# Who Owns What?

## Understanding Electric Equipment Responsibilities

**Kent Larson**  
Manager

As July rolls in with longer days and rising temperatures, it also brings the increased potential for severe weather. Summer storms can arrive quickly and hit hard, sometimes causing significant damage to essential electric equipment throughout our community.

Moreau-Grand Electric Cooperative is always prepared to respond swiftly to outages and restore power safely, but it is also important for homeowners to understand which parts of the electric system are their responsibility and which are maintained by us at the co-op. Understanding these key differences can help speed up repairs and ensure everyone stays safe when the weather turns rough.

Moreau-Grand is responsible for maintaining and repairing the equipment and lines that run to your home, including utility poles, distribution power lines, electric meters and padmounted transformers.

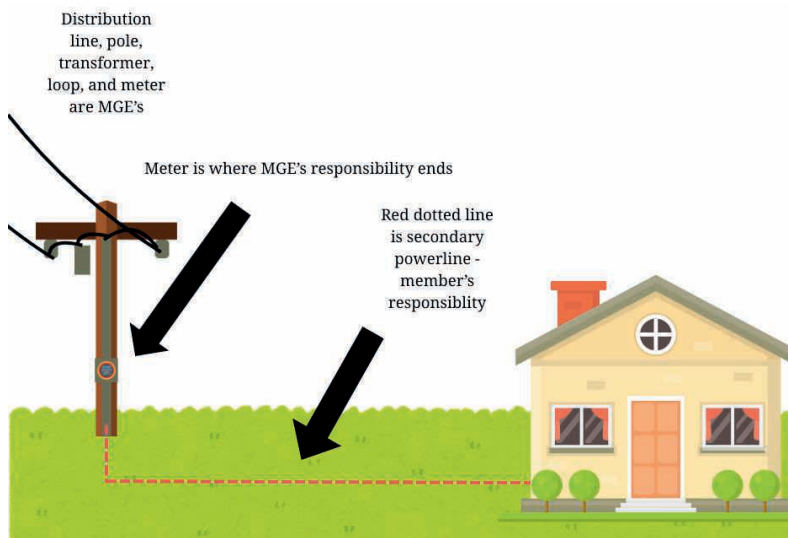

Diagram shows how MGE's ownership typically ends at the meter.

Moreau-Grand members are responsible for the equipment located between the electric meter and your home or business, including any underground service lines that lead into the structure and the service panel.

If any equipment that you (the homeowner) are responsible for is damaged, please call a licensed electrician to conduct the repairs. A professional has the experience and know-how to assess and manage these types of repairs.

When severe weather damages electrical equipment, it's important to note that any necessary repairs to the homeowner's equipment must be conducted before Moreau-Grand crews can restore power to your home or business. By understanding the equipment you are responsible for, the repair and restoration process will be smoother and faster.

Our community takes great pride in the beautiful trees and landscaping that contribute to the natural beauty where we live, however, regular trimming is essential to ensure reliable electric service and minimize damage from severe weather. Moreau-Grand regularly trims trees throughout our service territory to improve service reliability. If you spot a tree limb that is obstructing a distribution power line outside your home, please call us at 1-800-952-3158 so we can trim those limbs and maintain those lines.

Any overgrown limbs or vegetation around the service line is the homeowner's responsibility, and in these cases, please call a professional tree trimming service to assist.

By working together to understand the essential equipment that powers daily life, we can all be better prepared to start the repair and restoration process if severe weather impacts our community.

If you have any questions about your electrical equipment, we're here to help. Please contact Moreau-Grand at 1-800-952-3158.

MOREAU-GRAND ELECTRIC COOPERATIVE CONNECTIONS is published monthly by Moreau-Grand Electric Cooperative, PO Box 8, 823 Main St, Timber Lake, SD 57656-0008, for the members of electric cooperatives across South Dakota. Families subscribe to Moreau-Grand Electric Cooperative Connections as part of their electric cooperative membership. Moreau-Grand Electric Cooperative Connections' purpose is to provide reliable, helpful information to electric cooperative members on matters pertaining to rural electrification and better rural living.

Subscription information: Electric cooperative members devote 50 cents from their monthly electric payments for a subscription. Nonmember subscriptions are available for \$12 annually. Periodicals Postage Paid at Timber Lake, S.D., and at additional mailing offices.

POSTMASTER: Send address changes to: Moreau-Grand Electric Cooperative Connections, PO Box 8, Timber Lake, SD 57656; Phone (605) 865-3511; Fax (605) -865-3340; e-mail mge@mge.coop; Web site www.mge.coop. This institution is an equal opportunity provider, employer and lender.

