. in the Timber Lake office.

OCT. 2022 FINANCIAL INFORMATION			
	OCT. '22	OCT. '21	YTD 2022
Operating Revenues	\$955,589	\$908,834	\$10,630,014
Cost Of Power	\$414,948	\$444,127	\$5,253,694
Cost Of Electric Service	\$894,880	\$919,605	\$10,344,379
Margins	\$74,209	\$(7,496)	\$435,739
Kwh Purchased	7,896,687	7,925,160	91,023,643
Kwh Sold	7,204,975	6,662,618	83,979,479

Check out this handy electrical fire check list

Electrical Fires do not have to happen. Use this checklist to help you find and fix electrical fire hazards in your home before they can start a fire.

Smoke Alarms – Smoke alarms save lives!

- ✓ Do you have enough smoke alarms?
- ✓ Are they working?
- ✓ Do you test them?

Switches and Outlets – Be on the look-out for signs of trouble.

- ✓ Are they working?
- ✓ Do they make crackling, buzzing, or sizzling sounds?
- ✓ Are they warm to the touch?
- ✓ Do plugs fit snugly?

Cords – Never use damaged cords.

- ✓ Is there fraying or cracking?
- ✓ Are they pinched or pierced?
- ✓ Do you use extension cords all the time?
- ✓ Are cords getting enough air?

Lamps and Appliances – Use them safely.

- ✓ Are you using the right bulbs?
- ✓ Do you use space heaters safely?
- ✓ Are appliance cords protected from damage?

Electrical Panel – Know the basics.

- ✓ Do you have AFCIs?
- ✓ Have you tested your AFCIs?
- ✓ Are all circuit breakers and fuses the proper size?

KEEPING UP WITH ELECTRIC METERING TECHNOLOGY

South Dakota's electric cooperatives recently held an electric meter school in Pierre where more than 45 co-op employees learned about the latest technology in residential and industrial kilowatt hour metering processes. Metering is a key component of providing reliable, safe and affordable power to cooperative members all across the state.

To view scenes from this important training program and learn more about how electric cooperatives work to improve our communities, visit Cooperative Connections Plus by scanning the QR code at right.

Take care when flying kites

Jaclyn Koistinen

Jaclyn Koistinen, 11, is already thinking ahead to spring when kite-flying is a popular activity. She warns kids and adults both to take care when putting that kite in the air. Jaclyn is the daughter of Patrick and Jenilee Koistinen, members of H-D Electric based in Clear Lake.

Kids, send your drawing with an electrical safety tip to your local electric cooperative (address found on Page 3). If your poster is published, you'll receive a prize. All entries must include your name, age, mailing address and the names of your parents. Colored drawings are encouraged.

BRUNCH SWEET BRUNCH

CRAB QUICHE**Ingredients:**

- 1 (6 oz.) can crab meat (rinsed and drained)
- 1 c. shredded cheddar cheese
- 1/4 c. chopped green onion (or fresh chives)
- 4 eggs.
- 1/2 tsp. salt
- 1 tsp. dry mustard
- 1 c. milk (or half-n-half)

METHOD

Grease or spray pie pan. Combine crab, cheese and onion. Press into pie pan and up the sides. Whisk together the milk, eggs, salt and mustard. Pour mixture into pan. Sprinkle with paprika. Bake in 400 degree oven about 30 minutes or until set. Let set 5 minutes before cutting and serving.

Elaine Rowett, Sturgis

PRALINE PECAN CRUNCH**Ingredients:**

- 1 (21 oz.) box Quaker Oat Squares cereal (about 8 c.)
- 2 c. pecans
- 1/2 cup packed brown sugar
- 1 tsp. vanilla
- 1/2 c. light corn syrup
- 1/4 c. margarine
- 1/2 tsp. baking soda

METHOD

Heat oven to 250 degrees. Mix cereal and pecans in 9x13 inch pan. Set aside. Mix corn syrup, brown sugar and margarine in glass bowl. Microwave on high 1-1/2 minutes. Stir. Microwave 1 to 1-1/2 minutes more or until boiling. Stir in vanilla and baking soda and pour over cereal mixture. Stir to coat evenly. Bake 1 hour, stirring every 20 minutes. Spread on baking sheet to cool. Break into pieces and store in airtight container.

