Moreau-Grand Electric 2022 Annual Membership Meeting

On Friday, Oct. 7, 2022, Moreau-Grand Electric celebrated 76 years hosting the annual membership meeting. The theme for this year's event was "Together Towards Tomorrow." The meeting was held at the Timber Lake Public School with 111 registered members.

The evening began with the Klein Ranch Bible Camp serving a roast beef supper to 206 members and guests. Those attending the meeting were moved by Pastor Colette Schaffer's a cappella rendition of our National Anthem. In addition to the financial report presented by Treasurer Kelly Landis, President Larry Hieb and Manager Melissa Maher gave the membership updates on the cooperative. This year's Good Neighbor Award was presented to Dennis and Shari Evenson.

The membership elected four directors to serve on the board: District

1 – Royce Walker; District 2 – Lois Bartlett; District 4 – Paul Lawrence and District 5-Troy Wall.

Service awards were presented to Directors Royce Walker (30 years), Lois Bartlett (15 years), Kelly Landis (5 years) and Ryan Maher (5 years). Three employees were recognized for their years of service: Kent Larson (30 years), Hunter Smith (10 years) and Jace Vrooman (10 years). Members winning annual meeting prizes valued between \$50 and \$250 were Gary Simon, Lance Willison, Lee Anne Moran, Cora Petersen, Clara Herman, Allen Johnson, Rod Enright, Bryce Schaffer, Adele Enright, Gary Voller, John Kost and Doyle Simon.

After the meeting, the board held a reorganization meeting for the purpose of electing officers. Those selected were Larry Hieb – president; Kerry McLellan – vice president; and Kelly Landis – secretary-treasurer.

Future Member Leah Eigelaar presents Lance Willison with his grand prize of \$250.

Lee Anne Moran won the cooler donated by Country Market.

Moreau-Grand wishes to thank the Timber Lake Public School for once again allowing us to use their beautiful facility to host the meeting.

Manager Maher presents the years of service awards to Kent Larson, Hunter Smith and Jace Vrooman.

Directors Royce Walker, Lois Bartlett, Kelly Landis and Ryan Maher were recognized for their years of service.

Director Royce Walker presents the 2022 Good Neighbor award to Shari and Dennis Evenson.

MOREAU-GRAND ELECTRIC COOPERATIVE CONNECTIONS is published monthly by Moreau-Grand Electric Cooperative, PO Box 8, 405 Ninth St., Timber Lake, SD 57656-0008, for the members of electric cooperatives across South Dakota. Families subscribe to Moreau-Grand Electric Cooperative Connections as part of their electric cooperative membership. Moreau-Grand Electric Cooperative Connections' purpose is to provide reliable, helpful information to electric cooperative members on matters pertaining to rural electrification and better rural living.

Subscription information: Electric cooperative members devote 50 cents from their monthly electric payments for a subscription. Nonmember subscriptions are available for \$12 annually. Periodicals Postage Paid at Timber Lake, S.D., and at additional mailing offices.

POSTMASTER: Send address changes to: Moreau-Grand Electric Cooperative Connections, PO Box 8, Timber Lake, SD 57656; Phone (605) 865-3511; Fax (605) -865-3340; e-mail mge@mge.coop; Web site www.mge.coop. This institution is an equal opportunity provider, employer and lender.

Design assistance by SDREA

Sept. 22 Board meeting minutes and July 2022 financial information

The September 20, 2022, board of directors' meeting was held at the Timber Lake office with the following directors present: Bartlett, Clark, Hieb, Keckler, Landis, Lawrence, Maher, McLellan, Walker and Wall, and others present: Manager Maher, Finance Officer Dahlgren and Accountant Lemburg (Delegated Recorder of Minutes).

The Operations report was given by Kent Larson, which included the MGE building line move, installation of galloping devices on the Ridgeview transmission line, RAM pole updates, SDREA Field Inspections, house moves, Highway 12 road move, 500 MCM project update, purchasing material from Sioux Valley Energy and Line Superintendent's Conference.

The Large Power Users monthly report was given by Sue Sherwood, which included topics on large power usage and payments.