Design assistance by SDREA

## May 20, 2025 Board Meeting Minutes and March 2025 Financial Information

The May 20, 2025, board of directors' meeting was held at the Timber Lake office with the following directors present: Bartlett, Clark, Hahne, Keckler, Lawrence, Maher, McLellan, Schweitzer, Walker and Wall, and others present: Manager Larson, Finance Officer Lemburg (Delegated Recorder of Minutes) and Attorney Burke.

The Large Power Users monthly report was given by Stephanie Bartlett, which included large power usage and payments.

The Member Services report was given by JJ Martin, which included a new phone system, recent CenturyLink outage, advertising videos with Odney and Basin Electric, presented scholarship certificates at local school award days, activity with the Timber Lake Kindergarten class, and update on the Washington D.C. Youth Tour.

The Operations report was given by Josh Lemburg, which included the Eagle Butte to Dupree line conversion project is nearly complete, West Watauga road move update, new services, system improvements, Ridgeview transmission line damage update, working with Power System Engineering for the Ridgeview transmission line repairs needed, Safety Summit report, and CRST easement updates.

Manager Larson gave the Manager's report, which included an update on repairing the cold storage building, demolishing the old headquarters building, Prelude, LLC update, SDREA's former manager passed away, previous MGEC director's wife passed away, presented Director Hahne with a NRECA Director CCD Credential certificate, upcoming employee retirement, Eagle Butte Apprentice Lineman Brent Spafford will transfer from the Eagle Butte outpost to Timber Lake, Eagle Butte Journeyman Lineman Jace Vrooman will become the Assistant Staking Engineer and Meter Technician, currently advertising for two linemen, potential large solar project, provided rate comparisons for all the cooperatives in South Dakota, and gave a heat meter rebate update.

Manager Larson and JJ showed a video on the construction of the solar project by New Underwood, and Manager Larson provided statistics on this project.

For the 2025 annual meeting, the board will continue the Good Neighbor Award and will recommend nominees at the June board meeting.

Attorney Burke presented a draft of a revised Certificate of Delegation to be used when voting on behalf of an organization, in which additional revisions will be made.

Manager Larson discussed the increased costs of the annual meeting meal and the difficulty obtaining a group to bid and serve the meal. It was the consensus of the board and Manager Larson that the MGEC employees cook and serve the annual meeting meal.

The board briefly discussed the CFC Integrity Fund, which the CFC Board of Directors voted not to seek contributions for the integrity fund this year.

Director McLellan gave the Rushmore Electric Board meeting report, which included Cory Trapp filling in for Manager Hammerbeck, retirement luncheon for Accountant Darci Lanam, financial report, load control report, capital credit retirement, voting delegates, changed banks due to numerous fraudulent checks, annual meeting will be June 4, 2025, in Deadwood, replacing the load management software, and load growth.

President Maher gave a brief report of his interview to serve on the CoBank Board of Directors and stated he was not selected to serve on the CoBank board.

Board approved the following: the agenda, the minutes from the April meeting, new members, refunds, line extensions, financial statistics, disbursements, safety report, no changes to the bylaws, adding language to the annual meeting in-house agenda to announce the exact time when the voting ballot boxes will close, holding the 2025 annual meeting October 8, 2025, in the MGEC headquarters shop with the meal to begin at 5:00 p.m. MT, voting against the proposed CFC Bylaw amendments, Dupree Rodeo Committee donation, and denied the Rock Creek Grant School bike donation request.

The next board meeting was scheduled for June 17, 2025, at 8:30 a.m. in the Timber Lake office.

# Playground Safety

*Source: National Safety Council*

According to the Consumer Product Safety Commission, each year, more than 200,000 children go to U.S. hospital emergency departments with injuries associated with playground equipment.

As the weather warms up and trips to the park become frequent, take a moment to familiarize yourself with the risks on playgrounds and how you can prevent injuries.

### Check for Playground Hazards

Nearly 80% of playground injuries are caused by falls. Watch out for these potential hazards when taking kids to the playground, and report any hazards observed.

**Improper ground surfaces:** Surfaces around playground equipment should have at least 12 inches of wood chips, mulch, sand or pea gravel, or mats made of safety-tested rubber or rubber-like materials. Playgrounds should be free of exposed concrete footings, rocks or tree stumps.

**Overcrowded play areas:** The area under and around play equipment should be a minimum of 6 feet in all directions while swing set areas should be twice the height of the suspending bar both in back and front of the swings. Structures more than 30 inches high should be at least 9 feet apart.

**Unprotected elevated areas:** Platforms higher than 30 inches should have guardrails or barriers.

**Head entrapment spaces:** Openings between rails, bars, rungs and even ropes of cargo nets should be less than 3 1/2 inches or more than 9 inches.

**Sharp points and edges:** Playground equipment should be free of protruding bolt ends, “S” hooks, and other sharp points and edges.