Nancy Stenson, Fort Pierre

CINNAMON APPLE BRUNCH BAKE**Ingredients:**

- 1 can (21 oz.) apple pie filling
- 1/2 cup firmly packed light brown sugar
- 3 tbsp. butter, melted
- 2 tsp. McCormick® Ground Cinnamon
- 1 1/2 tbsp. McCormick® All Natural Pure Vanilla Extract
- 1 can (12 oz.) refrigerated biscuits
- 1/2 cup chopped nuts

METHOD

Preheat oven to 350°F. Mix apple pie filling, brown sugar, butter, cinnamon and vanilla in medium bowl. Spread 1/2 of the apple mixture in 2-quart shallow baking dish. Cut each biscuit into quarters. Arrange biscuit pieces, points up, over apple mixture. Spread remaining apple mixture over biscuits. Sprinkle with nuts. Bake 35 to 40 minutes or until golden brown. Let stand 5 minutes before serving.

mccormick.com

Please send your favorite recipes to your local electric cooperative (address found on Page 3). Each recipe printed will be entered into a drawing for a prize in December 2023. All entries must include your name, mailing address, phone number and cooperative name.

Q: Are there ways to reduce energy use on a farm?

A: The importance of farms cannot be understated. Farmers feed our families and keep the country running, but the business brings many challenges, including risk and uncertainty. Finding ways to use less energy can reduce costs and result in energy savings for years to come.

When looking to improve farm efficiency, consider the following areas.

MOTORS AND PUMPS

Because motors and pumps account for a significant amount of energy use on a farm, replacing inefficient motors with efficient models can save energy and reduce costs. Adding variable frequency drives (VFDs) allow you to vary the frequency and voltage supplied to the motor or pump to adjust the motor's speed. This saves kilowatt hours and reduces load by only operating at the needed capacity. VFDs can be used in place of a phase converter, which allows use of three-phase power equipment where there is only access to single-phase power.

IRRIGATION

Upgrade irrigation equipment to use less water, which means less pumping and reducing the amount of water and energy consumed. The goal is to get the right amount of water where it is needed. This can be accomplished by reducing evaporation through system design and fixing leaks in the system. GPS and geographic information system technologies allow for more specific irrigation targeting. Monitor and test systems regularly to ensure maximum efficiency.

LIGHTS

The longer lights are on, the higher the potential for savings. Prioritize replacing incandescent or fluorescent exterior lighting on photocells or lights that stay on all night. LED lights last two to four times longer than fluorescents and 25 to 35 times longer than incandescents. That means less frequent replacement, which saves on materials and labor costs.

HEATER CONTROLS

In climates where engine block heaters are used to keep vehicle engines warm enough to start, adding engine block heater controls with

temperature sensors and timers will reduce electricity use. To keep water from freezing on farms with livestock, save energy by using stock tank heaters with thermostatic controls, which operate only when needed instead of running constantly. Insulated stock tanks may eliminate the need to heat water.

EMERGING TECHNOLOGY

New farming technologies that offer efficiency possibilities include electric tractors, space heating and water heating. Equipment with information technology capabilities can aid efficiency by monitoring conditions and automating farming tasks. As with home efficiency practices, consider the equipment used most and the savings potential from upgrading or modifying existing equipment.

REBATES

About 80 percent of U.S. farms are located in counties served by electric cooperatives. Check with your local electric co-op to see if they offer rebates on farming equipment and energy-efficiency projects that help reduce energy use.

Improving efficiency on the farm can result in less energy use, lower bills and improved farming success during challenging financial times.

The Dirty Boot Band has entertained thousands of music lovers across the state and region. *Photo by DBB*

Dirty Boot Band makes music a joyful family affair

Billy Gibson

billy.gibson@sdrea.coop

Even The Grinch gets into the groove when the Dirty Boot Band takes the stage.