The Member Services report was given by Roger Lawien, which included demand response units, SmartHub, stock show demonstration options, annual meeting information and Youth Tour to Beulah.

Manager Maher gave the Managers report that included the director scholarship was awarded to Trenton Hansen of Timber Lake, a presentation of our cooperative will be given at the SDREA board meeting, Federated Insurance claims, new headquarter facility update, Basin Electric financials and all-employee meeting held this month.

Manager Maher stated that Grand Electric plans to host a Legislative Forum this year. All Directors expressed support for the forum.

Director Lawrence gave a Rushmore Board meeting report that included financials, load control program, Basin bill credit, load shed, Rushmore Annual Meeting format changes, 2023 proposed budget and work continues on the sale of DGC.

Director Landis gave a report on his tour of the Southwest Power Pool facilities in Little Rock, AR. Topics included the February 2021 winter storm that caused rolling blackouts, SPP's daily operations, aging infrastructure, and solar technology.

Director McLellan reported that interviews will be conducted for the SDREA Manager position.

Board approved the following: the agenda, the minutes from the August meeting, new members, refunds, line extensions, safety report, financial statistics, disbursements, 2021 Form 990, CoBank membership, Upper Deck Architects amendment, resolution to approve the 2023 Basin Load Forecast, and CRST Easement.

The next board meeting was tentatively scheduled for October 18, 2022, at 8:30 a.m. in the Timber Lake office.

A heaping helping of holiday home safety

Nearly every household uses extra electricity during the holidays for cooking, decorating and heating.

Take extra care to use electricity safely and to ask family members and house-guests to do the same. Here are some helpful tips:

- Stay in the kitchen when broiling or doing any stovetop cooking.
- Keep children well away from cooking appliances while in use.
- Keep towels, potholders and curtains away from hot surfaces.
- One of the riskiest holiday behaviors is overloading your electrical outlets. You will overload your wall outlets if you string strand after strand of holiday lights together and plug them into an extension cord that you plug into an outlet. Plugging multiple strands of cords into a power strip does not add any juice to the electrical circuit that powers the outlet you plug the strip into.
- Check decorative lights for damaged cords, plugs and sockets. Replace anything that's frayed, cracked or broken. Buy cords that are certified by UL; look for the UL symbol on the package.
- Don't run extension cords under rugs, carpets or baseboards, or anywhere they can be a tripping hazard.
- Only use decorations and cords outdoors that are properly rated for outdoor use.
- When you put up outdoor decorations, do not string lights in trees near power lines. Fasten outdoor lights carefully and securely with clips, never nails or tacks.
- Keep electric lights away from decorative metal trees.
- Keep all light strings and other decorations away from pets so they don't get tangled in them or chew the wires.
- Keep all decorations - and everything else - at least 3 feet away from heat sources such as fireplaces and space heaters.
- Always turn off your decorations when you leave home and when you're sleeping.
- Make sure smoke detectors are present and working properly.
- Use space heaters properly and safely. Keep them out of high-traffic areas and at least 3 feet from anything that can burn.
- Do not leave a space heater running unattended. Turn off space heaters and unplug them when you leave the room or go to sleep.
- Never leave an open flame, including your fireplace or a candle, unattended.

LINEMEN PARTICIPATE IN RUBBER GLOVING SCHOOL

Roughly 50 electric cooperative linemen from across the state recently participated in a Rubber Gloving School at the Mitchell Technical College training facility. The program included simulating maintenance and repair work on energized power lines, awareness of proper safety procedures, grounding and insulation of vehicles, operation of aerial lift devices and more.

To see a video of this event and learn more about how electric cooperatives serve our members, visit Cooperative Connections Plus by scanning the QR code at right.

Don't play on transformer boxes

Traci Tschetter

Traci, 11, warns readers to stay away from transformer boxes, which contain high-voltage underground electrical equipment inside. Traci is the child of Ryan and Elaine Tschetter and they are members of Whetstone Valley Electric.

Kids, send your drawing with an electrical safety tip to your local electric cooperative (address found on Page 3). If your poster is published, you'll receive a prize. All entries must include your name, age, mailing address and the names of your parents. Colored drawings are encouraged.

