# COOPERATIVE UPDATE

As of April 29, 2022

**Melissa Maher**  
Manager

Your capital credit allocation for year 2021 was provided on your most recent billing statement received in May (the amount can be found in the upper righthand corner of your bill). As a non-profit cooperative, owned by our members, we do not technically earn profits. Instead, any revenues over and above the cost of doing business are considered “margins.” These margins represent an interest-free loan of operating capital by the membership

to the cooperative. Allocated capital credits appear as an entry on the permanent financial records of the cooperative and reflect your equity or ownership in Moreau-Grand Electric. When capital credits are retired, a check is issued, or a credit is applied to your account and your equity in the cooperative is reduced.

This allocation cannot be used to pay a current bill; but rather will be paid out to each member in later years with board approval. The amount of capital credits you earn each year is based upon the amount of capital you contribute to the cooperative through payment on your monthly bills. The more electricity you buy, the greater your capital credit allocation.

A shout out to our members who dealt with power outages during the April storms. The hardest hit area due to ice load and heavy snow was in the Watauga and Morristown area. I once again got to reinforce why I love where I live. At a moment's notice, Sylvester Jacobs dropped what he was doing to assist pulling our crews around with

his tractor so they could make repairs to the line. I'm thoroughly aware that he had a lot going on at his own operation during the storm – but he took the time to assist his cooperative. Kindness like this doesn't go unnoticed.

As I write my report, I'm learning of more extensive storm damage in North Dakota. My heart goes out to people in North Dakota who experienced two major storms in the month of April.

Employee Update: I'm pleased to report that Ethan Aberle came back to work as an apprentice lineman on April 25. Ethan is from Promise and previously worked here from 2017–2019. We welcome him back to the team.

By the time you receive this newsletter – we should see lots of green grass (thanks to rain from heaven); farming will be going full tilt and summer plans will be well on their way. Your co-op has several projects scheduled for this summer construction period as well. One of the major projects for May will be installing a new transformer at the Dupree Substation – while then exchanging the removed transformer from Dupree into the Isabel Substation.

Until next month.... Continued prayers for rain – and praise for rain sent. Practice safety daily!

Snow and whiteout conditions near McIntosh, April 14. Photo By Line Foreman Jamey Pateneau

COMPARATIVE REPORT	Current (March 2022)	1 year ago (March 2021)	10 Years Ago (March 2012)	% Change in 10 years
Number of Meters	7,104	7,033	6,571	8%
Kilowatt Hours Sold	9,700,209	8,974,640	7,842,763	24%
Cost of Purchased Power	\$593,386.58	\$501,568.73	\$414,331.90	43%
Overall Ave. Rate / kWh Per Member	0.1136	0.119	0.1064	7%

## LOCATE YOUR ACCOUNT NUMBER

If you locate your account number anywhere in this or past issues of Moreau-Grand Electric's *Cooperative Connections*, you will be a winner and will receive a \$25 credit on your next bill! For example: \*1234. **Previous winners:** We have drawn nine member names since last October. Last winner was Steven S. from Isabel. Keep looking!

MOREAU-GRAND ELECTRIC COOPERATIVE CONNECTIONS is published monthly by Moreau-Grand Electric Cooperative, PO Box 8, 405 Ninth St., Timber Lake, SD 57656-0008, for the members of electric cooperatives across South Dakota. Families subscribe to Moreau-Grand Electric Cooperative Connections as part of their electric cooperative membership. Moreau-Grand Electric Cooperative Connections' purpose is to provide reliable, helpful information to electric cooperative members on matters pertaining to rural electrification and better rural living.

Subscription information: Electric cooperative members devote 50 cents from their monthly electric payments for a subscription. Nonmember subscriptions are available for \$12 annually. Periodicals Postage Paid at Timber Lake, S.D., and at additional mailing offices.

POSTMASTER: Send address changes to: Moreau-Grand Electric Cooperative Connections, PO Box 8, Timber Lake, SD 57656; Phone (605) 865-3511; Fax (605) 865-3340; e-mail [mge@mge.coop](mailto:mge@mge.coop); Web site [www.mge.coop](http://www.mge.coop). This institution is an equal opportunity provider, employer and lender.

Design assistance by SDREA

K&H boring crew

We continue to make excellent progress in preparation for our new office. K&H was on-site the third week of April to bore in the new underground. We are replacing one block of the existing overhead line to facilitate electrical service to the new Western Dakota Bank building and our new offices.

Linemen Troy Long and Chad Mettler installing new service for Western Dakota Bank.

## Pole Testing – Protecting Your Investment

Now in its fourth year, RAM Utilities pole testing company from Moorhead, M.N., will be testing distribution poles. Equipment and line inspection is a critical part of maintenance. This year, RAM will be working in the western half of Corson County.