The family-based musical septet was playing a gig last December at Tiger's Tap in Fort Pierre when a fellow clad in a luminous green Grinch costume got up and danced a little jig.

That was okay with lead singer Sheridan Nickolas, who grinned at the gyrating Grinch while she kept strumming her Taylor six-string.

This particular set was one of about 50 gigs the DBB played last year with dates that found them venturing from one end of the state to the other. Audiences in places like Platte, Hayes, Mitchell and more heard the band belting out a blend of vintage country hits like Delta Dawn, Momma Tried and The Highway Song along with originals like Little Black Pickup Truck and To the Man I Loved.

They've played atop long-bed trailers, in hayfields, in senior citizen centers, shopping malls, bars and restaurants, and consider it an honor to respond to

invitations and play music for anyone wanting to have a fun time.

Hailing from the Onida and Fort Pierre area, the DBB is made up of cousins from the Weinheimer and Nickolas families who decided to form a group in the winter of 2020. The current line-up includes Jacob, Sam and Simon Weinheimer collaborating with Sheridan, Adelynn, Jace and Ty Nickolas.

Together, they work hard on honing their musical chops, memorizing lyrics, smoothing out their chord progressions, tightening their harmonies and even working on original tunes. When they're not touring around the state, the band mates are busy doing farm chores and tackling their academic subjects as students of the Seton Home Study School.

Somehow, they still find the time to compete in sports and pursue a side hustle of making baked goods and selling homemade jewelry.

Sheridan, a senior, is an ace softball pitcher and also likes to hunt.

"During hunting season, we do chores on the farm and do our school work, but

In lieu of a traditional gratuity for entertaining their audience at the Trader Days festival in Fort Pierre, members of the band received a free helicopter ride sponsored by an anonymous supporter. *Photo by Billy Gibson*

we also clean pheasants at the lodge," she said, referring to a family-owned hunting lodge, preserve and skeet range. "And in the spring it's calving season, so we're always checking on the cows."

She said the group plans on continuing to play more gigs and entertain more people as long as their limited time allows. And as they keep developing their chops, they're taking inspiration in the knowledge that their music is good enough to make a grinchy heart grow a few sizes when they play.

Mitchell Tech facilities were used for the annual electric cooperative rubber gloving school last summer. *Photo by Billy Gibson*

Mitchell Tech prepares linemen to deliver the 'right stuff' for members

Billy Gibson

editor@sdrea.coop

It's rare that you find a cooperative lineman in the state of South Dakota who hasn't been through the training program at Mitchell Technical College.

Mike Puetz doesn't remember all the names and faces, but his mentorship has played a key role in turning loads of wannabe linemen into highly skilled craftsmen over the past 25 years.

Puetz serves as head of the lineman training department at MTC and is giving some thought to hanging up his hooks in the next year or so. When he reflects on his teaching career, he swells with pride at how the program has improved exponentially over time.

There have been many milestones in the emergence of the lineman education program rising to become one of the best of its kind in the country.

Back in 2018, for instance, the power line construction and maintenance school was named winner of the inaugural Siemens-Aspen Community College

STEM award. The honor is given by the Aspen Institute to eight colleges nationwide that provide "outstanding preparation" for students in high-demand jobs and provides selected schools with \$50,000 to apply toward scholarships and other forms of financial assistance.

"That was definitely a shock," Puetz said. "There's a lot of good programs out there, and for us to be chosen for that prestigious award was unbelievable. We work hard to be able to say we have a very strong program, and that just gave us some validation that we're moving in the right direction. It's icing on the cake."

Mark Patterson, manager of loss control services at the South Dakota Rural Electric Association based in Pierre, has worked with Puetz for 15 years. He's hard-pressed to find many co-op linemen who haven't trained under Puetz.

