Cooperative Update

Melissa Maher
Manager

Here's a shout out to Moreau-Grand's safety record. At each monthly board meeting, the Safety Job Training Report is listed as a separate agenda item where time is set aside to read the entire report out loud. The intention is to place the needed emphasis on safety in our workplace.

At the end of December 2022, Moreau-Grand employees clocked 177,496 accident-free man hours with 40 accident-free months which translates into well over three years as this is an accumulated number until the next accident. Total Moreau-Grand Electric vehicle miles driven in 2022 totaled 250,721. We are very proud and thankful of our safety record.

Linemen clock a lot of miles, in inclement weather, all hours of the day, all days of the week, to keep your lights on. Not only is safety important in all the miles driven – but the fact that your linemen are working with electricity requires a whole set of safety rules of their own. Electricity doesn't care how old you are – how much experience you have – or how great your safety record is. It requires everyone to be on the top of their game each day while following the safety protocols.

Here is some insight into the emphasis placed on safety. Moreau-Grand

schedules on-site meetings with all linemen gathering at our headquarters facility several times throughout the year. Our SDREA Loss Control representative, Mark Patterson, attends these meetings to provide training on various topics. Some of these include: May Day and Emergency Preparedness; Grounds and Sticks and Personal Protective Equipment; Bucket Truck and Pole Top Rescue; and Field Observations, to name a few. Mark shares information with the crews and opens the line of communication. The philosophy is that learning is ongoing, and we can all learn from those around us in the industry. Near misses are discussed – what went wrong and how can it be prevented.

Federated Rural Electric, our insurance carrier, also has a representative, Roy O'Day, that stops in throughout the year to provide safety training along with field observations as well.

With each daily task, linemen have a safety plan in place on how they will address the situation at hand. These are referred to as tailgate sessions and are part of our safety documentation. Safety and protection of our employees is paramount and is included in my daily prayers. Every safe day is a good day!

Until next month...God continue to bless our employees.

Mark Patterson, Safety Director for SDREA, practicing Mayday exercise with Moreau-Grand crew.

COMPARATIVE REPORT	Current (Dec 2022)	1 year ago (Dec 2021)	10 Years Ago (Dec 2012)	% Change in 10 years

MOREAU-GRAND ELECTRIC COOPERATIVE CONNECTIONS is published monthly by Moreau-Grand Electric Cooperative, PO Box 8, 405 Ninth St., Timber Lake, SD 57656-0008, for the members of electric cooperatives across South Dakota. Families subscribe to Moreau-Grand Electric Cooperative Connections as part of their electric cooperative membership. Moreau-Grand Electric Cooperative Connections' purpose is to provide reliable, helpful information to electric cooperative members on matters pertaining to rural electrification and better rural living.

Subscription information: Electric cooperative members devote 50 cents from their monthly electric payments for a subscription. Nonmember subscriptions are available for \$12 annually. Periodicals Postage Paid at Timber Lake, S.D., and at additional mailing offices.

POSTMASTER: Send address changes to: Moreau-Grand Electric Cooperative Connections, PO Box 8, Timber Lake, SD 57656; Phone (605) 865-3511; Fax (605) -865-3340; e-mail mge@mge.coop; Web site www.mge.coop. This institution is an equal opportunity provider, employer and lender.

Design assistance by SDREA

Jan. 16, 2023 Board Meeting Minutes and Nov. 2022 Financial Information

The January 16, 2023, board of directors' meeting was held at the Timber Lake office with the following directors present: Bartlett, Clark, Hieb, Keckler, Landis, Lawrence, Maher, McLellan, Walker and Wall, and others present: Manager Maher, Finance Officer Dahlgren and Finance Officer Lemburg (Delegated Recorder of Minutes).

The Large Power Users monthly report was given by Stephanie Bartlett, which included topics on large power usage and payments.

The Member Services report was given by Roger Lawien, which included computer updates, cyber security, meter database maintenance, outage management, Construction Work Plan, scholarships, stock show and SmartHub statistics.

The Operations report was given by Kent Larson, which included recent outages, Construction Work Plan, Highway 12 road move, underground faults, Ziebach County invoice received for plowing snow, and Manager Maher will request a Ziebach County Commissioner attend the February Board meeting to discuss the invoice.

Manager Maher gave the Managers report, which included the December power bill, ARPA funds available to CRST members, 2022 physical inventory, 2022 wheeling data, Load Management Report and cost savings, Basin Electric's negotiations for the sale of DGC have expired, employee salary and benefit statistics, CoBank Loan Application update and new headquarters facility update.

The Board discussed and registered for the Rural Electric Co-op Day at the Capitol in Pierre scheduled for February 21, 2023.

The Board discussed and registered for the Basin Electric members only meeting scheduled for January 26, 2023, via Webex.

Director McLellan gave the SDREA Board meeting report, which included ACRE changing its name to American Electric Co-ops (AEC), legislative session update and Basin Electric report.

The Board reported on the SDREA annual meeting, which included good speakers, a new schedule layout and good attendance. Director Landis, MGEC's delegate at the SDREA annual meeting, gave a report on the various presentations, Federated Insurance regarding fire mitigation, political discussions, financial reports, and excellent motivational speaker.