A RAM Utilities pole technician removes dirt to inspect the pole for any signs of rot.

## ELECTRIC SAFETY

May is slated as Electric Safety Month, but your cooperative employees practice electric safety every day. On a regular basis, operations personnel test the conductivity of grounding cables and hot sticks as if their lives depend on it. AND IT DOES! These tools of the trade keep our linemen safe. \*2878

Lineman Brock Fischer tests hot sticks. Insulated hand tools designed to protect crews when energizing or de-energizing power line.

Area Foreman Josh Lemburg cleaning and testing ground cable. Properly grounded line keeps crews safe in the harshest of conditions.

## June is National Safety Month

While your local electric cooperative often focuses on electric safety and provides information to keep you and your family free from harm, there are many other dangers lurking out there.

In recognition of National Safety Month, we're sharing the National Safety Council's list of the top causes of preventable injuries and death away from the workplace.

**POISONING.** In 2011, accidental poisonings overtook car crashes for the first time as the leading cause of unintentional injury-related death for all age groups combined. Poisoning deaths are often caused by exposure to gases, chemicals and other toxic substances, but prescription drug overdose is by far the leading cause.

**VEHICLE CRASHES.** Crashes are the second-leading cause of unintentional injury-related death overall. Impaired driving, distracted driving, speeding and inexperience can cause a life to be cut short in the blink of an eye.

**FALLS.** Falling is the third-leading cause of unintentional injury-related death over all age groups, but it's the No. 1 cause of death for those aged 65 and older.

**CHOKING AND SUFFOCATION.** Choking on food or other objects is a primary cause of harm and death. Suffocation and choking rank higher among the elderly and infants.

**DROWNING.** It's the No. 1 cause of death for children from ages 1 to 4, mostly due to children falling into pools or being left alone and unsupervised in bathtubs.

**FIRES AND BURNS.** Fires often start at night, when families are asleep and most vulnerable. A working and well-maintained smoke alarm will cut in half the chances of dying in a fire.

**NATURAL AND ENVIRONMENTAL INCIDENTS.** Weather-related disasters claim hundreds of lives per year. You should learn all you can about emergency preparedness and always have an emergency kit on hand in your home.

## BOWLING FOR CHARITY IN MITCHELL

More than 80 cooperative employees showed up in Mitchell for the 7th Annual Line Patrol Charity Bowling Tournament sponsored by Central Electric. The Lacreek Electric Headhunters shown above (Tiff Pettit, Terri Gregg, Cody Allen, Ryan Pettit) took top honors. The event was organized to raise money for a fund used to help electric co-op employees and their families in times of need. Find out more about this event and South Dakota's electric cooperatives by visiting Cooperative Connections Plus. Simply scan the QR code at right.

## Call 811 before you dig

### Maddy Pannell

Maddy Pannell, age 10, reminds electric cooperative members to call 811 before digging into the ground when planting trees or pursuing other outdoor projects. Maddy is the daughter of Southeastern Electric members Scott and Kim Pannell of Sioux Falls.

Kids, send your drawing with an electrical safety tip to your local electric cooperative (address found on Page 3). If your poster is published, you'll receive a prize. All entries must include your name, age, mailing address and the names of your parents. Colored drawings are encouraged.

# DELICIOUS DAIRY

## SWEDISH CREME

### Ingredients:

- 2 cups heavy cream
- 1 cup, plus 2 tps. sugar, divided
- 1 envelope unflavored gelatin
- 1 tsp. almond extract
- 1 tsp. clear imitation vanilla extract
- 2 cups (16 oz.) sour cream
- 1 cup fresh or frozen red raspberries

### METHOD

In a saucepan, combine cream and 1 cup sugar. Cook and stir constantly over low heat until candy thermometer reads 160 degrees, or steam rises from pan. (Do not boil). Stir in gelatin until dissolved; add extracts. Cool 10 minutes. Whisk in sour cream. Pour into eight dessert glasses or small bowls. Chill at least 1 hour. Before serving, combine raspberries and remaining sugar; spoon over each serving.

**Joanne Singrey-Johnson,  
Watertown**

## TUNA EGG SALAD

### Ingredients:

- 3 6 oz. cans tuna packed in water
- 3 eggs hard boiled, peeled and chopped
- 2 small dill pickles diced
- 1 large celery rib diced
- 1/4 cup red onion minced
- 1 tbsp. lemon juice or red wine vinegar
- 2 tsp. garlic powder, optional
- 1/4 tsp. salt, or to taste
- Ground black pepper, to taste
- 1/2 cup plain Greek yogurt, 2% fat
- 2 tbsp. mayo

### METHOD

Drain cans with tuna well. Transfer to a large bowl and separate into flakes with a fork. Add chopped and peeled hard boiled eggs, pickles, celery, red onion, lemon juice, garlic powder (if using), salt, pepper, yogurt and mayo. Stir well with a fork and refrigerate. Serve cold in a sandwich or over salad greens. Make Ahead: Tuna egg salad tastes best cold. For best results, refrigerate 30 minutes before eating.