"Mike has been around so long, and I'd estimate about 80 percent of the electric co-op linemen out there today have been trained by him," Patterson said. "They do a fantastic job of teaching the fundamentals, whether a student ends

up at a municipal, an investor-owned or a co-op. And our superintendents do an exceptional job of working with the graduates to help them gain the field experience they need to serve our members with a mindset of safety and efficiency."

Over the years, Puetz said, MTC has not only distinguished itself among similar programs but has also greatly expanded its array of academic and technical career tracks. There are tracks for construction and manufacturing, business and service industries, health sciences, engineering technologies and agriculture and transportation.

Sioux Valley Energy's Cole Anderson learned his trade at MTC.

At left, Mike Puetz has trained hundreds of future linemen. Above, Mitchell Technical College is well equipped to give electric linemen the real-world skills they need to succeed. *Photo by Billy Gibson*

Cole Anderson is a lineman at Sioux Valley Energy based in Madison. He graduated from the training program four years ago and recalls why he selected MTC to learn the ropes of line work.

"I had an uncle who was a lineman in another state and I knew that's what I always wanted to do," said Anderson, a graduate of Chester Area High School. "I started looking at schools and noticed they had limited positions open and they were always taken very quickly. That told me how good their reputation was."

Anderson received his certification in May of 2018, joined the cooperative as a 1,000 hour lineman, and eventually worked his way into a journeyman position.

Oddly enough, he met Puetz a year before he enrolled at MTC. While still in high school, Anderson was on a tour of the facility when he happened to encounter Puetz in the hallway. The two shook hands and after a brief conversation, Puetz said: "If I don't see you here next year, I'm coming to track you down."

Anderson said he finds himself frequently relying on his lineman education and remembering the things Puetz taught him, including those lessons that don't necessarily have to do with line work.

"I think he's awesome. He's big on work ethic and he always told us that no matter what we did in life, a good work ethic will allow you to accomplish your goals and stand out from the rest," Anderson said. "He also had a thing about belts. You had to wear a belt. If he saw you and you didn't have one on, he'd take his off and give it to you."

Anderson and his wife, Sarah, recently built a new home outside of Madison and are expecting a baby boy in March. He said he's grateful for the outstanding

instruction he received during his education phase and is also thankful to have a position at an outstanding organization within the electric cooperative system.

"I just feel fortunate. It's been a great experience all the way through," he said. "I think it's a privilege to be able to do a job I enjoy and to work with professionals who know their craft, and an organization that is focused on delivering the highest quality service to its members."

MTC is a prime training ground for future co-op linemen. *Photo by Billy Gibson*

THE COOPERATIVE DIFFERENCE

In the 1950s, Moreau-Grand started the Minute Man Program. During and after storms, members spread throughout the area would check power lines. It was a time decades before cell phones. Word was spread on what few telephone party lines were in place. At a moment's notice, they stepped up. Then, as now, our members are an integral part of Moreau-Grand's restoration team.

The Minute Man Program has long time passed. In fact, few members remember its existence. What has remained a constant is the dedication our members have. We often lament the fact that *Times aren't what they usta be!*

The reality is that time after time in the 76 years since your cooperative was founded, members have stepped up doing what needs to be done. Often putting their own lives on hold to help get the juice flowing again.

"The Cooperative Spirit is alive and well with our membership."

During the Christmas 2022 storm, as with so many storms that have challenged us, members using whatever equipment at hand plowed the roads, fields and prairie so that your dedicated linemen could safely get from their homes to work and to wherever they needed to go to get the power restored to their fellow members.

Leonard Anderson, Dakota Longbrake, Shannon De Poy, Ken and Brady Birkeland, the City of Dupree, Gary Cudmore, Bruce Keegan, Toby & Jess Keller, Jay Boldt, Jess Schlosser, Cap Pearman, Lindskov Ranch, and so many others not mentioned moved snow, opened the roads and trails and kept crews safe.

These modern-day Minute Men set the bar as an example of what is good and right within our communities. To these wonderful people, we raise a hand to our hat and salute you saying, "Thank you and may God bless you!"