Board approved the following: the agenda, the minutes from the December meeting, new members, refunds, line extensions, financial statistics, disbursements, safety report, set the annual limit for estate retirements, contractor storm bids for 2023, changed the February board meeting date to February 17, 2023, SD Department of Tribal Relations donation, set the Policy Committee meeting for March 15, 2023, and Special Equipment Summaries #442-444 in the amount of \$55,958.43.

The next board meeting was scheduled for February 17, 2023, at 8:30 a.m. in the Timber Lake office.

November 2022 Financial Information			
	NOV. '22	NOV. '21	YTD 2022
Operating Revenues	\$1,115,553	\$1,114,027	\$11,745,567
Cost Of Power	\$629,173	\$508,557	\$5,882,867
Cost Of Electric Service	\$1,113,970	\$970,129	\$11,458,350
Margins	\$16,882	\$146,253	\$452,620
Kwh Purchased	10,860,120	9,322,501	101,883,763
Kwh Sold	9,165,890	9,058,891	93,145,369

Spring Planting Safety

Farming equipment has become more massive and technologically advanced over time. While these welcome improvements help farmers cover more ground in less time, taller equipment and longer extensions can bring added challenges around power lines.

As farmers prepare to enter the fields for planting, we urge everyone working in the agricultural field to be alert to the dangers of working near overhead power lines, poles and other electrical equipment.

Follow the 10-foot distance rule

To stay safe around overhead power lines, follow safe work practices at all times to help prevent serious and even deadly accidents. Start by making sure everyone knows to maintain a minimum 10-foot clearance from power lines.

This 10-foot rule applies not only to the area underneath the power line, but to the full 360 degrees around it. Not only can electricity change paths if direct contact is made, it can also happen when someone or something gets too close to a power line, and the current jumps, also known as arcing.

Other precautions

In addition to the 10-foot rule, take these steps to help decrease the chances of an electrical-related incident:

- If your machinery or vehicle comes in contact with a power line, do not get out of the cab because you could be electrocuted. Instead, stay where you are and call 9-1-1 to dispatch the appropriate utility to deenergize the power.
- If it is not safe to stay in the cab due to fire or smoke, make

a solid, clean jump with both feet landing at the same time. Hop away with feet together as far as you can.

- If you come across an accident or incident near a downed power line, alert individuals (from at least 50 feet away) to stay in the cab or vehicle as long as there is no imminent danger. Call 9-1-1 and do not approach the scene.
- Have a daily meeting with staff to go over possible hazards. Map out and review routes where equipment will be moved and ensure it will clear power lines.
- Teach anyone working with or for you (including family members and seasonal employees) about power line awareness and proper clearance distance.
- When working around power lines, always use a spotter, who has a broader vantage point than the person in the cab.
- Visually inspect overhead lines, which may not meet height codes due to age or pole damage. If a wire is hanging low, never try to move it; instead, contact your electric utility for assistance.
- Lower extensions to the lowest setting when moving loads.

Take care when plugging in appliances

Stella Nilson

Stella Nilson gives good advice on circuit safety. Overloading circuits is a major cause of residential fires, and she warns people to take care when plugging in appliances. Stella is the daughter of Kyle and Alision Nilson, members of Moreau-Grand Electric based in Timber Lake.

Kids, send your drawing with an electrical safety tip to your local electric cooperative (address found on Page 3). If your poster is published, you'll receive a prize. All entries must include your name, age, mailing address and the names of your parents. Colored drawings are encouraged.

SEAFOOD SPECIALTY

SEAFOOD PARTY DIP

Ingredients:

1 pkg. mock crab sticks
 1 pkg. mock crab pieces
 1 pkg. mock lobster
 1 pkg. salad shrimp
 1 can water chestnuts
 1 medium onion (optional)
 1 c. real mayonnaise
 2 pkg. Philly cream cheese
 Dried parsley, garlic powder, salt, and pepper to taste

METHOD

Grind crab, lobster, shrimp, and water chestnuts. Chop onion. Using a mixer, blend mayo and cream cheese until smooth. Add parsley, garlic powder, salt, and pepper to taste. Combine with seafood. Mix well and refrigerate. Serve with various kinds of crackers.

Kari Larson Reder, Warner, S.D.

WALLEYE CAKES

Ingredients:

8 oz. walleye (cooked, cooled, and flaked)
 1 1/2 c. mayonnaise
 4 eggs
 1 c. cooked wild rice
 1/2 c. Parmesan cheese
 4 green onions (chopped)
 1 sleeve saltine crackers (crushed)
 1 tsp. crushed garlic
 2 tsps. seasonings (salt, pepper)
 2 tbsp. oil or butter

METHOD

In large bowl, combine walleye, mayo, rice, onion, garlic, and cheese. Add eggs and seasonings. Fold in crushed saltines until the mixture is firm enough to form cakes. Fry in olive oil for 2-3 minutes on each side or until crispy. Serve with topping: 1/2 c. mayo, 1 tsp. garlic powder, and 1 oz. crumbled blue cheese. Mix together.

Dar Duncan, Milbank, S.D.