CROCKPOT CREATIONS

SLOW COOKER CHILI**Ingredients:**

2 lbs. lean ground beef
 1 pkg. McCormick Slow Cookers Chili Seasoning
 2 cans (14.4 ozs. each) diced tomatoes, undrained
 2 cans (16 ozs. each) kidney beans, drained and rinsed
 1 can (15.5 ozs.) tomato sauce

METHOD

Brown ground beef or turkey in large skillet on medium-high heat. Drain fat. Place cooked beef, Slow Cookers Chili Seasoning Mix, tomatoes, beans and tomato sauce in slow cooker. Stir until well mixed. Cover. Cook 8 hours on low or 4 hours on high. Stir before serving. For best results, do not remove cover during cooking.

McCormick.com**SLOW COOKER TURKEY BREAST****Ingredients:**

2 tsps. McCormick Garlic Powder
 2 tsps. McCormick Paprika
 2 tsps. McCormick Rubbed Sage
 2 tsps. Sicilian Sea Salt
 1 tsp. McCormick Pure Ground Black Pepper
 1 tsp. McCormick Whole Thyme Leaves
 1 turkey breast, (about 6 lbs.) fresh or frozen, thawed
 3 tsps. butter, melted

METHOD

Mix seasonings in small bowl; set aside. Rinse turkey and pat dry. Brush turkey with melted butter. Sprinkle seasoning mixture over entire surface and under skin of turkey. Place turkey breast in slow cooker. Cover. Cook 1 hour on high. Reduce heat to low; cook 7 hours longer or until turkey is cooked through (internal temperature reaches 165 degrees). Transfer to platter or carving board and slice.

McCormick.com**SLOW COOKER MASHED POTATOES****Ingredients:**

5 lbs. Yukon gold potatoes, peeled and cut into cubes
 1 c. chicken stock
 2 McCormick Bay Leaves
 1/2 c. (1 stick) butter, cut into chunks
 1 tsp. salt
 3/4 tsp. McCormick Pure Ground Black Pepper
 1/2 tsp. McCormick Garlic Powder
 1/2 -1 c. milk
 1 tsp. McCormick Parsley Flakes

METHOD

Spray inside of 6-quart slow cooker with no-stick cooking spray. Add potatoes, stock and bay leaves. Cover. Cook 4 hours on high or until potatoes are tender, stirring after each hour. Remove bay leaves. Stir in butter, salt, pepper and garlic powder. Cover. Let stand 5 minutes. Beat potatoes with electric mixer on medium-high speed or mash with potato masher, gradually adding milk, until smooth. Stir in parsley. Top with additional butter, if desired. Serve with McCormick Brown Gravy or Perfect Brown Gravy.

Please send your favorite recipes to your local electric cooperative (address found on Page 3). Each recipe printed will be entered into a drawing for a prize in December 2022. All entries must include your name, mailing address, phone number and cooperative name.

Q: How can I save energy at home during the holiday season?

A: The holidays are a magical time when we come together with our loved ones to share food, gifts and quality time. It's also the most expensive time of year for many of us. Along with the expense of gifts, meals and travel comes colder weather and darker nights that lead to more electricity use and higher bills.

One way to reduce the financial burden of the most wonderful time of year is by implementing efficiency tips to use less energy at home and lower your monthly bills.

HOME PRACTICES

If you are hosting guests, your household will consume more electricity than normal. Be prepared with efficiency basics:

- Have your thermostat programmed at 68 degrees when you are home and dialed back 8 to 10 degrees when you leave the house or go to sleep.
- Run the clothes washer on cold with full loads.
- When not in use, turn off lights and the TV; fully shut down computers and gaming systems instead of putting them in sleep or standby mode.
- Lower the thermostat when guests are over or cooking food. Most gatherings happen in the center of the home, so save energy by turning the heat down in areas you are not using.

COOKING EFFICIENCY

Whether you are making holiday treats or a feast, here are a few tips to help lower energy use in the kitchen.