**ifoodreal.com**

## EASY SHERBET

### Ingredients:

- 1 pkg. orange or lime jello
- 1 cup boiling water
- 3 cups milk
- Pinch of salt
- 2 tbsp. lemon juice
- 1-1/4 cup sugar

### METHOD

Dissolve jello in boiling water. Add remaining ingredients. Freeze until 1/2 inch thick at edge of tray. Empty into mixing bowl and beat thoroughly. Return to freezer. This works well if put in a loaf pan.

**Joy Hagen, Webster**

## EXTRA GRILLED CHEESE

### Ingredients:

- 1 tbsp. butter, softened
- 2 tsp. Parmesan cheese, grated
- Dash of garlic powder
- 4 slices bread
- 2 slices sharp cheddar cheese
- 2 slices Swiss cheese

### METHOD

In a small bowl, combine butter, parmesan cheese, and garlic powder. Spread an even layer on one side of each slice of bread. Place 1 slice of cheddar cheese and 1 slice of Swiss between two bread slices, with the buttered side facing out. Cook in hot skillet for about 2 minutes, until the crust is golden. Flip sandwich and grill until crust is golden and the cheese is melted. Slice and serve. May add grilled onions if you choose. Just saute in the pan before cooking the sandwiches and add to the sandwiches between the cheese slices.

**Kristina Manecke, Midland**

**Please send your favorite recipes to your local electric cooperative (address found on Page 3). Each recipe printed will be entered into a drawing for a prize in December 2022. All entries must include your name, mailing address, phone number and cooperative name.**

### Q: I am considering a solar array on the roof of my home. What steps should I take with efficiency and energy savings in mind?

**Miranda Boutelle**  
Efficiency Services  
Group

A: When I tell people I work in energy efficiency, one of the first responses I hear is, “Oh, I’m thinking about getting solar installed on my house.” I hear it around campfires, meeting other parents at the park and on the ride to the airport.

Most people don’t realize solar is not energy efficiency. Solar is generating energy. Energy efficiency is finding ways to use less energy. I can see the association because both are thought of as beneficial to the environment and a way to save money.

My follow-up question is, “What are your motivations for installing solar?”

In my experience, people are motivated by saving money, concern for the environment or both. Focusing first on energy efficiency addresses both motivations. Here are considerations if you are interested in installing solar.

#### **ENERGY CONSUMPTION**

Solar systems are sized based on a home’s energy needs. The larger the system, the higher the cost. Before installing solar, make sure your home is as energy efficient as possible. It will use less energy and allow you to install a smaller system - which will save money and reduce your home’s environmental impact.

Verify the efficiency of your lighting, HVAC systems and insulation. A fully insulated and air-sealed home uses less energy, and those measures are less expensive than solar panels. Finish these energy efficiency projects before installing solar.

#### **AFFORDABILITY**

Consider your overall out-of-pocket expenses. The expected lifespan of a heating and cooling system is 15-25 years. Check the age and condition of your HVAC equipment and consider the expenses of replacement. If

something happens, will you be able to afford to fix or replace it?

#### **ROOFING**

Consider the age, orientation and shade of your roof. It is more difficult - and expensive - to reroof a home with solar panels. Will the roof need to be replaced before the solar panels need to be replaced?

The best orientation for solar panels is south-facing to receive direct light throughout the day. A shaded roof helps keep your home cool in the summertime but reduces solar energy production.

#### **MAINTENANCE**

A solar system doesn’t last forever. Lifespans range 25-30 years. As systems degrade over time, they produce less energy. Maintenance and repairs may be needed.

#### **ELECTRIC BILLS AND STORAGE**

Solar is not “off the grid.” Unless you plan to disconnect from your electric co-op, you will still receive a monthly bill.

Solar panels only produce power when the sun is shining. If you want power to your home at other times, like after dark, you need to be connected to your electric co-op or invest in a battery storage system - that comes at an additional cost.

During power outages, don’t assume solar panels will supply you with power. Typical solar interconnection to the grid requires the panels to shut down during a power outage. This protects lineworkers from injury while making repairs.

#### **CONTACT YOUR ELECTRIC CO-OP**

Solar contractors often work in several utility service territories and may not be familiar with your co-op’s offerings, rate structures and interconnection agreements.

Before signing an agreement, check with your electric co-op for local information rather than relying on what the contractor says.