SHRIMP PASTA

Ingredients:

1 can (14 1/2 oz.) diced tomatoes, undrained
 1 can (6 oz.) tomato paste
 1 c. water
 2 tsps. sugar
 1 tsp. basil leaves
 1 tsp. garlic powder
 1 tsp. oregano leaves
 1/2 teaspoon salt
 1/4 tsp. crushed red pepper
 8 oz. pasta, such as linguine or spaghetti
 1 lb. medium shrimp, peeled and deveined

METHOD

Mix tomatoes, tomato paste, water, sugar, basil, garlic powder, oregano, salt and red pepper in large saucepan. Bring to boil on medium-high heat. Reduce heat to low; simmer, uncovered, 20 minutes, stirring occasionally. Meanwhile, cook pasta as directed on package, adding shrimp during last 3 minutes of cooking. Drain. Return pasta and shrimp to saucepot. Pour tomato sauce over shrimp and pasta. Toss gently to coat well. Serve immediately with shredded Parmesan cheese, if desired.

Please send your favorite recipes to your local electric cooperative (address found on Page 3). Each recipe printed will be entered into a drawing for a prize in December 2023. All entries must include your name, mailing address, phone number and cooperative name.

Save Energy and Money with a Heat Pump Water Heater

Q: I'm looking for options to replace my old water heater. What should I choose to make my home's water heating more efficient and save money?

A: Consider upgrading to an energy efficient heat pump water heater. Heat pump water heaters – also called hybrid water heaters – use heat pump technology to heat water more efficiently than a standard electric storage water heater.

Think of them as a standard water heater with a heat pump on top. The heat pump heats the water two to three times more efficiently than the electric elements, but the unit still has the electric elements as backup, if needed.

Here are some details about their efficiency, how the units operate, installation considerations and when you should replace your old water heater.

Efficiency and Operation

By moving heat instead of creating it, a heat pump water heater uses 60% less energy than electric storage water heaters. That can add up to hundreds of dollars a year and thousands during the life of the water heater.

Improved controls make it easy to set the desired temperature and programming, including vacation mode, which saves energy when you are out of town.

Some models offer Wi-Fi connectivity to be controlled by a smartphone from anywhere. Other helpful features include leak detection and automatic shutoff.

Installation Considerations

A heat pump water heater uses heat from a room to heat water. It tends to make the space about two degrees cooler, which is something to consider before installation. Ideal placement is an unconditioned space, such as a garage or unheated basement. A heat pump water heater requires enough space around the unit to supply the air needed for efficient operation – about 750 cubic feet.

Heat pump water heaters tend to be slightly taller than storage water heaters and require additional clearance above the unit to access the filter for cleaning. If your water heater is in a conditioned space or a room smaller than the unit requires, venting might be a

solution for your installation.

Another consideration is noise. A heat pump water heater generates about as much noise as a modern dishwasher, so it may not be a good solution if the water heater is located where sound could be a nuisance.

Installing a heat pump water heater is much like installing a standard electric water heater, except for the location of the cold-water inlet, which is located at the bottom of the unit.

Because moisture in the air condenses when it is drawn through the heat pump, it also requires a condensate drain that must be routed to a drain or pumped outside of the home.

Heat pump water heaters can replace electric, gas or propane water heaters. They typically require a 240-volt circuit, which might necessitate an electrical upgrade by a licensed electrician.

When to Replace an Old Water Heater

The life expectancy of a standard water heater is about 10 years. If your water heater is older than that or showing signs of failing, you may want to consider replacing it with a heat pump water heater before it fails.

It's easier to find the product you want when it is not an emergency replacement. It also can be more expensive to replace it during an emergency. While heat pump water heaters are sold at a higher price than standard water heaters, the cost savings over time can offset the purchase and installation cost – and will result in a more energy efficient home.

You also are likely to save by taking advantage of sales, rebates or tax credits. Check with your electric utility, state department of energy and federal tax information before purchasing a new water heater.

I installed a heat pump water heater in my home. I love it and can see how my energy use has decreased since installation. Now, if I can only figure out how to get my children to take shorter showers.

FROM DECAYING TO DISPLAYING

The Ziebach County Historical Center's exhibits showcase artifacts of local history.

Ziebach County Historical Society Preserves Local History

Frank Turner

frank.turner@sdcra.coop

Ziebach County found its place in the annals of history when one of its residents, Fred Dupris, helped save the buffalo from extinction in the late 19th century. It's a piece of history that is at the heart of the sparsely populated county, so much so that even Ziebach's county seat of Dupree is named after the man himself.

Luckily, the area's zeal for preservation has remained. In the spirit of Fred Dupris, a small group of women in Ziebach County set out more than 40 years ago to save their community's history. This group of historians began to collect everything from vintage maps to old newspapers.

As interest grew, so did their accomplishments. Together, they published a book of local history and family stories, all while collecting an ever-growing amount of local artifacts and papers. Their actions inspired others, and a younger group of history buffs quickly took hold of the reins. The newly inspired volunteers incorporated the Ziebach County Historical Society in 2004 and purchased the town's historic Catholic church.

Dupree school teacher Shawn Olsen is now the current Ziebach County Historical Society president, and the goals of the historical society have since expanded to include not only preserving history but sharing it too.