Use the oven light to check food. Every time the oven door is opened, the temperature inside is reduced by up to 25 degrees, according to the Department of Energy (DOE). When possible, make use of a slow cooker, microwave, toaster oven or warming plate, which use less energy than an oven and

stovetop. According to DOE, a toaster oven can use up to half the energy of the average electric stove over the same cooking time.

Let hot food cool to room temperature before placing it inside the refrigerator. This ensures you don't increase the temperature inside your fridge and cause it to use more energy to cool down. You can also take some of the stress and expense out of your holiday cooking by asking guests to bring a dish.

HOLIDAY LIGHTING

This year, make the switch to LEDs for all your holiday lighting. LED holiday lights consume 70 percent less energy than conventional incandescent light strands. For example, it costs 27 cents to light a 6-foot tree for 12 hours a day for 40 days with LEDs compared to \$10 for incandescent lights.

Pick up a few light timers so you don't have to remember to unplug your lights every evening. You can also choose to upgrade to smart holiday lights that offer a wide range of app-controlled options, including time, colors, music and modes.

OUT-OF-TOWN EFFICIENCY

If you're visiting family and friends during the holidays, prepare your home to use less energy while you're away.

Water heating is the second-largest energy expense in your home, accounting for about 18% of your utility bill, according to DOE. Switching your water heater to vacation mode will reduce wasted energy by keeping the water at a lower temperature. If your water heater does not have vacation mode on the dial, you can adjust it to the lowest setting.

Set your thermostat to around 55 degrees so you're not wasting energy to heat the home while you're away.

Instead of leaving lights on all day, consider upgrading a lamp or fixture to a smart lightbulb. This allows you to control lights from afar and set a schedule for the light to go on and off. Another option is to repurpose your holiday light timer for one of your living room lamps.

Lower your energy bills this holiday season with these simple tips. Happy Holidays!

Schaunaman living out Miss Rodeo dream

Billy Gibson

billy.gibson@sdrea.coop

Adrienne Schaunaman is used to being the center of attention and pulling off pressure-packed performances in front of large crowds, but one spine-tingling moment managed to mangle her nerves.

The reigning Miss Rodeo South Dakota was on horseback at the start of the annual Rodeo Rapid City event last February. She was staged at the edge of the arena and getting ready to take off across the middle of the ring holding a state flag with a switch attached to the pole. Her task was to ride out in front of the crowd as the national anthem reached a crescendo and flip a switch

that would send fireworks shooting out of the end of the pole.

There was something about the extraordinary zeal of the sold-out crowd that gave her the jitters.

"They were screaming the national anthem at the top of their lungs and it was clear they knew the meaning of every single word," she recalled. "They were singing with such enthusiasm and passion that it made me nervous. I had to make sure I clicked the switch at the

Adrienne Schaunaman has spent 2022 traveling across the state and region representing South Dakota and promoting the rodeo and ranching lifestyle.

right time and get everything done like we had planned. As soon as they got to 'home of the brave' I headed out down the center and it was so cool. It was a once-in-a-lifetime moment."

Schaunaman, 24, has spent the year traveling across the state and region promoting her chosen platform, "Mentoring Matters." When she speaks to groups, she shares with her audiences the positive impact that so many influential individuals have had in her life, including her parents, 4-H leaders, school teachers, rodeo coaches and her network of friends.

A graduate of Aberdeen Central High School, she grew up on the family farm raising and showing livestock. She competed in barrel racing at Colby Community College in Colby, Kan., and showed horses at the University

of Minnesota-Crookston where she graduated in 2021 with a degree in equine science and equine business management. She took a break from her job at Northern Plains Animal Health and hit the road to pursue her ambassador responsibilities.

Schaunaman recently returned from Oregon where she represented South Dakota at the Pendleton Round Up, one of the oldest rodeo events in the country.

"I try to ingrain into everyone that they have unique talents they can share," she said. "I wouldn't be where I am without so many people helping me along the way. I encourage people to try to do more with what they have. We should unite around common causes, volunteer and help our communities thrive by identifying and coalescing around those many things that unite us."