As with any other system for your home, I recommend getting bids from three contractors to compare equipment and pricing.

Ryan Perrion prepares for the World Axe Throwing League championships in Minneapolis in July. *Photo by Billy Gibson*

## Perrion works hard on his ‘axe-pertise’

**Billy Gibson**

billy.gibson@sdrea.coop

Just about anyone can hurl a hatchet toward a stationary target. Hitting the bullseye? Well, that’s going to require some practice.

Ryan Perrion is putting in all the practice time he can muster as he prepares for the 2022 World Axe Throwing League Championship (WATL) competition set for Minneapolis in July.

Ranked No. 33 in the overall WATL standings going into the tournament, Perrion is honing his hatchet blade – and his skills – in his quest to bring the world title back to his home in Aberdeen.

“I’m pretty confident in my abilities because I’ve put in the work to be the best I can be,” Perrion said. “A perfect score is 64, and right now I’m averaging about 55 or 56 in league play. Like a lot of sports, anyone can have a good match but consistency is the hard part.”

As a member of the WATL pro league and several regional leagues, Perrion also has plans to compete in Pennsylvania,

Missouri and Wisconsin in the coming months.

Perrion’s interest in the sport started out as a hobbyist. He set up a target in his back yard and as his abilities increased it was clear this wasn’t just a passing fad in his life. Perrion and his wife Amanda decided to go all in and open an indoor range to spread the axe-throwing love to the community. They launched Hub City Axe Throwing in Aberdeen with the goal of providing a venue for clean family fun.

“We built this place to bring a new sport into town and for families to get together and have a good time. That’s our true focus. I have four little kids and they love throwing things. You’re not allowed to throw a real hatchet until you’re 12, but kids like to come in here and throw foam axes and they have a great time with their parents. Anyone can do it at any level.”

Another goal, Perrion said, is to work with individuals of all ages and abilities and make them more knowledgeable about the sport and more skilled than when they arrived.

Meanwhile, interest in the sport is increasing both locally and across the region. Supervised lanes and leagues are available in Sioux Falls, Rapid City, Spearfish and Madison. Woody’s Axe Throwing has facilities in Brookings and Sioux City, Iowa, and also has a mobile throwing range ready to roll.

While some questioned the safety aspect when Perrion was proposing the new axe-throwing facility, he said he’s never witnessed or heard of an incident where someone was injured by a thrown axe. He said all safety precautions are taken at Hub City to ensure safety, including sturdy chain-link barriers between the venue’s eight lanes.

Hub City offers recreational play, league play and special events. There’s also Glow Throws held on Friday nights to spice things up and add to the adventure.

“I find that it’s not only fun but very stress relieving,” Perrion said. “You can get a rush of adrenaline when you get a bull’s eye, but you also have to quiet your mind, settle down and focus.”

# DEEP DIVES

Dozens of scuba divers from South Dakota and Minnesota pursue their hobby not only in local lakes and rivers but also in the Caribbean. *Photos by Steve Nedved*

## Divers explore underwater habitats from the lakes of the Upper Midwest to the Caribbean

**Billy Gibson**

billy.gibson@sdrea.coop

It's a sunny springtime Saturday morning and outdoors enthusiasts all across the state are buzzing with excitement to kick off another weekend adventure.

They're saddling up their horses, slinging their fishing gear into their boats, cranking their ATVs and lacing up their hiking boots.

In a small shop just south of Mitchell, there's a different kind of energy and amped-up anticipation filling the air. Steve Nedved is busy rigging up scuba tanks and inspecting air regulators for about 20 fledgling divers eager to learn a new skill and experience new thrills.

Nedved is owner of Dakota Scuba and he's finding that more and more adventurers are becoming interested in exploring the aquatic world through a fisheye view, whether that's in the chilly waters of the Missouri River or the crystal-clear surf of the Caribbean.

While the scuba diving season in

the Upper Midwest is relatively short, Nedved stays busy most months out of the year teaching scuba lessons in the Mitchell area and tending to vacationing clients from his Villa Dakota retreat in Cozumel.

It turns out that he and his student-clients can board a plane in Sioux Falls at 7 a.m., make a quick stop in Dallas-Ft. Worth, and be ready to hit the water in Cozumel just after lunch.

"It works out pretty well, and people love to take a fall and winter vacation and explore Cozumel, which is one of the best spots for diving because the visibility can be more than 100 feet and there's so much marine life to see," Nedved said.

The master diver's interest in scuba was sparked back when he was a firefighter and paramedic in Mitchell. After responding to too many emergency situations involving bodies of water, he and his colleagues decided they needed to be trained in diving as part of meeting their professional responsibilities and serving the public.