"People were donating all sorts of artifacts and documents, but we had nowhere to put

them," said Olsen. "These histories were just stored away in boxes, sitting in a house."

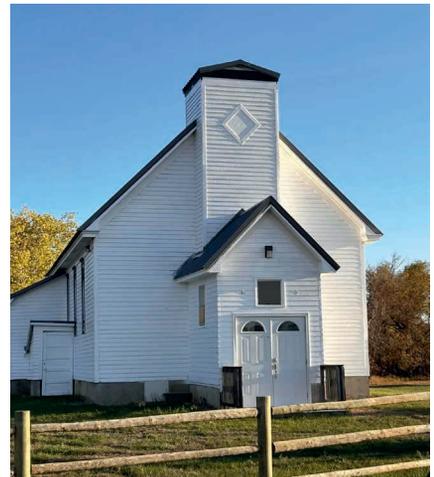

The Ziebach County Historical Society found a solution for their problem in their former church, a community structure that was built in 1913 and in near disrepair. Needing the space, Olsen and other volunteers spent hours of their time upscaling the building into a new historical center for the community. They replaced windows, installed new wiring, and breathed new life into the building with a fresh coat of paint. They even included air conditioning.

"If you could have seen it before the renovations, you would have thought to throw a match in it," laughed Olsen. "But when I started working, people would stop by to ask questions about the project. They would see my truck parked outside and ask, 'What are you doing in there?' It really generated a lot of interest from the community. I think there's just a lot of people out there that take pride in where they come from out here and they want to keep that going."

The work paid off. What used to be empty walls and chipping paint, now hosts rows of display cases and local history.

The historical society, wanting to share its achievement with its supportive community, opened the Ziebach County History Center to the public in early May. The result was a hustling and bustling grand opening that featured the Dupris family's buffalo branding iron, a piece of history that the family loaned to the center for the occasion.

"We have an exhibit with artifacts from

History enthusiasts of Ziebach County have spent months upscaling one of their community's decaying buildings into a local history center.

our bank and another exhibit featuring the story of Fred Dupris," said Olsen. "We have a wide variety of items that make up our history."

With a successful grand opening behind them, the historical society now wants to reach beyond its local membership and attract history enthusiasts from the surrounding region. In hopes of spurring new traffic to Ziebach County, the historical society is planning to open the newly renovated center to the public with regular hours in the coming months.

"The community has supported this project because they know we have a wonderful local history in Ziebach County," said Olsen. "Now that it's finished, it's time to open the center and share our story with others."

TRASHYARD TREASURES

Lee Lindsley of Piedmont turns trash into treasure when he isn't on the clock working for the South Dakota Department of Transportation.

South Dakota Man Welds Junkyard Scraps Into Pieces of Art

Frank Turner

frank.turner@sdrea.coop

Lee Lindsley has a real talent for welding trash into treasure. Given the time, Lindsley can sculpt even the most unwanted junkyard scrap – busted gears, rusted lug nuts and mangled bicycle chains – into an artistic masterpiece.

By day, Lindsley works as a region inspector for the South Dakota Department of Transportation in the Black Hills, but by night, he can be found in his shop putting hours of work into his metallic puzzles, welding them together piece by piece.

When not on the clock, Lindsley is busy tackling his next project, investing anywhere from 30 to 100 hours into each sculpture. The end result often portrays a snapshot of rural life in the Black Hills: a life-size hunting dog made from a mix of old tools and spent rifle rounds, a miniature snowmobile standing on a displaced piston and a gun-slinging Yosemite Sam with a beard fashioned from old nails.

“Metal sculpting is some-

Famous cartoon character Yosemite Sam is one of Lindsley's favorite metal creations.

thing that anyone can do if they put their mind to it,” said Lindsley. “All I do is throw parts of junk together.”

In many ways, Lindsley’s passion for sculpting and welding echoes the resourcefulness of the very artwork he makes. When Lindsley began his metal sculpting journey, he didn’t have a formal education or even a background in art to guide him. Instead, he relied on his welding skills and the bits of scrap he had available to make his remarkable artwork.

“It’s hard to put a price on these pieces, but if my artwork does sell, I want to donate a portion of the sale to a charity.”

It was Lindsley’s second cousin Chris Degen, a teacher at Mitchell Technical College, who inspired Lindsley’s first foray into metal sculpting four years ago. Degen recalls gifting Lindsley’s son, a former lineman, a simple lineman made from nuts and bolts during the holidays. The quirky Christmas gift became a catalyst for the two to start creating new projects and bouncing new ideas off each other. According to Degen, Lindsley just ran away with the idea.

“He went crazy with it,” Degen laughed. “Lee started making sculptures that went way above and beyond what I was doing. I would put an hour into my project, and he would put one hundred into his.”