LOCATE YOUR ACCOUNT NUMBER

If you locate your account number anywhere in this or past issues of Moreau-Grand Electric's *Cooperative Connections*, you will be a winner and will receive a \$25 credit on your next bill! For example: *1234.

Previous winners: We have drawn 11 member names since last October. Last winner was Steven S. from Isabel. Keep looking!

IDLE SERVICES POLICY BULLETIN 10-21:

The Cooperative may at its discretion retire any electric service that has never been connected or that has been disconnected for a period of at least 10 (ten) years:

1. If a member wants to keep electric service that is planned to be retired, the member shall be required to install a meter at the location and agree to maintain electric service at such location for a period of no less than five (5) years. If the service is disconnected before the expiration of such five (5) year period, the service shall be retired.
2. If electric service to a location has not been connected for a period of at least (5) years and (i) any pole or portion of the line is determined by the Cooperative to be unsuitable for use, and/or (ii) is damaged due to any type of weather event, including, but not limited to ice, wind, or any other natural disaster, it may be retired or, at the member's request, can be rebuilt for aid to maintenance in the amount of \$250 per damaged wire or break and \$1,000 per broken or rejected pole. If the member would like the electric service to the location to continue, the following procedures shall apply: • The member shall be billed for the aid to maintenance costs. The Cooperative must receive the aid to maintenance costs from the member within 10 (ten) days of the invoice date; and When the Cooperative completes the repairs, a meter shall be installed in the member's name.
3. This Policy shall be effective July 1, 2018 and shall thereafter be published annually in the *Cooperative Connections* newsletter.

Motor Savers Do What the Name Implies

Moreau-Grand strives to provide you with the high-quality power your valuable equipment needs. Unfortunately, Mother Nature and other issues may intervene.

Therefore, we encourage you to consider protecting equipment with devices such as the Motor Saver. Motor Saver power monitors can protect motors from low and high voltage and rapid cycling conditions and voltage unbalance, singlephase and reverse phase conditions on three-phase systems. Typical applications include air handlers, conveyor drives, oil and gas pumps, elevator drives, lift station pumps, commercial/ industrial air conditioning and refrigeration compressors and irrigation pumps. This is not an endorsement of this item, just an example of what equipment is available. More information is available about this South Dakota-made product on the web at <https://tinyurl.com/MGE-MotorSaver>.

MOREAU-GRAND ELECTRIC COOPERATIVE SCHOLARSHIP PROGRAMS

Moreau-Grand Electric believes that by sponsoring youth programs, we are investing in tomorrow's leaders. You can help by encouraging a future leader to apply. To be eligible, the students parent or guardian must have an electric meter with Moreau-Grand Electric. *"Does not need to be a resident."* Applications are available at our offices in Timber Lake and Eagle Butte and with school guidance counselors. Applications are also available on the web at <https://www.mge.coop/scholarships>.

Director's Scholarship

Our board of directors are passionate about our youth as they personally donate a portion of their compensation to a scholarship fund. This year, the scholarship will be awarded to an applicant planning to attend an approved regional line worker training program. The scholarship is in the amount of **\$2,500**. The deadline to apply for this opportunity is **Feb. 20, 2023**.

Basin/Moreau-Grand Scholarship

Each year, Moreau-Grand Electric offers a **\$1,000** scholarship to one area student, chosen by our power supplier Basin Electric Cooperative. The deadline to apply for this opportunity is **Feb. 20, 2023**.

Resource Conservation Speech Contest

Each year the South Dakota Department of Agriculture, Resource Conservation and Forestry Division sponsors a resource conservation-oriented speech contest. **Any South Dakota student in grades 9-12 is eligible to enter.** This includes public, private and home-school students. This opportunity is sponsored by the Touchstone Energy® Cooperatives of South Dakota.

- First Place: **\$1,200** Scholarship
- Second Place: **\$800** Scholarship
- Third Place: **\$500** Scholarship

The deadline to apply for this opportunity is **March 25, 2023**.

S.D. Association of Cooperatives Scholarship Application

SDAC is awarding two **\$1,000** scholarships to second-year higher-education students who are pursuing a degree relative to the cooperative business, who are members or whose parents/guardians are members of a SDAC member cooperative, including Moreau-Grand Electric.