Visit the American Academy of Pediatrics webpage on playground safety to learn more.

### Avoid Strangulation Hazards

The American Academy of Pediatrics cautions that children should not wear or play with anything that could get caught on equipment and become a strangulation hazard.

- Never attach or allow children to attach ropes, jump ropes, clotheslines or pet leashes to play equipment.
- Leave sweatshirts with drawstrings and necklaces at home.
- Remove bike helmets when playing on the playground.

### Be Cautious of Too Much Sun Exposure

Playgrounds should have full or partial sun protection between 10 a.m. and 2 p.m., peak exposure time.

- Limit playtime at peak sun exposure time and know the signs of heat illnesses.
- Avoid burns; if playground equipment is hot to the touch, it is too hot for your child’s bare skin.

### Allow Only Age-Appropriate Activities

The Consumer Product Safety commission lists age-appropriate equipment in the Public Playground Safety Handbook. There is no substitute for parental supervision, especially for young children.

### "Don't go outside during lightning storms!"

#### Marah Kinnunen, Age 8

Marah warns readers about the dangers of going outside during a lightning storm. Thank you for your picture, Marah! Marah's parents are Reuben and Sarine Kinnunen from Hayti, S.D.

Kids, send your drawing with an electrical safety tip to your local electric cooperative (address found on Page 3). If your poster is published, you'll receive a prize. All entries must include your name, age, mailing address and the names of your parents. Colored drawings are encouraged.

# Delectable CHICKEN

## CHICKEN MILANESE

### Ingredients:

1 pkg. McCormick® Chicken Parmesan One Sheet Pan Seasoning Mix  
1/4 cup grated Parmesan cheese  
1 lb. thin-sliced boneless skinless chicken breasts  
1 tbsp. oil

### Method

Preheat oven to 400°F. Empty Seasoning Mix into shallow dish. Add Parmesan cheese. Brush chicken with oil. Coat evenly on both sides with Seasoning Mix. Discard any remaining Seasoning Mix.

Place chicken in single layer on foil-lined shallow baking pan sprayed with no stick cooking spray.

Bake 15 minutes or until cooked through, turn chicken halfway through cook time.

**McCormick.com**

## SWEET AND SOUR CHICKEN

### Ingredients:

3 boneless, skinless chicken breasts  
2 tbsps. fat or oil  
1/4 cup water  
2 tbsps. cornstarch  
1/2 tsp. salt  
1/4 cup brown sugar  
1/4 cup vinegar  
20 oz. can pineapple chunks (drained, reserving juice)  
3 tbsps. soy sauce  
3/4 cup green pepper strips  
1/4 cup onion (thinly sliced)

### Method

Cube chicken into one inch squares; brown in fat. Add water. Cook in water until tender. In another pan combine cornstarch, salt, brown sugar, vinegar, pineapple juice and soy sauce.

Cook until slightly thick, stirring constantly. Pour sauce over hot chicken. Let stand at least 10 minutes. Add green pepper, onion, and pineapple chunks. Cook two to seven minutes until warmed through. Serve over hot rice. \*Makes 4 servings.

**Jan Grage**  
Clay-Union Electric Member

## CHICKEN POT PIE

### Ingredients:

1 pkg. prepared pie crust (top and bottom)  
1/3 cup butter or margarine  
1/3 cup chopped onion  
1/3 cup all-purpose flour  
1/2 tsp. salt  
1/4 tsp. pepper  
1 3/4 cup Progresso™ chicken broth (from 32 oz. carton)  
1/2 cup milk  
2 1/2 cup chicken/turkey (shredded, cooked)  
2 cups frozen mixed vegetables (thawed)

### Method

Heat oven to 425°F. Prepare pie crusts as directed on box for two-crust pie using nine inch glass pie pan. In two quart saucepan, melt butter over medium heat. Add onion; cook two minutes, stirring frequently, until tender. Stir in flour, salt and pepper until well blended.

Gradually stir in broth and milk, cooking and stirring until bubbly and thickened. Stir in chicken and mixed vegetables. Remove from heat. Spoon chicken mixture into crust-lined pan. Top with second crust; seal edge and flute. Cut slits in several places in top crust. Bake 30 to 40 minutes or until crust is golden brown. During last 15 to 20 minutes of baking, cover crust edge with strips of foil to prevent excessive browning. Let stand five minutes before serving.

**Cindy Foster**  
Codington-Clark Electric Member

Please send your favorite recipes to your local electric cooperative (address found on Page 3). Each recipe printed will be entered into a drawing for a prize in December 2025. All entries must include your name, mailing address, phone number and cooperative name.