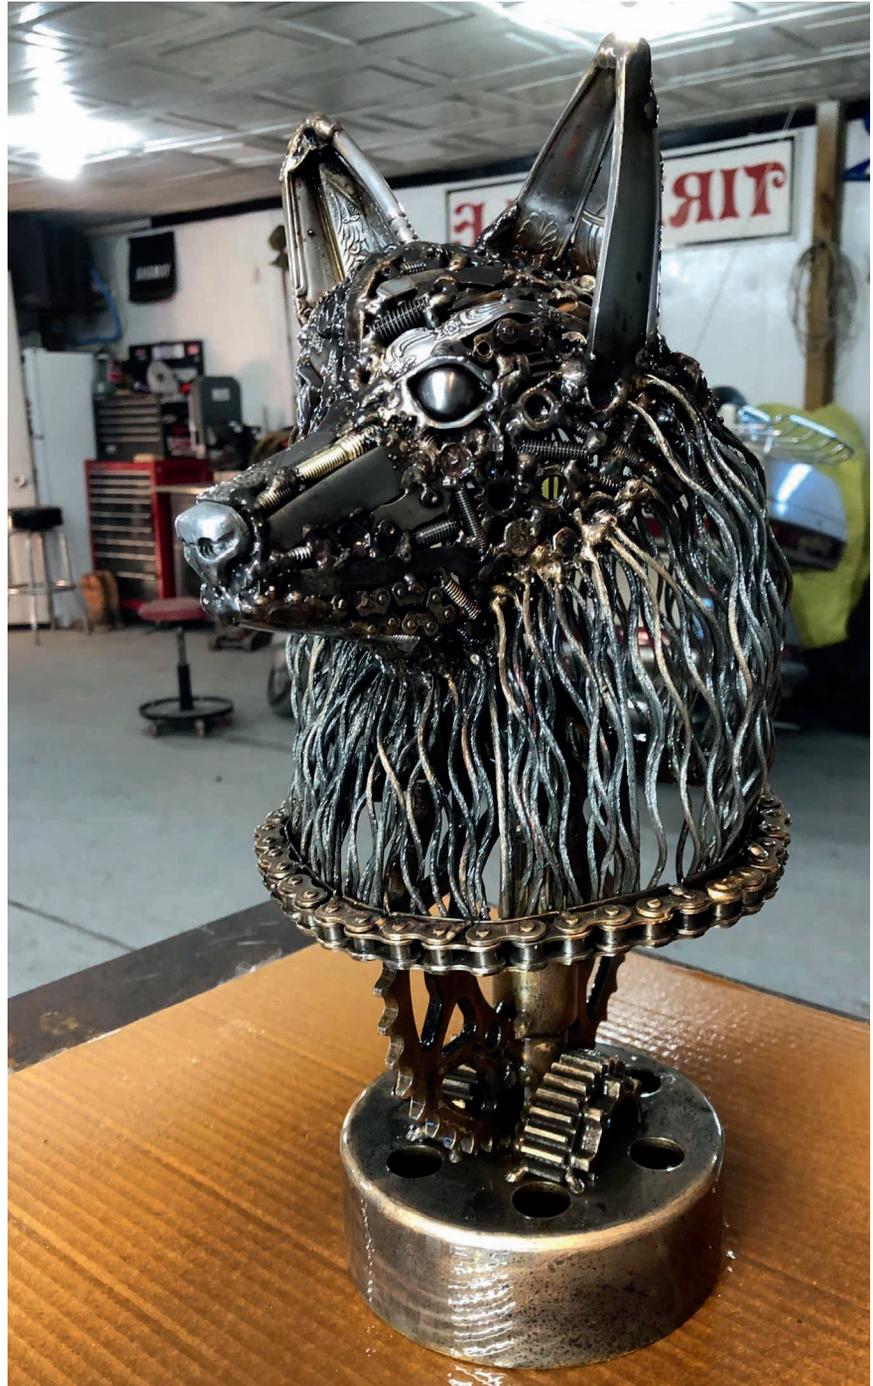

Taking another step forward in his hobby, Lindsley began researching works and art pieces posted online by world-famous metal sculptors, including metal sculptors John Lopez – a South Dakotan – and Brian Mock, whose masterpieces provided Lindsley a roadmap of what can be accomplished.

Since embarking on his metal sculpting journey, Lindsley has completed more than 18 metal sculptures, and his hobby continues to blossom. For the first time ever, Lindsley put one of his sculptures

up for sale in A1 Al’s Pheasant Ranch in Emery S.D. Since November, Lindsley’s metal hunting dog has stood proudly in one of the ranch’s hunting cabins, waiting for a buyer, and although the dog hasn’t left the shelf just yet, Lindsley said he is

excited to see his work out in the open and visible to the public eye.

“It’s hard to put a price on these pieces, but if my artwork does sell, I want to donate a portion of the sale to a charity,” he said. “We will see what happens.”

Lindsley’s metal German shepherd sits proudly in his workshop.

Continuity of Service

The Cooperative shall use reasonable diligence to provide a constant and uninterrupted supply of electric power and energy.