Application deadline: October 2023

Winners announced in November 2023

Please contact Roger at Moreau-Grand Electric at 1-800-952-3158 with any questions.

NATIVE TOURISM

Native Tourism Alliance shines spotlight on tribal nation culture

Billy Gibson

billy.gibson@sdrea.coop

Sure, many of the 15 million travelers who visit South Dakota each year may have marveled at the Mount Rushmore Memorial, snapped a selfie at Wall Drug or beheld the fast-moving waters in Falls Park.

But how many of them have witnessed the whirling splendor of a wacipi, the traditional Native American celebration of life? How many have paused to watch a Native artist crafting a colorful piece of beaded jewelry?

Several years ago, a blind spot was noticed in the Department of Tourism's efforts to attract visitors – not much attention was being focused on the state's nine federally-recognized tribal nations.

In an effort to address that oversight, the department teamed up with the George Washington University International Institute of Tourism Studies

and the tribes to develop a sustainable indigenous tourism industry by letting visitors know there are many points of interest available for exploration far beyond the beaten paths.

The five-year plan has been described as a “groundbreaking endeavor” and is one of the first initiatives of its kind under the Native American Tourism and Improving Visitor Experience (NATIVE) Act and was unveiled in August of 2021. More than 60 state, local and federal organizations collaborated to formulate the strategy as a catalyst for economic growth.

“I think the Alliance is a potential revenue source for our tribes, and it's a way for us to generate income, alleviate poverty and help conserve our natural resources and culture,” said Dew Bad Warrior-Ganje, a member of the Cheyenne River Sioux Tribe.

The plan identified five guiding principles:

Native Tourism Alliance

- Unity - Reunification of the Očhéthi Šakówi Oyate through shared history, commonalities, and collaboration on developing regional tourism.
- Preservation - Promotion of art and culture in order to enhance self-identity and pride as well as preserve the culture, including language and traditional knowledge.
- Woksape - Recognition of Elders as the driving force of traditional knowledge and wisdom in the development of regional tourism and educating the youth to be stewards of the language and culture.
- Education - Creation of cross-cultural bridges and educating the World about Native American communities.
- Self-sufficiency - Development of opportunities for Tribal Nations to become self-sufficient and create pathways to enhance livelihood.

Organizers gathered together and developed detailed goals and methods to achieve those goals. Planners were forced to start from the ground floor as not much data existed to determine the present status of Indigenous tourism.

They initially identified a “rich mix” of 145 existing natural, cultural and heritage attractions and special events to promote, in addition to potential agritourism initiatives.

Nearing the halfway point in the plan’s prescribed timetable, stakeholders report substantial progress and greater interest from visitors seeking an authentic cultural experience.

Calvin Bloemendaal, who has represented the South Dakota Department of Tourism in the Alliance from its inception, pointed out several specific measures of success.

Chief among them is the creation of a nine-day motorcoach tour of tribal territory that starts in Rapid City and terminates in Bismarck. The tour, coordinated with assistance by the tourism department, will begin this summer and will be operated through Destination America and Trafalgar Tours.

“It’s one of the first tours of its kind,” Bloemendaal said. “Destination America caters to an upscale clientele of individuals who like to travel a lot and have been to a lot of places. They’re looking for something unique and interesting they haven’t seen before.”

He also mentioned the progress that has been made in building a network of support for tribal tourism and the development of themed destination experiences.

There’s also a marketing guide that is part of the department’s general ongoing promotional efforts. More than 30,000 of the helpful guides were printed and are being distributed at visitor centers, trade shows and other industry events.

“I was at a trade show in Denver and people were extremely interested in this idea and gravitating toward it. The guide is an effective tool that inspires people to visit,” he said. “We’re making a lot of headway as far as putting together pitches and itineraries to attract more tour operators to the state.”