# Efficiency Tips for Older Homes

**Miranda Boutelle**  
Efficiency Services  
Group

**Q:** How do I improve the efficiency of my older home while keeping its charm?

**A:** I love old homes. The details and craftsmanship have always drawn me to them. The features of older homes can make them less efficient than modern construction, but it doesn't have to be that way. You can keep the charm and make your home more efficient.

Start by prioritizing the invisible upgrades that make your home more comfortable and efficient. When we were kids, I don't think any of us thought, "When I grow up, I want to spend my hard-earned money on insulation." It's not as exciting as new countertops or a remodeled bathroom, but air sealing and insulation can save you money every month. Then you can apply the savings to aesthetic improvements.

Many older homes are not properly insulated. Insulation has several benefits beyond sealing your home and keeping outdoor air from seeping in. It reduces outdoor noise, makes your home quieter and improves your overall comfort.

Always properly air seal before you insulate. Older homes with pocket doors, coved ceilings, dumbwaiters, doors to attic spaces and laundry chutes allow indoor air to escape through the cavities, gaps and cracks around these classic features. Sealing off open cavities around those features often requires plywood, rigid foam or drywall fastened into place and then caulked around the edges.

Keep an eye out for framing features that cause drafts. Balloon framing is a type of construction where wall studs run all the way from the foundation to the roof, allowing air to flow freely through those spaces. Second floors with knee wall attics on both sides are notorious for air leakage. Open cavities allow air to flow horizontally between the attic spaces, making the home uncomfortable and inefficient. Seal off the open cavities in the floor framing and insulate attic spaces.

Dense-packed cellulose or closed cell foam insulation can be sprayed into exterior walls. Skilled contractors can remove pieces of siding and drill holes to fill the wall cavities from the outside of the home.

For brick or stone homes, holes can be drilled from the inside and then patched and painted. Insulating walls from the inside of the home requires more time and effort in preparation and cleanup, but having well-insulated walls is worth it.

Knob and tube wiring – commonly used from the early 1880s to the 1930s with no grounding wire – should be replaced prior to insulating walls and attics for safety purposes. Contact between insulation and knob and tube wiring can create a fire hazard.

People often think new windows are the best way to improve a home's efficiency. Considering the cost of replacing windows, I recommend investing in air sealing and insulation first. Then consider storm windows to keep the charm of the original windows, such as leaded glass and stained-glass windows in good condition. Choose from interior or exterior options that are operable and inoperable.

Once you've addressed the envelope of your home, consider appliance improvements. Replace your old electric water heater with a heat pump water heater. This upgrade can save a family of four an estimated \$550 per year and more than \$5,600 over the lifetime of the water heater, according to ENERGY STAR®.

Invest in high-efficiency heating and cooling equipment. A mini-split heat pump, also known as a ductless heat pump, is a more efficient option than electric baseboard heating and provides the benefit of air conditioning.

Older homes don't have to be inefficient. Show your home some love and invest in energy efficient upgrades.

# YOU GOTTA HAVE A FIDDLE IN THE BAND

## Keeping Old-Time Music Alive One Jam at a Time

**Frank Turner**

frank.turner@sdea.coop

“If you’re gonna play in Texas, you gotta have a fiddle in the band,” the classic Alabama song goes — and South Dakota is no exception. The Fiddlers of South Dakota, a group of traveling fiddle enthusiasts and musicians, carry that spirit, bringing the joys of acoustic music and an old-time charm to parades, festivals and hometown celebrations across the state through the summer months.

One of these traveling musicians, Ken Nelson of South Shore who joined the group in 2010, describes the group as a “loose-knit group of people who like to get together and jam.” In total, the group has more than 30 members from eastern South Dakota and western Minnesota. And it’s not just fiddlers — the ensemble includes other acoustic instruments, including mandolin, bass, banjo and harmonica.

According to Nelson, the group’s repertoire draws from old-time traditions — breakdowns, waltzes, reels and jigs — the kind of music once played on porches, at barn dances and around campfires.

The Fiddlers of South Dakota  
playing old-time tunes at  
Newton Hills State Park.  
*Photo submitted by Ken Nelson*

“You could call it old-time music,” Nelson said. “It’s not really bluegrass or folk music. It’s hard to describe it until you hear it.”

Whether the song is an Irish jig or a Croatian polka, Nelson said the music never fails to connect with the audience.

Nelson said that connection is what drives these musicians to travel hundreds of miles to gigs across the state — from Fort Sisseton’s Historic Festival to the Laura Ingalls Wilder Pageant in De Smet, to Prairie Village’s Annual Steam Threshing Jamboree in Madison. It’s not a living, he said, but more of a passion — a way to stay connected to music, to community, and to his fellow fiddlers.

“We play everywhere we can,” he said. “And everybody enjoys it. We usually only make enough money to pay for the gas but that’s all we really care about.”