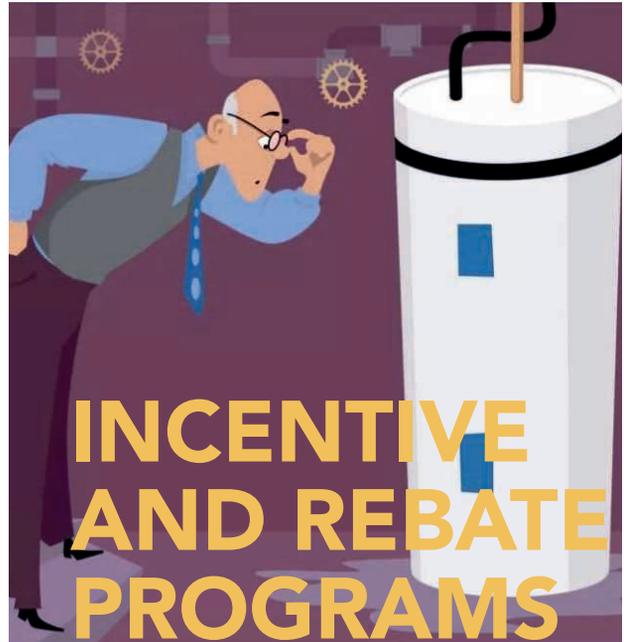

If the supply of electric power and energy shall fail, be interrupted, or become defective through an act of God, government authority, action of the elements, public enemy, accident, strikes, labor trouble, required maintenance work, premature obsolescence of equipment or any other cause beyond the reasonable control of the Cooperative, the Cooperative shall not be liable therefore or for damages caused thereby.

STATEMENT OF NON-DISCRIMINATION

Moreau-Grand Electric Cooperative is a recipient of federal financial assistance from the U.S. Department of Agriculture (USDA).

In accordance with Federal civil rights law and USDA civil rights regulations/policies, USDA, its Agencies, offices, and employees, and institutions participating in or administering USDA programs are prohibited from discriminating based on race, color, national origin, religion, sex, gender identity/expression, sexual orientation, disability, age, marital status, family/parental status, income derived from a public assistance program, political beliefs, or reprisal/retaliation for prior civil rights activity, in any program or activity conducted or funded by USDA; not all bases apply to all programs; remedies and complaint filing deadlines vary by program or incident. Persons with disabilities who require alternative means of communication for program information (e.g., Braille, large print, audiotape, American Sign Language) should contact the responsible Agency or USDA TARGET Center at (202) 720-2600 (voice and TTY) or contact USDA through the Federal Relay Service at (800) 877-8339. Program information may be made available in languages other than English. To file a program discrimination complaint, complete the USDA Program Discrimination Complaint Form (AD-3027) found online at http://www.ascr.usda.gov/complaint_filing_cust.html and at any USDA office or write a letter addressed to USDA and provide all of the information requested in the form.

To request a copy of the complaint form, call (866) 632-9992. Submit your completed form or letter to USDA by: (1) mail: U.S. Department of Agriculture, Office of the Assistant Secretary for Civil Rights, 1400 Independence Avenue, SW, Washington, D.C. 20250-9410; (2) fax: (202) 690-7442; or (3) email: program.intake@usda.gov. USDA is an equal opportunity provider, employer and lender.

When you flip on a light switch, electricity travels in an instant to your home and the bulb glows – that’s called demand. When all of us turn on lights, heaters, run a hot bath or any of the other appliances at the same time, it increases the demand load system wide.

We offer a one-time incentive of \$50 to our members that install a Demand Response Unit (DRU) on water heaters and central air conditioning units. After a licensed electrician (hired by Moreau-Grand Electric) installs the DRU, we begin managing your energy consumption – on average, four to eight days out of the month. If you would like to join the over 550 other members of Moreau-Grand Electric in the Demand Response Program, you can contact Member Services at 800-952-3158 to set up a time to have a DRU installed. *14648 248TH AVE

Water Heater Rebate Program (water heaters 40 gallons or more)

Is that old water heater leaking a bit or takes a long time to recover? Are you building a new home? Give us a call, we can help with a rebate on that new water heater.

- \$75 when replacing an existing electric water heater with a new electric water heater
- \$200 when replacing an existing gas or oil water heater with a new electric water heater
- \$200 on new construction

(All rebates are subject to a maximum amount of \$500 per member, per year)

Help Us Find These Missing Members

The following list of people have capital credit checks that were undeliverable in December of 2021. If you know of the current address of anyone listed here, please let us know by calling 1-800-952-3158, or emailing mge@mge.coop.

THE STORY OF DUDE DAD

Taylor and Heidi Calmus play with their kids (Theo, Juno and Otto) on a playset Taylor built. The family will welcome another baby in March.

Howard Grows More Than Corn

Tara Miller

Central Electric Cooperative

His kids may only know him as dad, but Jimmy Kimmel, the entire internet and 7 million followers can't be wrong – Howard native Taylor Calmus has evolved into a new-age celebrity. Better known as Dude Dad, Calmus is an accomplished actor, video producer, digital content creator, author, builder, television show host and comedian. Besides making regular appearances on Jimmy Kimmel Live, Calmus has also shared the screen with home remodeling experts Chip and Joanna Gaines, acclaimed actor Anthony Anderson and several YouTube stars.

Calmus is the son of Larry and Julie Calmus. He grew up west of Howard with siblings Zach and Maggie, and graduated from Howard High School in 2005. He now lives in Fort Collins, CO, but Calmus credits much of his creativity to his rural upbringing.

"Growing up in rural South Dakota was awesome because it forced us to create our own fun. My parents were big advocates of that. They would say, 'Go outside and

find something to do.' It enabled us to be creative," Calmus said.