CULTURE ON DISPLAY

The Mead Cultural Center has a variety of exhibits and programs to appeal to every interest. *Photos by Mead Museum*

Mead Cultural Education Center has something for every interest

Billy Gibson

The action seems to never cease at the Mead Cultural Education Center in Yankton.

Between three very popular permanent exhibits, community-based special events and temporary displays that come and go, the constant swirl of activity keeps Rob Marlow on his toes.

Marlow is program director at the museum, which is known affectionately to local supporters and frequenters as “The Mead.” He was finally catching his breath after the Christmastime crush when he and his team had to quickly turn their attention to installing a new traveling exhibit called “Crossroads: Changes in Rural America,” the product of a collaboration between the Smithsonian’s Museum on Main Street program and the South Dakota Humanities Council.

Previously, the touring exhibit spent several months on display at the South Dakota Agricultural Heritage Museum

on the SDSU campus in Brookings and will show at The Mead through the first week of March.

Other stops include the Sturgis Public Library from March 11 through April 30 and the Fort Sisseton Historic State Park from May 6 through June 25.

Marlow explained that the exhibit describes how the U.S. population has shifted away from rural and agrarian communities and moved toward more urban and suburban centers since 1900. It showcases the many ways agriculture-based towns and villages across the country have responded to those changes and in many cases have thrived.

As they’ve felt the impact of the long-term demographic trends, rural communities have been pro-active and intentional in finding new opportunities for growth, innovation and economic development.

“A lot of people who don’t live in rural towns have a perception that they’re barely hanging on by a thread, and that’s not always the situation. The reality is that while it hasn’t been easy,

farmers and ranchers and small town leaders have rolled up their sleeves and met these challenges head-on, to the point that we see many folks coming back to a lifestyle with a slower pace, more freedom, more comfort and more room to roam. It’s really a super success

A display focusing on the historic Yankton State Hospital is a popular attraction at the Mead Cultural Education Center in Yankton.

This display was created by the local Lego club and attracted a lot of interest during the Christmas season. *Photos by Mead Museum*

story, and this exhibit shows that. We're excited to have it here at The Mead," Marlow said.

Meanwhile, curious crowds continue to flock to the museum's three permanent exhibits, which include Yankton State Hospital: Minds, Methods and Medicine; Journey Forward: Connecting Cultures; and the Children's Transportation Museum.

Marlow said visitors and guests generally have a special fascination with the story of how the Mead Building in Yankton was once home to the state's largest mental health facility for women.

The permanent display designed by Jane Bobzin, Carol Ryan and Stan Hoffart opened in 2020 and tracks the history of the facility that dates back to 1879.

It highlights the accomplishments of hospital superintendent Dr. Leonard Mead and Dr. Leo Kanner, considered to be the "Father of American Child Psychiatry" for his innovative work in the field of autism.

"We get a lot of positive reviews and feedback about that display. People walk away learning a lot about the history of the facility and how the hospital provided treatment for those with mental disorders at the time," Marlow said.

Throughout the calendar year, the facility hosts a variety of seasonal events and activities such as the Hall of Trees held each year from Thanksgiving to Christmas.

This past Christmas, nearly 70 local businesses, social organizations and other sponsors decorated trees to reflect the spirit of the season. More than 1,300 visitors cast their vote for best-of-show by dropping a token in a box in front of their favorite tree. Registration fees paid by the competing tree decorators go toward providing free museum admission to those 17 and under.

The 2022 Hall of Trees exhibit also included a 1,400-piece Lego display built by the Yankton Community

"There's a lot to see and explore at the Mead Building. We feel like the discovery process is something that never ends."

Library Lego Club led by local brickmeister Tom Cihak. Last year's display featured an assortment of Tonka trucks.

Another popular seasonal event occurs during Halloween and is centered around "haunted history" tours of the Mead Building and an "overnight experience" where guests gather together with their sleeping bags and snacks, share ghost stories and listen for signs of any paranormal activity taking place in the crooks and crevices of the structure.

"There's a lot to see and explore at the Mead Building," Marlow said. "We feel like the discovery process is something that never ends."