“Once We played for Potato Days over in Clark,” Nelson laughed. “We were set up right next to the potato wrestling pit. We had to make sure we were sitting far enough back so that when mashed potato started flying, we didn’t get splashed.”

The Fiddlers of South Dakota expect to perform next at the Laura Ingalls Wilder Pageant in De Smet in July. Nelson said the public is not only welcome to attend the show, but acoustic string players of all ages are encouraged to join the organization’s jam sessions and informal performances such as at Luce Cabin at Lake Herman State Park or after their performance in Fort Sisseton.

“We’re always trying to incorporate new players into the group,” he said. “Sometimes young students come and play with us, and they’re always welcome. It’s fun and humbling to have young players, sometimes as young as 10 or 11, join in, because, if you don’t include the young people, it’s not going to last.”

# SOUTH DAKOTA STAR QUILTS

Moreau-Grand Electric Cooperative directors present retiring manager Melissa Maher (left) with a star quilt.

*Photo by JJ Martin*

## Honoring Cooperative Legacy With Time-honored Tradition

**Frank Turner**

[frank.turner@sreda.coop](mailto:frank.turner@sreda.coop)

Across the prairie, few gifts carry as much meaning as a star quilt. For many, these quilts are more than just blankets – they are acts of honor. Rooted in Native American culture, particularly among Lakota, Dakota and other tribes of South Dakota, star quilts have long been used to mark some of life’s largest milestones, including graduations, marriages, memorials and moments of deep community respect.

Electric cooperative leaders Donovan Young Man, a former director of Lacreek Electric who was honored shortly before his passing earlier this year, and Melissa Maher, the former manager of Moreau-Grand Electric Cooperative, recently accepted star quilts from their cooperatives in recognition of their many years of service to their member-owners.

So what makes the star quilt such an honor? According to International Quilt Museum Collections Manager Jamie Swartz, the quilts are special because they take an incredible amount of skill and experience to assemble.

Many star quilts are block quilts, constructed from dozens or even hundreds of small fabric pieces carefully cut and stitched together. At the heart of the design is an eight-pointed star, a

shape that demands near-perfect precision.

“There are so many small pieces that make up a star quilt,” Swartz said. “When you are combining so many small pieces together to make a large, over-all design, there is more room for error. A small mismeasurement can create bumps, ripples or puckers in the patchwork.”

*Photo Courtesy of the International Quilt Museum, University of Nebraska-Lincoln, 1997.007.0123*

That level of precision, care and time-honored tradition a star quilt represents is a part of what makes it such a meaningful gift. In recent years, the practice of gifting star quilts has been embraced by some electric cooperatives as a way to express a deep appreciation for their employees who have dedicated a lifetime of work to their cooperatives and communities.

## Remembering Donovan Young Man

Before his passing earlier this year, Donovan Young Man was honored by his cooperative at the Lacreek Electric annual meeting with a star quilt for his 31 years of service to Lacreek Electric, serving as a director for both his cooperative and the South Dakota Rural Electric Association. Specifically, the cooperative honored Donovan's commitment to both his cooperative and community.

Lacreek Electric CEO Josh Fanning said Young Man was known for both his calm and steady presence, and his exceptional ability to bridge tribal relations, fostering understanding and unity within the community.

In his community, Donovan was known for his profound impact on his community's youth. For 41 years, he devoted himself to the Oglala Lakota County School District, leaving a lasting legacy of dedication, education, and empowerment for the youth. Beyond education, Donovan served his community in many other ways, including as a member of the Oglala Sioux Tribal Council.

"Donovan had a lasting impact on our cooperative," Fanning said. "His wisdom, leadership, and steady guidance helped shape its direction and strengthen its foundation. His contributions will be remembered and felt for years to come."

"We chose a star quilt because gifting one is a deeply meaningful gesture in our area – an expression of profound respect, honor and the warmth of community," Fanning continued. "In many Indigenous cultures, the star quilt represents the highest form of recognition, symbolizing heartfelt gratitude for the recipient's enduring contributions. It also serves as a guiding light, reflecting the inspiration and direction they provide for future generations."

## Honoring Melissa Maher

Moreau-Grand Electric honored Melissa Maher with a star quilt at the co-ops annual meeting in October for her 40 years of service at the cooperative. In addition to Maher, the cooperative also presented Larry Hieb with a quilt for his 55 combined years of service as both an employee and director.

Maher joined the cooperative in 1984 as manager's secretary. Through the years, Maher remained with the cooperative, serving as the member service director and later Moreau-Grand Electric's manager, the first woman to hold this title.

"I've always loved star quilts, what they stand for – the celebration and honoring of someone with an heirloom that they can enjoy for hopefully generations to come," she said.