He received his certification in short order and later decided to venture down to Cozumel to earn his teaching certification through the Professional Association of Dive Instructors so that he could be qualified to train his colleagues back in Mitchell.

He and his wife Nancy, who together own the Nedved Media radio network, fell in love with the tropical paradise and after a dozen diving trips decided it made sense to purchase a home right on the water. Before he knew it, he found many others were beating the same path to Mexico to enjoy the sun, sand and scuba adventures.

"I didn't really start it with the intention of going public, I just didn't realize at the time how much interest there was," he said. "People around here in Mitchell started asking me to train them for recreational certification and then they'd dive here or they'd go to Florida or Cozumel on vacation with their families. We started renting out our place in Cozumel to accommodate people during the times we couldn't be there ourselves."

He also noticed an increasing interest in spearfishing in places like the Oahe

## SCUBA DIVING

Steve Nedved is shown at left with his catch after a day of spearfishing at Sully Flats. Above, Nedved (at right) works with student Allen Hiller on open water certification.

Downstream Recreational Area and Pactola Lake in the Black Hills, so he decided to open the shop to serve as a local and regional outfitter.

Nedved, who has logged more than 1,000 dives since he started in 2006, uses the Mitchell Recreation Center for local training and has played a role in certifying individuals from age 10 to 70.

“It’s not that physically laborious or difficult. Of course, you have to be in condition as with any kind of outdoor sport, but it’s not inherently dangerous in any way if you follow the guidelines,” he said.

Allen Hiller of Pierre is one of Nedved’s recent proteges. Though he had done some snorkeling and diving at sites like Sully Flats, Cow Creek and below the Oahe Dam, Hiller decided he wanted to kick his scuba game up a few notches. So he enlisted Nedved’s services and spent eight days at Villa Dakota last March earning his open water diving certificate.

At the age of 53, Hiller is a veteran of Desert Storm and Desert Shield, a former diesel and aircraft mechanic,

and spent nearly 20 years working for the Union Pacific Railroad in North Platte, NE. He describes himself as an avid hunter and fisherman who is always up for an adventure. Since his visit to the Caribbean, Hiller says he wants to expand his knowledge and experience under water.

“I really caught the diving bug being down there in a beautiful part of the world with the sun and the sand and the clear water where it seems like you can see forever. I want to continue on and get my PADI certification, my night diving certification, and become a master diver,” Hiller said. “I also want to do a lot of spearfishing and learn how to get better at it. Steve was really great to work with.”

Nedved said that once his students become accustomed to the awkward act of breathing through a mouthpiece, they begin to relax and enjoy the experience of discovering a new environment with different lights, colors and sounds.

“People like to hunt for fish and explore underwater quarries and see what’s on the bottom of the river bed,” he said. “When I take them out for the first

## SCUBA RULES

Here are four requirements for scuba diving in South Dakota:

- Divers are required to use a red and white Diver Down flag when diving
- Dive flags must be at least 8"x10"
- Divers must stay within 75 feet of their dive flag
- Boaters and vessel operators are required to stay at least 75 feet from dive flags

time, we can’t really speak when we’re underwater, but when we come up they start chatting away with excitement about the things they saw. It’s really addictive. You rarely see just one person in a family that’s a diver. Usually, after one person does it, the others have to follow. It’s a good sport for a lot of people.”

Snow and whiteout conditions near McIntosh during the April storm. Photo By Line Foreman Jarney Pateneau

**Roger Lawien**  
Member Services  
& IT Director

Oh my! How time flies. It's hard to believe that it's been 23 years since I walked through the doors as a new employee of Moreau-Grand Electric Cooperative. In the 23 years that I've been

here, I have seen a lot of change. We truly operate a modern electric cooperative on your behalf. I am a tech junkie! I could fill up pages documenting the advancement that your cooperative has seen and made happen as well as what we are building for the future. But that is not what this article is about. It is about you and your employees. Along this journey, I've had the unique opportunity to collaborate with so many talented, warm-hearted and member-focused cooperative employees and members. Both at our cooperative and across the region. Legends who have retired after a life's worth of member service and new staffers just beginning their careers.

**Heraclitus, a Greek philosopher, is quoted as saying "change is the only constant in life."** Obviously,

Heraclitus never worked with a cooperative. One thing has been consistent and a constant source of strength: relationships. Our trust-filled, signature relationship with our members sets us apart from other types of utilities. Relationships are why we are dedicated to helping you, our member-owners. We define success as anticipating, meeting and exceeding the needs of our members and colleagues.

We offer several ways for you to interact with us such as SmartHub, Facebook and email. SmartHub is the free service we provide enabling you to track your usage, download monthly statements or make a payment.