His mom, Julie, agrees. "We were sticklers. We didn't let them play Nintendo or watch tv all day." Instead, the kids often spent time outside constructing BMX bike ramps, among other things.

Building Strong Connections

Now a dad himself, Calmus enjoys putting his ingenuity and building skills to work for his kids. "Building things with your kids is one of the best ways to bond with them," he said. "I've made carnival rides, backyard bike parks, multiple tree houses, a boat, just so many things. Being a dad gives you permission to imagine the impossible like kids do. It allows me to connect with them."

Calmus and his wife Heidi, who is originally from Fargo, have three children and another baby due in March. Heidi is often the subject of her husband's videos. Calmus puts his acting skills to work, sporting a long brunette wig as he comedically embellishes her life. Luckily, Heidi is a good sport, and they often share reaction videos in which she critiques his performance.

The couple went on tour this year, performing comedy shows as a team in North Dakota, South Dakota and Colorado. Calmus said without his wife, they would not have experienced this level of success. "Heidi believed in me before I did. Without her, Dude Dad wouldn't exist today."

The Evolution of Dude Dad

Success didn't happen overnight, Calmus explained. Early on, he would often pick up work doing set construction for tv shows and movie projects to make ends meet.

"When I moved away, I worked hard to make it in Hollywood as an actor, and I had some success," he said. "Then, when Heidi was pregnant with our second child, it was clear to me that I needed to do something more stable to support a family. That's when we created Dude Dad."

Mastering the Dude Dad brand took a great deal of time and commitment. Calmus constantly brainstormed new ideas for videos that would align with the brand and appeal to viewers. After all, the more views his content generates, the more income he earns from paid advertising on the various platforms.

A humble individual, Calmus doesn't necessarily consider himself famous. He said, "I think my content caught on faster in

Taylor and Heidi perform stand-up comedy as a team. They recently sold out shows in Fargo, Sioux Falls, and Fort Collins.

South Dakota because I have family here.”

But the numbers don't lie. Dude Dad content has more than 1 billion views on Facebook and roughly 150 million views on YouTube. So, his reach is far greater than just the state of South Dakota.

“With TikTok and other apps, there are a billion new creators every year, so it's a challenge all the time,” Calmus said. “Anybody can make videos online now, but not everybody can stand in front of an audience and perform comedy. It's been a fun and rewarding challenge. Now we get to see the people who are connecting with our content.”

Calmus authored a book entitled “A Dude's Guide to Baby Size” to help expectant dads understand their baby's size throughout pregnancy. He shares guy-friendly size comparisons for reference, such as a lug nut, a tape measure, a pound of ground beef and a football.

Giving Back

Because of his success, Calmus has been able to give back in unique ways. In 2019, he partnered with HGTV “Fixer Upper” star Chip Gaines to raise \$1.49 million for St. Jude's Children's Hospital. This partnership led to Calmus's television show, Super Dad, where he helps other dads build custom backyard play areas for their children.

Calmus is also a champion for Horizon Health Foundation's Smiles for Miles program. He helped the non-profit raise more than \$20,000 in a single day to provide free dental care for local kids.

Most recently, Taylor and Heidi performed

a live show in Fort Collins and donated the proceeds to a neighborhood family who sadly lost their father.

“He left behind two little kids who are friends with our kids, and we just wanted to be there for them however we could,” Calmus shared.

Making the Family Proud

Reggie Gassman, Calmus's uncle, is the Manager of Customer Electrical Services at Sioux Valley Energy in eastern South Dakota. He said he's proud of his nephew's accomplishments.

“When the kids were little, Taylor and Zach were already making home movies. His success creating videos doesn't surprise me at all,” Gassman said. “He takes something from normal, everyday life and sees it from a different angle.”

Gassman joked, “I told Taylor acting genes run in the family because I was named best actor in the junior class play. That's like the Emmys of Canova!”

Calmus said both sides of his family – Calmus and Gassman – are naturally funny and talented in different ways. While Gassmans are widely known for their baseball skills, his uncle Kurt (and his mustache) have famously inspired some of Dude Dad's most iconic characters.

He's Still Just Taylor

Despite his growing list of accomplishments, he's still the same guy his family knows and loves.

Calmus's mom Julie shared, “Since he was two years old, Taylor was always entertaining people and goofing around. His older brother Zach is just as clever, so there's always laughter when the family gets together. It's pretty cool he's been able to make a living doing that.”

She said when strangers recognize her son as Dude Dad, she chuckles. “He's still just Taylor to us.”

“Husbands of Target” is a viral video with more than 80 million views that Taylor developed in collaboration with other digital content creators.

ONLINE SAFETY

Keeping your kids safe online

The Internet can be wonderful for kids. They can use it to research school reports, communicate with teachers and other kids, and play interactive games.

But online access also comes with risks, like inappropriate content, cyberbullying, and online predators. Using social media apps and websites where kids interact, predators may pose as a child or teen looking to make a new friend. They might prod the child to exchange personal information, such as address and phone number, or encourage kids to call them, seeing their phone number via caller ID.

Parents should be aware of what their kids see and hear online, who they meet, and what they share about themselves. Talk with your kids, use tools to protect them, and keep an eye on their activities.