Maher first experienced the star quilt tradition through her

Lacreek Electric employees gift director Donovan Young Man a star quilt to celebrate his 31 years of service to the electric cooperative.

*Photos by Mandy Scherer*

mother, who taught kindergarten at Cheyenne-Eagle Butte School. As a teacher in the Eagle Butte community, her mother received star quilts from several of her students' families.

Seeing the joy it brought her mother, Maher continued the star quilt tradition into her years at the cooperative, gifting quilts to retirees of the cooperative, gifting dozens of star quilts made by quilt maker Bonnie LeBeaux to employees of the co-op, honoring retirements, directors, and even key members of the construction crew that helped build the new Moreau-Grand Electric office.

"It's hard to guess how many star quilts I have gifted over the years," Maher said. "Probably dozens if I had to guess."

The tradition came full circle at her retirement party when Moreau-Grand Electric presented Mellisa a star quilt of her own.

"We wanted to honor her 40 years of service and highlight abilities as a manager," said Paul Lawrence, a director of Moreau-Grand Electric. "It's a way of conveying that she led with honor and integrity, and she did exactly that."

## AG APPRECIATION AT THE CENTRAL STATES FAIR

We invite you to the 3<sup>rd</sup> Annual Ag Appreciation event held **August 18<sup>th</sup>, from 5:00pm - 6:30pm, at the Monument Health Stage** inside the fairgrounds! These outstanding individuals and business have made lasting contributions to their communities and the agriculture industry, and this is our chance to say 'thank you' for their unwavering commitment.

A complimentary meal will be served from 5pm - 6pm, with a short program to follow. Enjoy **FREE** fair entrance\* and be entered into a drawing to receive one of two, two-pack PREMIER passes to an event at the fair.

**\*Must enter on LaCrosse Street and present ticket at the gate entrance for free fair entrance.**

- Present this ticket at the LaCrosse St. gate entrance for FREE fair entrance.
- Present this ticket at the Appreciation event entrance for a meal ticket.

\*Ticket is good for self + immediate family members only.

## ENERGY EFFICIENCY TIP OF THE MONTH

During summer months, run large appliances that emit heat such as clothes dryers and dishwashers during the evening when the outdoor temperature is lower. Running heat-emitting appliances in the evening will reduce indoor heat gain during the day when outdoor temperatures are highest and ultimately keep your air conditioner from working harder than necessary.

Source: [energy.gov](http://energy.gov)

## LOCATE YOUR ACCOUNT ADDRESS

If you locate your address on any of the inside pages of the Moreau-Grand Electric's Cooperative Connections, notify us and you will receive a \$25 bill credit.

*Eligible addresses will not be on the front or back cover.*

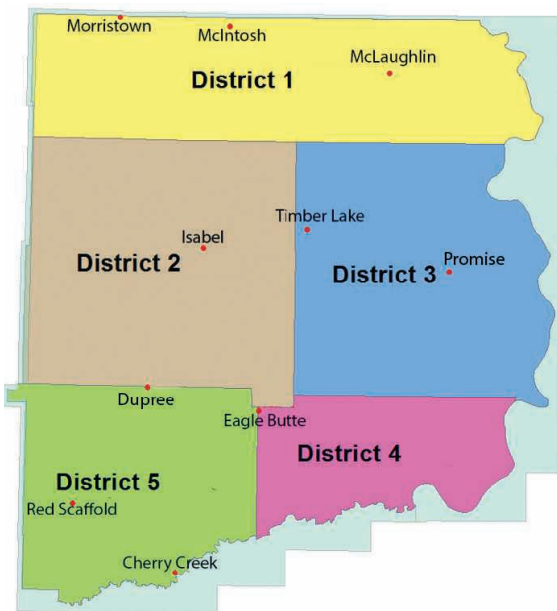

# Director Petitions Due

Individuals who are interested in running for the Moreau-Grand Electric board of directors will have from June 20, 2025, through July 21, 2025, to file a nominating petition for the election to be held at the annual meeting. All candidates from a district must have the qualifying petition with 10 or more signatures in a Moreau-Grand office by 4 p.m. July 21, 2025, to be on the ballot for that district. PO BOX 215 Timber Lake, SD

## The four director positions up for election this year are:

- **District 1 – Royce Walker**
- **District 2 – Lois Bartlett**
- **District 4 – Paul Lawrence**
- **District 5 – Troy Wall**

It is important for the members to start thinking about candidates early. Petitions may be picked up at the Moreau-Grand headquarters in Timber Lake. A member can sign only one nominating petition and must reside in the district of the member running for the board position. All signatures will be validated upon receipt of the nominating petition.