But, at our core, are the one-on-one relationships. Knowing that when you need us, we will be there 24/7/365. During the recent spring storm, crews worked late into the evening to restore electricity to as many as possible. Forging ahead until darkness, concern for safety and deteriorating weather forced them to stop. Office personnel manned phones, documenting outages and orchestrated safe and efficient power restoration. To use a baseball metaphor, "While we do not hit it out of the park every time, know that we will keep stepping up to the plate as we have for the past

75 years, with our head in the game for you our member/owners."

In a world of chaotic change, it is imperative to grow, nurture, and strengthen our relationships. Your employees are members just like you. Pick up the phone, or better yet, stop by one of our offices. Let us know how we are doing.

People caring for people is what our cooperative is all about and why we come to work every day.

High winds and ice placed a lot of strain on the power lines. Photo by Staking Foreman Hunter Smith

# April 2022 Board Minutes & February 2022 Financial Information

The April 19, 2022, board of directors' meeting was held at the Timber Lake office with the following directors present: Bartlett, Clark, Hieb, Keckler, Landis, Lawrence, Maher, McLellan, Walker and Wall, and others present: Manager Maher, Finance Officer Dahlgren (Delegated Recorder of Minutes), and Traci Hanson from Ketel Thorstenson LLP.

The Large Power Users monthly report was given by Sue Sherwood, which included topics on large power usage and payments.

The Member Services report was given by Roger Lawien, which included computer security, participated in online security sessions, SmartHub, safety demo in area schools, Basin tours, Basin/Rushmore Scholarship winner, Veterans housing workshop, Spring Member Services meeting, and distributed a Line Patrol flyer.

The Operations report was given by Kent Larson, which included April storm outages, fire damage, discussed abandoned and inactive services, SDREA Safety meeting testing grounds and hotsticks, and discussed the Dupree and Isabel substation transformer changes.

Line Superintendent Larson gave an update on the new headquarters building.

Manager Maher gave the Managers report that included collections, City of McLaughlin cancelled their meeting with the Board and will try to reschedule, wheeling con-

tract, employee changes, and large meter testing.

Traci Hanson with Ketel Thorstenson LLP presented the 2021 audit report to the Board.

The Bylaw Committee set May 17 at 7:30 a.m. for the Bylaw Committee meeting.

The Board discussed and registered for the Rushmore Electric annual meeting scheduled for June 8 at The Lodge in Deadwood.

Manager Maher gave the Rushmore Managers meeting report that included member round table discussion, personnel changes, discussed consolidated services, lobbyist, WAPA rates, load control, solar demo trailer, and member cooperative issues.

Director McLellan gave the SDREA Board meeting report that included discussions on the NRECA PowerX-change presentations, retirements and personnel changes, Board Leadership Summit, policy changes, member round table discussion and approved FFA donation.

Board approved the following: the agenda, the minutes from the March meeting, new members, refunds, line extensions, financial statistics, disbursements, safety report, the 2021 audit report, Director McLellan as the delegate and Director Walker as the alternate for the Rushmore Electric annual meeting, SD Department of Tribal Relations donation at the Wowaste "Kindness" level, CFC Integrity Fund donation, and Special Equipment Summaries #432-434 in the amount of \$15,604.73.

The next board meeting was scheduled for May 17, 2022, at 8:30 a.m. in the Timber Lake office.

## FEBRUARY 2022 FINANCIAL INFORMATION

	FEBRUARY '22	FEBRUARY '21	YTD 2022

Kwh Sold	10,363,826	10,934,181	22,044,227

Desmond Dean of Dakota Sports in Aberdeen says e-bikes are all the rage among outdoors enthusiasts. *Photo by Billy Gibson*

## Electric bicycles give riders the little extra push they need - or not

**Billy Gibson**

billy.gibson@sdrea.coop

Sometimes when you find yourself struggling to move ahead, all you need is a little boost to get where you need to go.

That's the idea behind the invention of the electric bicycle. For those who enjoy mountain biking, pedaling for fitness or just commuting back and forth to work in the open air, the electric bike is becoming the cycle of choice.

Desmond Dean is manager of Dakota Outdoors in Aberdeen and he reports that sales are brisk with his line of Trek e-bikes. The first misconception he typically has to address with his growing list of curious customers is that an e-bike isn't a motorcycle.

"It's a bicycle. There's no throttle and you're in complete control the whole time. The battery and small motor are just there to give you some assistance when and if you need it," he explained.

"They're getting so popular because you can get a wide range of exercise. If you're having trouble with the wind or going up a hill, or if you just want to increase your distance, you can get the extra push you need. You can get some assistance or no assistance."

A battery usually takes about 5-6 hours to fully charge and there are models built for navigating off-road trails, touring, cruising or just moving around town from one point to the next. Prices can range from a few hundred dollars for a youth model to several thousand bucks for adult versions. Some bikes can top out at nearly 30 mph in the highest gear settings and some sweat equity.