Jamalia Franzen, auditor deputy in Dewey County, encourages all eligible citizens to register to vote. *Photos by Billy Gibson*

Poll workers urge voters to stay active in the election process

Billy Gibson

billy.gibson@sdrea.coop

About 10 years ago, Michele Moore was newly retired and looking for something interesting to occupy her time. Out of the blue, she received a call from the Clay County elections auditor.

“She wanted to know if I was interested in working the elections and I told her I’d do it. It’s been very rewarding and it feels like I’m doing something important and worthwhile,” Moore said.

When she’s not facilitating the election process, Moore takes care of the bookkeeping for the family’s welding and manufacturing business operated by her husband, David.

While election work isn’t a full-time gig, poll tenders put in long hours on voting day. They typically report to the local precinct at 6 a.m. before the polls open an hour later. The shift goes straight through to 7 p.m. when the polls close, although any voters still

standing in line at that time are allowed to cast their ballots. Workers have to stay on duty the entire time and often pack their own lunch and dinner.

After the last voter is done, all the sealed ballots and accompanying paperwork are brought to the auditor’s office for verification and certification to ensure the election is “free and fair.”

Moore said all the workers at her precinct located at the National Guard Armory in Vermillion are diligent, dependable, thorough and conscientious. She said they take their jobs very seriously and are careful not to be “political” in any way, a guideline contained in the orientation and training process that workers go through before each election regardless of one’s years of service.

The training material requires that workers be professional, punctual, respectful to voters, team-oriented and “leave partisan leanings at the door.” Anyone concerned about the validity of the election process can appear at

Number of South
Dakota citizens

62,429

registered to vote but
considered inactive

the precinct as a “poll watcher” or “poll observer,” however, those individuals must adhere to a separate set of guidelines as set forth by the Secretary of State’s Office.

“We’re not here to change anyone’s mind or influence how anyone votes,” Moore said. “We’re just here to do anything we can to help them vote as quickly and smoothly as possible and make sure the process goes well. We try to make it easy for them.”

That doesn’t mean everything always goes according to plan. As the political passions and divisions have grown more intense over recent years, Moore said she’s encountered some fairly tense situations. But she said she generally

Poll workers are on the job from 7 a.m. to 7 p.m. local time. If the polls close while you are in line, you will still be permitted to vote.

Here is a breakdown of party identification as of Sept. 1, 2022:

- Republican - 291,956
- Democrat - 150,760
- No party/Ind. - 142,538
- Libertarian - 2,733
- Other - 1,376

Total - 589,363

V O T E

Election poll workers see themselves as doing something helpful to support and facilitate the democratic process.

feels safe while doing her work inside the armory.

Some voters can get upset when they try to make requests that violate the voting rules, such as attempting to change their party affiliation on voting day or not providing the proper identification. She said tensions can run high during contentious presidential or mid-term elections.

“Sometimes people get angry and you just try to calm them down. They don’t know how things work and what’s required because they’re not paying attention,” she said. “Social media and TV stirs up their passion and they don’t always know how to control that.”

She recalled one particular fellow who insisted on voting without presenting the proper identification. When he was

told he would have to use a provisional ballot, he became agitated and stormed out of the precinct. Moore was “a little nervous” about the man returning and what he might do, but she took comfort in the fact that the National Guard soldiers were right there in the building.

Cris Sichmeller, a resident of Webster, signed on to join her local precinct in Roslyn six years ago and enjoys the

Michele Moore

social aspects of the assignment. A self-described “farm wife,” Sichmeller said she doesn’t often have an opportunity to sit down and visit with friends, but being at the polling place means visiting with folks and catching up on current events.

“People used to spend time just visiting with one another, going to houses and having coffee and playing cards, but that doesn’t happen a lot these days,” she said. “There’s a lot of camaraderie that comes with being around people you know in the community that you have something in common with.”

She said at her precinct things normally proceed “without a lot of drama,” but she remembers that the Covid pandemic did cause a few wrinkles. Several workers contracted the virus, along with the precinct deputy.

The workers had to wear face shields, and Plexiglas was set up in the voting area and at the registration tables.