**Royce Walker**  
District 1

**Lois Bartlett**  
District 2

**Paul Lawrence**  
District 4

**Troy Wall**  
District 5

## Section 3 Qualifications

No person shall be eligible to become or remain a Director who:

- (a) is not a member and bona fide resident of the district from which he is elected.
- (b) is in any way employed or financially interested in a competing enterprise or a business selling electric energy or supplies to the Cooperative or a business primarily engaged in selling electrical or plumbing appliances, fixtures, or supplies to the Cooperative.
- (c) is not receiving electrical service from the Cooperative at their principal place of residence.
- (d) is an employee of the cooperative, or spouse or child, parent, brother or sister, by blood or marriage of such an employee. Should a disqualification occur subsequent to election, the director, notwithstanding any other provisions of these bylaws, shall be permitted to complete the term of office. This provision shall be in effect for elections occurring after 1997.
- (e) Has failed to attend at least 2/3 of all regular board meetings during any twelve (12) month period.
- (i) No absence from a board of directors meeting occasioned by jury duty or active military service shall be considered when applying this provision.
- (f) Has pled guilty or has been convicted of a:
  - (i) felony,
  - (ii) any crime involving dishonesty, or
  - (iii) any crime involving moral turpitude.
- (g) Is a spouse or child, parent, brother or sister, by blood or marriage, of a then current Director.

# RESCUING ANIMALS

## Co-op Members Foster and Support Pets In Need

**Jacob Boyko**

[jacob.boyko@sdrea.coop](mailto:jacob.boyko@sdrea.coop)

Tami Schanzenbach has always wanted to help animals.

From her earliest days in Aberdeen where she worked as a veterinary technician and helped start the Aberdeen Area Humane Society, to her later Pets N Stuff store in Mobridge, Tami's focus has always been on humans' furry companions and getting them into loving homes.

And even after a long career and a so-called retirement, she still finds ways to help. Through the Wamakaskan Onisca Humane Society, she opens her home to animals in need.

"I'm a foster failure," Tami laughed, admitting three of her own beloved pet dogs were originally supposed to be adopted out.

Served by Cam Wal Electric, Tami's home near Selby is the halfway point for countless animals on their journey from neglect, abuse and homelessness to their forever homes.

"If I have a person that calls me, if someone has found a dog, I ask initially

if they're able to help me with taking care of that dog for a little bit until we can determine whether it belongs to somebody," she explained.

The pets will go to a foster home for the time being — Tami credits volunteers like her friend Annie Walker, a member of Moreau-Grand Electric from the McIntosh area, for stepping up and opening her home to foster animals.

"One day, Tami had a picture of a litter of puppies that needed to be bottle fed," Walker said about her first fostering experience.

"I figured it would be something myself and my children would be up to, and ever since then, I keep taking some animals from time to time."

If the dog isn't claimed, the rehoming process begins, starting with veterinary care.

"We go through and we vaccinate and treat the animal and do what's needed to be able to make that puppy or dog available for adoption," Tami continued.

Sadly, the circumstances in which she receives them usually aren't pleasant.

The pets come from around Selby, many from the Standing Rock and Cheyenne River reservations, where they're often found abandoned. Tami recalls coming upon shocking discoveries, like "bait dogs" used to train fighting dogs in the Bismarck area.

"People will steal puppies and kitties and train their pitbulls for fights, and they have a dog that's called a bait dog," she explained. "And that you see in our area as well ... days where [multiple] people are missing their dogs. People are coming in and stealing them and using them as bait dogs."

That's what Tami suspects happened to Cash, a 7-year-old pitbull/lab cross found "in the middle of nowhere" covered in pellet shots and bite marks.

"It took a long time for him to trust and know he's going to be okay here," Tami said. "And I don't

Cash, who was used as a "bait dog," was adopted by Tami. *Submitted Photo*

blame him, because he's never been taken care of.

Tami has made it her mission to end the cycle of animal neglect and abuse where she's able by sterilizing the pets coming into her care before they're adopted out. She also sponsors sterilizations for other peoples' pets.

"We just had about 12 dogs that we sponsored to be spayed at the local vet," she said. "We had a lady that helped me with a donation and wanted it geared toward people that couldn't afford to have their animals spayed and neutered ... We have so many people that always have two litters per year."

Stopping the cycle also means barriers to adoption – if someone isn't a good fit, there's a chance that animal will be surrendered back to the rescue and the process will start from the beginning.

Tami conducts interviews with potential pet owners with hopes of finding a perfect match.

She added that she sometimes steers people with busy and demanding schedules away from getting dogs. A cat – famously independent – is often a better fit, she said.

Tami also employs sustainable adoption practices she says make for better-behaved dogs – eight weeks is generally the earliest age when she'll allow adoptions to occur.