Dean highly encourages his customers to take his e-bikes out for a spin around Aldrich Park across from the store because once the shopper puts the Trek through its paces and gets accustomed to the experience, "the bikes tend to sell themselves."

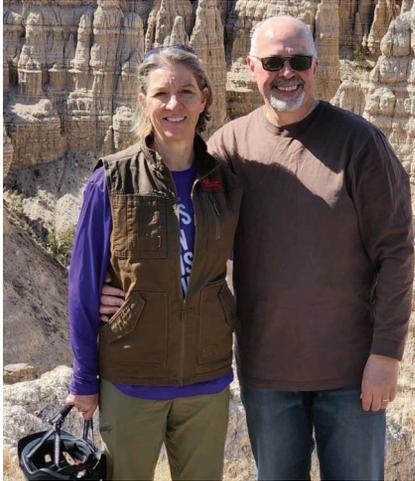

Mary Duvall, a state senator from

Pierre representing District 24, is a life-long fitness buff and has done a lot of pedal pumping over the years. So when her husband Rob suggested they purchase a pair of e-bikes, she was admittedly skeptical. What would be the point of pedaling if you're not going for the burn?

"I looked at it like it would be cheating and we wouldn't get a quality workout," she said. "But I quickly learned I was wrong. I can work as hard as I want and get whatever workout I feel like, or take it as easy as I want, depending on the day."

The Duvalls invested in his-and-her Aventons with thick sturdy frames and wide tires for handling uneven surfaces like the Black Hills, the Badlands and the undulating terrain around Pierre. They also chipped in for safety helmets equipped with an intercom system so they can keep in constant audio contact.

The couple covered 80 miles in a single day on the Mickelson Trail, stopped overnight in Hill City to recharge their batteries and their weary quadriceps, then rode another 56

miles the following day. They ended up encountering another couple who had hauled their e-bikes from Texas to tour the Mickelson Trail. Another couple they met from Minnesota were using their e-bikes to complete the entire trail from Edgemont to Deadwood.

“We ride them at least once a month and they’ve opened up lots of options that we couldn’t tackle with regular bikes,” Duvall said. “It’s a fun way for us to get outside and enjoy some exercise and fresh air.”

its own pedal-assist system. By the end of 2023, worldwide e-bike sales are expected to reach 40 million units, or more if gas prices continue to escalate.

Surveys consistently indicate most e-bike buyers make the purchase with the goal of replacing trips they’d otherwise take in their cars. But Ron Block of Webster bought his for another reason: he needed to keep up with his wife Nancy, a school teacher who also

happens to be a competitive marathon runner.

“She was leaving me behind, so I figured I needed some assistance to make it a little easier on me,” Ron said. “I rode a lot when I was a kid, but now I’m middle-aged and the bike gives me the ability to set the power to however much help I need.”

The Blocks enjoy biking together each week as part of a local cycling club, though occasionally they like to venture farther afield. Last summer, they biked among the giant redwoods in northern California and Oregon and also pedaled the Katy Trail in Missouri. This year they plan to take a trip to The Netherlands and rent bikes to see the sights.

Ron said he would encourage those who may be interested in purchasing an e-bike to find a nearby dealer, or find a friend who already has one and ask to take it for a test ride.

“That’s what I did before I bought one and I’ve been very satisfied,” he said. “I’ve talked to a lot of people who have them and they’re very happy they made the investment.”

Approximate number of e-bikes

**40 million**

expected to be sold worldwide in 2023

Of course, the idea of attaching a small battery-powered motor to a bicycle frame isn’t new. The first patent for an e-bike was issued in 1895. There was a global surge in sales of 35 percent between 1993 and 2004 after Yamaha invented, manufactured and marketed

# FUN AND FISHING ON PACTOLA LAKE

Pactola Lake near Rapid City holds different interests for different outdoor enthusiasts. *Photos by SD Tourism*

## Pactola Lake has something for everyone, from anglers to history buffs

**Billy Gibson**

[billy.gibson@sdrea.coop](mailto:billy.gibson@sdrea.coop)

Pactola Lake is a unique body of water nestled in the heart of the Black Hills that has come to mean many different things to many different people.

For outdoors adventurers, the 1.1 square mile lake offers a wide range of activities including boating, camping, canoeing, fishing, swimming, paddle boarding, beach combing, hiking and even scuba diving for those interested in capturing an up-close glimpse of the aquatic life that teems throughout the underwater habitat. Fly fishing is a popular pastime for anglers in the shallow waters of Rapid Creek.