“I remember a man who had just retired from the military and he came in and saw the face shields and just laughed,” Sichmeller recalled. “He said that wasn’t going to keep us from getting the virus or passing it on to others. He said we needed a hazmat suit for that. I guess he was right.”

Barb Gross recently retired after tending the polls in Dewey County since the 1980s. She describes herself as a stickler for adhering to the rules and buttoning everything down.

“We always made sure everything tallied up because we knew we were going to be audited and we invited that because it was a challenge to see if we could pull it off without a hitch and without anything slipping through the cracks,” she said.

Secretary of State Steve Barnett emphasized the fact that poll workers serve a very valuable role in society.

“They’re on the front lines of the election process. You couldn’t run an election without them,” he said.

Barnett stressed importance of voters meeting their obligation to stay actively involved and make sure they are familiar with the rules and regulations. To find out more about voting rights and responsibilities, visit www.sdsos.gov.

At MGE, every month is Cooperative Month

Together Towards Tomorrow was chosen as the theme for this year's annual meeting. I feel it is very appropriate, especially since October is National Co-op Month. Co-ops are businesses owned and run by and for their members, which can include employees, customers or others. In fact, most of your employees at Moreau-Grand Electric are member owners just like you. We have a vested interest in the success of your/our cooperative.

Cooperatives are nothing new. We can trace the cooperative roots back to 1769 when a group of weavers fed up with

high costs at the company-owned store formed the first recognized cooperative.

As member owners of a cooperative, you are an important

part of the team. You control how it operates and by working Together Towards Tomorrow, we will continue to provide safe, affordable electricity for the generations to come.

Of the seven cooperative principles we live by every day, here are a few that I hold dear:

- Voluntary, Open Ownership. Open to all without gender, social, racial, political, or religious discrimination...
- Democratic Owner Control. One Owner, one vote...

These are part of the foundation upon which our cooperative and country is built.

America's electric cooperatives are 42 million members strong. Collectively, we can use that strength to make informed decisions a priority this election. You can help by educating yourself, then vote. You can also encourage your family, friends and neighbors to vote. Edward Lytton said the pen is mightier than the sword. Prove him correct November 8th by demonstrating that co-ops vote!

Moreau-Grand honors local student Athletes

Moreau-Grand Electric and the Touchstone Energy® Cooperatives of South Dakota are proud supporters of South Dakota high school rodeo.

The following area students were presented with Touchstone Energy shirts honoring them for their accomplishments at the South Dakota High School Finals Rodeo. We are proud of all our area students, especially these athletes:

- Kashlin Bettelyoun
- Bobby Brewer
- Taylon Carmody
- Treg Thorstenson
- Tobi Hintz
- Kennedy McLellan
- Rope Roghair
- Mark Sandquist

If you are interested in attending one of the high school rodeos in your area, keep checking www.sdhhsra.com for the current schedule.

Kashlin Bettelyoun from Eagle Butte was one of eight Touchstone Energy Short Go shirt recipients

Going above and beyond

Basin Electric Power Cooperative and Moreau-Grand Electric believe in and appreciate the hard work performed by our volunteer fire departments. Each fall, Moreau-Grand Electric, combined with a matching donation from Basin Electric, donates to our 10 local volunteer fire departments. On behalf of the Moreau-Grand Electric board and employees, we wish to thank each volunteer fireman for your service. Acct. No. 22204

Moreau-Grand and Basin are pleased to provide each of the following fire departments with a combined \$1,000 donation. The dedication you have demonstrated to your community truly sets an example for us all.

- Dupree Volunteer Fire Department
- Eagle Butte Volunteer Fire Department
- Glad Valley Volunteer Fire Department
- Grand River Volunteer Fire Department
- Isabel Volunteer Fire Department
- McIntosh Volunteer Fire Department
- McLaughlin Volunteer Fire Department
- Morristown Volunteer Fire Department
- Timber Lake Volunteer Fire Department
- Trail City Volunteer Fire Department

Words cannot adequately express our appreciation for the service you each provide at moment's notice of the fire call.

God bless you all,
Melissa Maher, General Manager

Dupree Fire Chief Gary Cudmore and Director Kerry McLellan.