"We have puppy socialization that occurs" when the puppies are little, she explained. "They wrestle and play with their siblings, and they create a lot of socialization that way. And there's a lot of research that has proven that if you keep them with their siblings during that period of time, they make a heck of a lot better dog going forth, because they've been through that socialization."

Jen Uecker, Board President of the Pierre/Fort Pierre Area Humane Society, also known as Paws Animal Rescue, says without volunteers like Tami and Annie, shelters like hers would be overrun and rescuing animals from abandonment wouldn't be possible.

"We rely heavily on volunteers to help ease the burden of our limited staff and resources," Uecker said. "The foster volunteers open their home to these animals not really knowing a whole lot

about them, their demeanor, where they came from, or anything, and they open their homes to help them feel comfortable and confident until they're ready for their new forever family."

Tami encourages people to volunteer, support their local rescues, adopt if they're able and above all, love their pets.

"There are a lot of dogs and cats and it's just not their fault – they get the bad end of things," Walker said. "Tami is super dedicated ... She's always willing to step in and help these animals find a better life."

For Tami, it all comes down to giving that love back.

"They provide unconditional love to humans, and sometimes we forget that," she said. "We work all day ... When you come home, you need to spend some time with your pets."

Tami says her most rewarding rescue was Fez, an 8-week-old shepherd/collie cross found with mange, a skin disease caused by mites. She said she refused to give on Fez, who is now a healthy dog with a full coat of hair.

# REMEMBERING WHEN THE LIGHTS CAME ON

## Central South Dakota Rancher Looks Back to Days Before Power

**Jacob Boyko**

[jacob.boyko@sdrea.coop](mailto:jacob.boyko@sdrea.coop)

Near Big Bend Dam in central South Dakota, farmer and rancher Clayton Knippling works the same land his father and grandfather had decades before.

The work he and his wife, Evelyn, and two sons do on the sprawling acre family ranch looks very different than it did back then, though. That's because today the ranch has electricity.

Back in the 1940s and early 1950s,

having electricity was a luxury enjoyed almost exclusively by people in towns and cities, or rural folks who happened to live along major highways. With their homestead several miles northeast of Fort Thompson, the Knippings understood their odds of getting connected to a utility were slim for the time being. Their lives were powered by an old diesel generator out in the barn – enough to keep the kitchen refrigerator humming and a couple of light bulbs lit.

“I remember being told, ‘Shut that

refrigerator door! You're wasting cold air!’” Knippling laughed, thinking back to that overworked generator.

But as soon as the electric cooperative crews visited the ranch, that generator was permanently retired and would never run again.

Knippling thought back to that day in the early 1950s when he was about six years old. He remembers watching the trench-diggers from Tri-County Electric – merged into Central Electric in 2000 – trench their way to each outbuilding. Hours later, he would see those buildings shining bright in the darkness for the first time ever.

Having electricity didn't change the work out in the fields. Knippling said a lot of the work is the same in 2025 as it was in 1955. But back at the homestead, Tri-County Electric brought the Knippling ranch into the

20th century.

"We even had a welder after that," Knippling recalled. "That took 220 volts, and I don't think our old generator was putting off that. We could then fix our own iron."

Electricity was a game-changer for the Knippings' water needs. Seizing the opportunity, they dug a new, deeper well with an electric pump for better quality water and ran lines out to each building.

"[Before we had electricity] there was a stool and a nail where a tin cup sat, and there was a bucket of water and everybody that came through would drink out of that cup, so if somebody got a cold, we all got it," Knippling laughed.

"Electricity allowed us to put in a pressure tank and then run the water lines to every house so we weren't carrying a bucket anymore."

The ranch also transitioned to all-electric pivot irrigation and pumps along the Missouri River. Today, Knippling Land and Cattle

irrigates 1,300 acres of farm land – an unimaginable figure before there was co-op power.

In the winter, the new electric block heaters for the diesel engines ensured there was always at least one tractor that would start up.

Life was just a little bit brighter, warmer and simpler with co-op power.

An advocate for rural life and progression, Clayton has also served the last 42 years on the board of directors for Midstate Communications, the local member-owned telecom cooperative, in an effort to equalize the disparities between urban and rural life.

"It changed the world back in the '50s when electricity came," Clayton said. "A lot of kids left the farm because it was too rural. If you came from a farm, you didn't want to come back. After electricity came, it became easier for younger people to stay on the farm."

Clayton Knippling farms and raises cattle southeast of Fort Thompson on the same ranchland where he grew up, just 15 miles from his childhood home where Tri-County Electric first hooked up their power in the early 1950s.

*Photo by Jacob Boyko*

Pivot irrigation systems, like the one shown here along S.D. Highway 50 southeast of Fort Thompson, use electricity to rotate on a center pivot. Use of the systems can increase yields while reducing wasted water.