Tourism promoters have dubbed

Pactola Lake as South Dakota's version of Atlantis because the lake bed was once the site of a small town that was submerged after Pactola Dam was constructed and the area was flooded in the mid-1950s.

However, explorers today will find very little left of the old town's structures as most were moved or auctioned off when plans for the dam were made public. The Bureau of Land Reclamation clear cut and cleaned off what would eventually become the lake bottom. One of the few buildings still standing in the deep water is the old Civilian Conservation Corps camp dynamite bunker. Scuba divers have reported finding construction equipment and portions of the train tracks in the depths.

Conservationists and biologists study the Pactola Reservoir Complex area for its abundant wildlife habitat and diverse landscapes, while civil engineers operate the reservoir as a means of flood control and as a source of water for the Rapid City metropolitan area - including Ellsworth Air Force Base - located about 15 miles to the east. Farmers also rely on the embankment dam to irrigate their crops.

For historians, Pactola Lake holds a special curiosity as a former hunting ground for Native American tribes and a site where miners went to seek their fortunes and pursue their quests for gold in violation of the Treaty of Fort Laramie. The small settlement that emerged was named for Gen. George Crook, a U.S. Cavalry leader in charge of keeping the ambitious miners away and upholding the terms of the treaty,

Paddlers catch some exercise while enjoying the serene surroundings of Pactola Lake.

although the hills were eventually opened up to prospecting activity in February of 1876. The village was later named Pactola after the legendary “golden sands” that were said to be found along the ancient Pactolus River located in modern-day Turkey.

History buffs also delve down into Pactola’s intriguing past as a thriving boom town in the 1870s where claims were being filed at a breakneck pace and more than 300 miners flooded the place decades before the waters did.

One of the first post office facilities in the Black Hills was established there, two stage lines served the town’s residents and the Black Hills and Western Railroad laid down train tracks to set up a main transportation line. The Sherman House hotel was the center of social activity and a popular gathering place for locals and travelers alike.

During the summer months, children would make the trip from nearby towns to take part in the Presbyterian and Methodist church camps.

To fishermen, in particular, Pactola Lake is prime spot for landing lunker rainbow trout, brown trout, crappie, largemouth bass, bluegill and Kokanee salmon. Below the surface, spearfishing scuba divers stalk bigmouth buffalo.

David Hollister, a CAD specialist at Rushmore Electric in Rapid City, enjoys taking his family out to the lake during the weekends and holidays when the weather cooperates. He and his wife, Jade, like to enjoy the scenery with son Bryce along the hiking trails and they occasionally launch a kayak to explore Jenny Gulch, a shallow, no-wake, area.

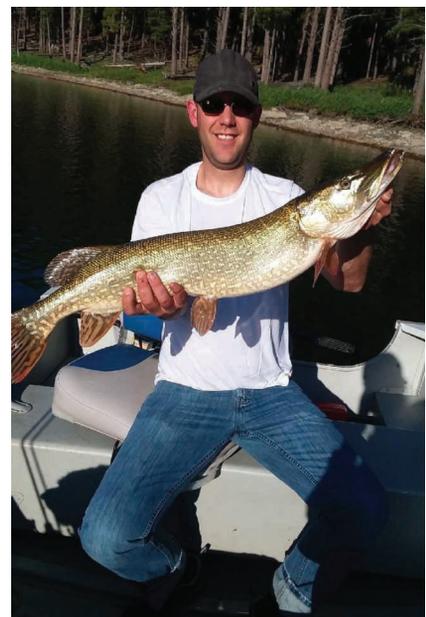

David also enjoys the thrill of fishing for trout and pike as he’s done for the past 10 years. He’s not too proud to admit that Jade often brings home the biggest catch.

“The natural beauty is a huge draw. Everywhere you look it’s gorgeous and the fishing is great. They get big and fight hard,” he said, noting that his personal record for trout is 32 inches. “It can be a challenge because the depth can change pretty drastically from the shoreline to 100 feet. It takes a little time and effort to learn the lake.”

The Pactola Reservoir Complex is open year-round and costs \$6 per vehicle per day. The U.S. Forest Service operates the Pactola Visitor Center, which is located at the south end of the dam. The center provides interpretive exhibits, travel information and a scenic view of the water. There’s also a marina located at Custer Gulch on the south

shore. The privately owned facility has a capacity of 200 vessels and has fishing boats, canoes and paddle boards for rent to the public.

For more information on the area, visit the U.S. Forest Service’s website at [www.fs.usda.gov/](http://www.fs.usda.gov/). Boat ramp data can be found on the Bureau of Reclamation website for Pactola and Deerfield Reservoirs at [www.usbr.gov/gp/boat/](http://www.usbr.gov/gp/boat/).

David Hollister enjoys angling for lunker pike at Pactola Lake.