Isabel Fire Chief Tony Russell and Director Ryan Maher.

Director Paul Lawrence and Eagle Butte Fireman Tigger Jones.

Director Royce Walker, Fire Chief Mike Buechler firefighter Mackenzie Buechler.

Trail City Fire Chief Rio Jones, Brady Bickel and Director Kelly Landis.

Timber Lake Fire Dept. Assistant Fire Chief Jeremy Bollinger, Director Larry Hieb, and Fire Chief Grady Kraft.

SOUND DECISIONS

Freshman Impact program promotes sound safety practices for students

Billy Gibson

billy.gibson@sdrea.coop

The students at Hanson High School were stunned and aghast at the horrific scene unfolding right before their eyes.

There were two wrecked sedans, a downed utility pole and tangled wires strewn across the road. Emergency responders were swarming everywhere as a fire truck barreled onto the scene with its sirens blaring. And the most unsettling sight of all: four of their fellow students lying in the crumpled cars with massive wounds and barely clinging to life.

Fortunately, it turns out the accident scene was just a drill staged by a group known as Freshman Impact: Caught in the Moment, and coordinated as part of Cornbelt Program Day at the school located in Alexandria.

Nearly 200 students came from surrounding schools for a full slate of

learning opportunities centered around vehicle safety, first aid, emergency response, drug abuse awareness and much more. Participating schools were Hanson High School, Armour, Bridgewater-Emery, Ethan, Marion, McCook Central, Plankinton and Wessington Springs.

Local organizers Yolanda Price and Don Huber worked with Freshman Impact Executive Director Rick McPherson, local school officials and emergency response agencies to plan the event.

The morning session included seven separate stations scattered throughout the school's parking lot and in the gymnasium. The learning stations focused on the following subjects: teen mental health; healthy relationships; jaws of life and ambulance demonstration; seatbelt awareness; drug dog; social media dangers; and a distracted driving course where the

students wore goggles simulating drug and alcohol impaired vision and attempted to navigate a short course behind the wheel of an ATV.

Taking part in the program was Central Electric Cooperative, which provided the downed power pole and wires. Once the emergency exercise was set into motion, two co-op linemen promptly arrived on the scene to de-energize the lines and worked with other responders to secure the area and form a safe perimeter.

facilitate the partnership while working alongside local organizers.

"This is an incredible opportunity for area students to learn about good decision-making, safety and the real dangers that are out there," Miller said. "Concern for community is one of our guiding principles as a cooperative. This experience serves to educate first responders and students. It aligns with our values, and we are pleased to support it."

The day's program covered just about all the bases. The schedule included a poignant perspective of loss and grief from LeAnn Moe, who lost her teenage daughter to an automobile accident. During the mock accident response, one of the crash victims was carried away in a hearse furnished by a local funeral

home. And after all the activity settled down outside, the students returned to the gymnasium to observe a mock legal trial and sentencing hearing over the car accident they had witnessed.

The day ended with the distribution of educational materials by CORE (Community Organized Resources for Educating), the parent organization of Freshman Impact.

McPherson said he has found that the teaching method employed by Freshman Impact is successful in driving the message home to students, and they also develop a rapport with local

agencies and emergency responders.

"The students see up close and learn through hands-on activities the possible consequences of wrong choices and the lasting effects physically and emotionally on their bodies, their families and friends and their community," he said, noting that West River Electric based in Wall is also an event sponsor. "It's all about making safe choices and preventing destructive behaviors, and it's important our teens learn the life-long skills and values to help them make the best possible decisions."

University of Minnesota graduate students pose in a massive coal bucket during an electric cooperative tour sponsored by Renville-Sibley CPA and the university.

Renville-Sibley leads tour of electric cooperatives for college students

Erin Kelly
NRECA

The smallest electric cooperative in Minnesota is having an outsized impact in educating college students about the co-op business model and how power is generated and delivered for co-ops in the region.

Renville-Sibley Cooperative Power Association, a 1,586-member co-op with 13 full-time employees, worked with the University of Minnesota to organize a week-long tour of distribution co-ops and generation and transmission co-ops in Minnesota, South Dakota and North Dakota for graduate students pursuing master's degrees in science, technology and environmental policy.