Online Protection Tools

Online tools let you control your kids' access to adult material and help protect them from Internet predators. Many Internet service providers (ISPs) provide parent-control options. You

can also get software that helps block access to sites and restricts personal information from being sent online. Other programs can monitor and track online activity.

Getting Involved in Kids' Online Activities

More important than blocking objectionable material is teaching your kids safe and responsible online behavior, and keeping an eye on their Internet use.

Basic guidelines to share with your kids for safe online use:

- Follow the family rules, and those set by the Internet service provider.
- Never post or trade personal pictures.
- Never reveal personal information, such as address, phone number, or school name or location.
- Use only a screen name and don't share passwords (other than with parents).

- Never agree to get together in person with anyone met online without parent approval and/or supervision.
- Never respond to a threatening email, message, post, or text.
- Always tell a parent or other trusted adult about any communication or conversation that was scary or hurtful.

Basic guidelines for parental supervision:

- Spend time online together to teach your kids appropriate online behavior.
- Keep the computer in a common area where you can watch and monitor its use, not in individual bedrooms. Monitor any time spent on smartphones or tablets.
- Bookmark kids' favorite sites for easy access.
- Check your credit card and phone bills for unfamiliar account charges.
- Find out what, if any, online protection is offered by your child's school, after-school center, friends' homes, or any place

where kids could use a computer without your supervision.

- Take your child seriously if he or she reports an uncomfortable online exchange.

If you're aware of the sending, use, or viewing of child pornography online, call the National Center for Missing and Exploited Children at (800) 843-5678 or go online to their CyberTipline. They'll make sure the info is forwarded to law enforcement officials for investigation. Contact your local law enforcement agency or the FBI if your child has received child pornography via the Internet.

Watch for warning signs of a child being targeted by an online predator. These can include:

- Spending long hours online,

especially at night

- Phone calls from people you don't know
- Unsolicited gifts arriving in the mail
- Your child suddenly turning off the computer or other device when you walk into the room
- Withdrawal from family life and reluctance to discuss online activities

Talk to your kids! Keep an open line of communication and make sure that they feel comfortable turning to you when they have problems online.

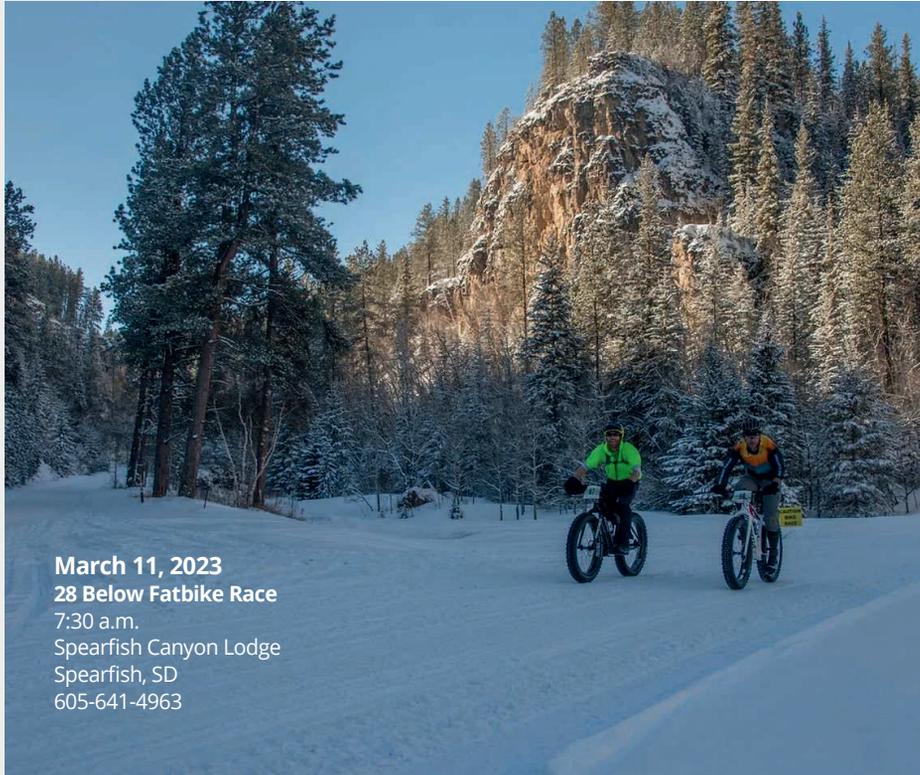

The Internet and Teens

As kids get older, it gets a little trickier to monitor their time spent online. They may carry a smartphone with them at all times. They probably want – and

need – some privacy. This is healthy and normal, as they're becoming more independent from their parents. The Internet can provide a safe "virtual" environment for exploring some newfound freedom if precautions are taken.

Talk about the sites and apps teens use and their online experiences. Discuss the dangers of interacting with strangers online and remind them that people online don't always tell the truth. Explain that passwords are there to protect against things like identity theft. They should never share them with anyone, even a boyfriend, girlfriend, or best friend.

Taking an active role in your kids' online activities helps ensure that they benefit from them without being exposed to the potential dangers.

March 11, 2023
28 Below Fatbike Race
 7:30 a.m.
 Spearfish Canyon Lodge
 Spearfish, SD