"These students are going to lead us into the future from a public policy and an environmental perspective,"

said DeeAnne Norris, Renville-Sibley's CEO. "It's important that they understand there's an obligation to keep energy reliable and affordable while trying to marry that up with renewable energy and sustainability."

The mid-May tour began at Renville-Sibley's office in Danube, Minn., with a discussion about broadband, solar energy and farming. It continued with stops at several facilities run by Basin Electric Power Cooperative, the Bismarck, N.D.-based generation and transmission provider owned by 131 member co-ops that provide electricity for more than 3 million people in nine states.

Other visits included Sioux Valley Energy, a distribution co-op in Colman, South Dakota, where students learned about electric vehicle charging and other kinds of beneficial electrification,

and East River Electric in Madison, South Dakota, a G&T that supplies power to Renville-Sibley and 23 other co-ops in eastern South Dakota and western Minnesota. Students learned about East River's load management, economic development programs and co-op relationships.

The tour wrapped up at Lake Region Electric Cooperative in Pelican Rapids, Minn., where students saw the co-op's creative member-focused programs like wind and solar generation and hydroponic gardening trailers.

"It's important for the students to be able to get out there in the field to see the really big energy infrastructure," says Gabriel Chan, an associate professor at the University of Minnesota and co-director of the Electric Cooperative Innovation Center, a new initiative focused on research partnerships with co-ops.

"You read about wind, hydro or coal plants, but being there is an entirely

The students put on their harnesses and took turns going up in a bucket to simulate working conditions for linemen. The group also stopped by the headquarters of East River Electric in Madison, SD.

different experience.”

Chan had worked with Norris since before the COVID-19 pandemic to organize the tour and used the pandemic delay to create a semester-long graduate seminar called The Energy Transition in Rural America, which brought in guest speakers and included site visits to nearby cooperative facilities.

Sarah Komoroski, a mechanical engi-

“IF YOU DON’T TELL PEOPLE WHAT’S HAPPENING AT YOUR CO-OP, THEY’RE GOING TO COME UP WITH THEIR OWN STORY ABOUT YOU.”

- DEEANNE NORRIS, CEO, RENVILLE-SIBLEY CPA

neer who is halfway through her master’s degree program, said she felt like “a kid in a candy shop” on the tour as she got up-close and personal with coal boiler, gas turbine and other infrastructure.

“I was just smiling the whole time,” says Komoroski, who describes her passions as climate change and the transition to renewable energy. “Everyone

was so nice and so welcoming and so passionate about what they do.

“I think the biggest thing that struck me about co-ops is they’re so unique in terms of their governance structure,” she said. “They’re non-profit, member-owned, and their goals and incentives are different than a traditional for-profit utility. They’re each tackling the challenges of affordability, reliability and sustainability in a slightly different way.”

Komoroski said she believes electric cooperatives also have the advantage of having a special relationship with their members.

“Co-ops are uniquely positioned to build trust with their members during the energy transition,” she said. “That relationship is the exciting part to me.”

Norris and Chan say they hope to continue the week-long tour every other year for students in the two-year master’s program. The professor said he would like to hear more from cooperative consumer-members, and Norris says she would like to start it a day earlier.

“The students are in their 20s and

30s, but regardless of your age, that was a very taxing schedule,” says Norris, who went on the tour herself.

“It was an intense week,” Komoroski agrees. “We had about 15 stops in five days, with 26 hours of driving.”

Norris urges other co-ops across the country to connect with local universities or university extension offices and plan similar experiences that can raise awareness of energy systems in rural areas and how consumer-centric utilities like co-ops can lead the energy transition.

“When I was planning this trip, there was a little skepticism by a few people we wanted to visit,” she said. “But if you don’t tell people what’s happening at your co-op, they’re going to come up with their own story about you, and often it’s not close to reality.

“This experience shows that when we open our doors, we can engage and collaborate with students who are excited about the cooperative business model, who are passionate about the Earth and her resources and are enthusiastic about learning and making a difference.”
